*Artbibliographies Modern* ,1997      *Subject Guide to Books in Print* ,1971      *Library Journal* ,1997-10      **Ethical Debates in Orangutan Conservation** Alexandra Palmer,2020-03-04 Ethical Debates in Orangutan Conservation explores how conservationists decide whether and how to undertake rehabilitation and reintroduction R R when rescuing orphaned orangutans The author demonstrates that exploring ethical dilemmas is crucial for understanding ongoing disagreements about how to help endangered wildlife in an era of anthropogenic extinction Although R R might appear an uncontroversial activity there is considerable debate about how and why it ought to be practised Drawing on in depth qualitative research with orangutan conservation practitioners this book examines how ethical trade offs shape debates about R R For example what if the orphan fails to learn how to be an orangutan again after years in the company of humans What if she is sent into the forest only to slowly starve Would she have been better off in a cage Could the huge cost of sending a rescued ape back to the wild be better spent on stopping deforestation in the first place Or do we have a moral obligation to rescue the orphan regardless of cost This book demonstrates that deconstructing ethical positions is crucial for understanding ongoing disagreements about how to help our endangered great ape kin and other wildlife Ethical Debates in Orangutan Conservation is essential reading for those interested in conservation and animal welfare animal studies primatology geography environmental philosophy and anthropology      *Animal World* ,1922      **A Philosopher Looks at the Natural World** Daniel C. Fouke,2021-08-10 This book interweaves the author s personal story and observations of nature with scientific research and philosophical reflection It tells the story of nearly three decades of labor to ecologically restore twenty one acres of ruined land near Dayton Ohio This story and what the author has observed motivate reflection on the human relationship to soil the inner lives of animals the intelligence of plants and human psychology The book advances the case for the intelligence and kinship of all living things an ethic of respect for life and the need to radically rethink how human societies live on Earth      *Eye of the Whale* Dick Russell,2001 Eye of the Whale focuses on one great whale in particularthe coastal traveling California gray whale Gray whales make the longest migration of any mammal from the lagoons of Baja California to the feeding grounds of the Bering Strait between Alaska and Siberia nearly 6 000 miles That the gray whale exists today is nothing short of miraculous Whaling fleets twice massacred the species to near extinction first during the nineteenth century and again during the early part of the twentieth century BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved      **The Zoophilist** ,1883      **Forthcoming Books** Rose Arny,2001

**Better an Honest Scoundrel** Stephen T. Watts,2003 This one deals with my law enforcement career and the second deals with a subsequent private investigation career This book is true experiences that occurred during a 27 year law enforcement career and portrays my conclusions about police and the police world My intended audience are people who have a general interest in the world of a detective Those who are contemplating a law enforcement career might also have a interest The

