

Primary Colours

3 pigment colours that can not be mixed or formed by any combination of other colours. All other colours are derived from these 3 hues.

Secondary Colours

These are the colours formed by mixing two primary colours.

Tertiary Colours

These are the colours formed by mixing a primary and a secondary colour. That's why the hue is a two word name, such as blue-green, red-violet, and yellow-orange.

Analogous

Analogous colours sit next to one another on the colour wheel. These colours are in harmony with one another.

White, black and gray are considered to be neutral.

COLOUR THEORY

2nd April - 2019

Cold Colours

They give an impression of calm, and create a soothing impression. They remind us of cold water.

COLD | WARM

Warm Colours

They are vivid and energetic, they are visually and emotionally exciting. They remind us of fire and heat.

Complementary Colours

Colours that are opposite each other on the colour wheel are considered to be complementary colours (example: red and green).

When put together, they appear more vivid than when apart.

Agoston, 2013-06-05 This book directly addresses a long felt unsatisfied need of modern color science an appreciative and technically sound presentation of the principles and main offerings of colorimetry to artists and designers written by one of them With his unique blend of training and experience in engineering with his lifelong interest and latterly career in art and art education Dr Agoston is unusually well prepared to convey the message of color science to art and design His book fulfills the hopes I had when I first heard about him and his book I foresee important and long lasting impacts of this book analogous to those of the epoch making writings by earlier artist scientists such as Leonardo Chevreul Munsell and Pope Nearly all persons who have contributed to color science recently as well as formerly were attracted to the study of color by color in art Use of objective or scientific methods did not result from any cold detached attitude but from the inherent difficulties of the

problems concerning color and its use by which they were intrigued Modern education and experience has taught many people how to tackle difficult problems by use of scientific methods Therefore color science **Color Theory Made Easy** JIM. AMES AWS,2017-03-16 Traditional color theory can be confusing to artists especially when you try to use inaccurate color wheels as guides to mixing their colors Now Color theory Made Easy presents an alternative approach that cuts through the tangle of established but contradictory concepts and gives the artist a universal theory that really applies to their work Most artists have been taught that red blue and yellow are the primary colors hues that cannot be created from any combination of other colors However as a result of years of study author art teacher and artist Jim Ames has concluded that the true primary colors are cyan magenta and yellow CMY In Color theory Made Easy Ames explains the importance of these three colors as the basis for all our thinking about color **The Basic Law of Color Theory** Harald Küppers,1982
