Evans,2017-05-24 The first truly interdisciplinary analysis to link Douglas Sirk s striking visual aesthetic to key movements in twentieth century art and architecture this book reveals how the exaggerated artifice of Sirk s formal style emerged from his detailed understanding of the artistic debates that raged in 1920s Europe and the post war United States With detailed case studies of *Final Chord* and *All That Heaven Allows* Victoria Evans demonstrates how Sirk attempted to dissolve the boundaries of cinema by assimilating elements of avant garde art architecture and design into the colour composition and setting of many of his most well known films Treating Sirk s oeuvre as a continuum between his German and American periods Evans argues that his *mise en scene* was the result of an interdisciplinary transnational dialogue and illuminates the broader cultural context in which his films appeared by establishing links between archival documents Modernist manifestos and the philosophical writings of his peers   *By the Hand of Providence* Rod Gragg,2012-06-12 Based on meticulous research into the correspondence and documentation of the founding fathers from the crafting of the Declaration of Independence to the signing of the peace treaty with Britain this book sheds light on how the Judeo Christian world view motivated America s founding fathers   **205 Home Plans** Net Gingras,1982   **High Life** Matthew Lasner,2023-04-04 The first comprehensive architectural and cultural history of condominium and cooperative housing in twentieth century America Today one in five homeowners in American cities and suburbs lives in a multifamily home rather than a single family house As the American dream evolves precipitated by rising real estate prices and a renewed interest in urban living many predict that condos will become the predominant form of housing in the twenty first century In this unprecedented study Matthew Gordon Lasner explores the history of co owned multifamily housing in the United States from New York City s first co op in 1881 to contemporary condominium and townhouse complexes coast to coast Lasner explains the complicated social economic and political factors that have increased demand for this way of living situating the trend within the larger housing market and broad shifts in residential architecture and family life He contrasts the prevalence and popularity of condos townhouses and other privately governed communities with their ambiguous economic legal and social standing as well as their striking absence from urban and architectural history   **Overdrive** Wim de Wit,Christopher James Alexander,2013