manuscript has been well received by a variety of readers. Many of my police friends have told me they liked it and agree with my conclusions but are uncomfortable with my not having supported police. As you read the manuscript you will see that I categorize police in percentage groups with some police being heroes and others being villains. *Brinkman's cumulatieve catalogus van boeken*, 1997 Voorts een alfabetische lijst van Nederlandsche boeken in België uitgegeven **The Dial** Francis Fisher Browne, Waldo Ralph Browne, Scofield Thayer, 1919 *Cruising World*, 1991-10 *Dark Green Religion* Bron Raymond Taylor, 2010 A love of green may be a human universal. Deepening the palette of green scholarship Bron Taylor proves remarkably to be both an encyclopedist and a visionary. Jonathan Benthall author of *Returning to Religion* Why a Secular Age is Haunted by Faith This important book provides insight into how a profound sense of relation to nature offers many in the modern world a vehicle for attaining a spiritual wholeness akin to what has been historically associated with established religion. In this sense *Dark Green Religion* offers both understanding and hope for a world struggling for meaning and purpose beyond the isolation of the material here and now. Stephen Kellert Yale University School of Forestry and Environmental Studies In this thought provoking volume Bron Taylor explores the seemingly boundless efforts by human beings to understand the nature of life and our place in the universe. Examining in depth the ways in which influential philosophers and naturalists have viewed this relationship Taylor contributes to the further development of thought in this critically important area where our depth of understanding will play a critical role in our survival. Peter H. Raven President Missouri Botanical Garden Carefully researched, strongly argued, originally conceived and very well executed, this book is a vital contribution on a subject of immense religious, political and environmental importance. It is also a great read. Roger S. Gottlieb author of *A Greener Faith: Religious Environmentalism and our Planet's Future* A fascinating analysis of our emotional and spiritual relationship to nature. Whether you call it dark green religion or something else, Bron Taylor takes us through our spiritual relationship with our planet, its ecosystems and evolution in an enlightened and completely undogmatic manner. Dr. Claude Martin Former Director General World Wildlife Fund An excellent collection of guideposts for perplexed students and scholars about the relationships of nature, religions, spirituality, animism, pantheism, deep ecology, Gaia and land ethics and for the environmentalist seeking to make the world a better place through green religion as a social force. Fikret Berkes author of *Sacred Ecology: Traditional Ecological Knowledge and Resource Management* *Dark Green Religion* shows conclusively how nature has inspired a growing religious movement on the planet, contesting the long reign of many older faiths. Taylor expertly guides us through an astonishing array of thinkers past and present who have embraced in part or whole the new religion. I was thoroughly convinced that this movement has indeed become a major force on Earth with great potential consequences for our environmental ethics. Donald Worster University of Kansas In this exceptionally interesting and informative book Bron Taylor has harvested the fruits of years of pioneering research in what amounts to a new field in religious studies: the study of how religious/spiritual themes show up in the work of people concerned about nature in many

diverse ways Taylor persuasively argues that appreciation of nature's sacred or spiritual dimension both informs and motivates the work of individuals ranging from radical environmentalists and surfers to eco tourism leaders and museum curators I highly recommend this book for everyone interested learning more about the surprising extent to which religious spiritual influences many of those who work to protect to exhibit or to represent the natural world Michael E Zimmerman Director Center for Humanities and the Arts University of Colorado at Boulder **Sketch**, 1896 *Nature's State* Susan Kollin, 2018-06-15 An engaging blend of environmental theory and literary studies *Nature's State* looks behind the myth of Alaska as America's last frontier a pristine and wild place on the fringes of our geographical imagination Susan Kollin traces how this seemingly marginal space in American culture has in fact functioned to alleviate larger social anxieties about nature ethnicity and national identity Kollin pays special attention to the ways in which concerns for the environment not only shaped understandings of Alaska but also aided U.S. nation building projects in the Far North from the late nineteenth century to the present era Beginning in 1867 the year the United States purchased Alaska a variety of literary and cultural texts helped position the region as a crucial staging ground for territorial struggles between native peoples Russians Canadians and Americans In showing how Alaska has functioned as a contested geography in the nation's spatial imagination Kollin addresses writings by a wide range of figures including early naturalists John Muir and Robert Marshall contemporary nature writers Margaret Murie John McPhee and Barry Lopez adventure writers Jack London and Jon Krakauer and native authors Nora Dauenhauer Robert Davis and Mary TallMountain **The Athenaeum**, 1847 *Outlook* Alfred Emanuel Smith, Francis Walton, 1875 *First-second Report ... with Transactions and Addresses at the First-fourth Annual Meetings and Called Meetings ... [Feb. 1895-Mar. 1898]*. North Carolina State Dairymen's Association, 1896 *Caxton's Book* W. H. Rhodes, 2019-12-06 In *Caxton's Book* W. H. Rhodes embarks on an intricate exploration of the evolution of the printed word in England focusing on the groundbreaking contributions of William Caxton the first English printer Rhodes employs a rich scholarly prose enriched with historical context blending narrative with critical analysis to examine the socio political landscape surrounding Caxton's innovations The book offers a meticulous examination of the cultural and intellectual currents of the late 15th century highlighting how Caxton's printing press transformed not just literature but the dissemination of knowledge itself W.
