Combat Applications Of The Tactical Tomahawk:

Combat Applications of the Tactical Tomahawk Benjamin Bradak, 2018-09-09 This is a 2nd printing not a 2nd edition of *Combat Applications of the Tactical Tomahawk* CATT now back by popular demand the first printing was extremely well received but unfortunately went out of print with the demise of the late Paladin Press With this new publishing it can once again continue to be added to the libraries of warrior scholars around the world The tomahawk is undergoing a resurgence as a military sidearm and tactical tool and has been in one form or another extremely popular for both military and personal combat for longer than recorded history and for good reason according to Bradak U S Army veteran longtime professional martial artist and co author of the acclaimed *Lessons on the English Longsword* A goal of the author with this work as an aid is to once again bring this weapon into the repertoire of the modern and pragmatic martial art instruction arsenal

Intelligent Robotics and Applications Caihua Xiong, Yongan Huang, Youlun Xiong, 2008-09-29 This two volumes constitute the refereed proceedings of the First International Conference on Intelligent Robotics and Applications ICIRA 2008 held in Wuhan China in October 2008 The 265 revised full papers presented were thoroughly reviewed and selected from 552 submissions they are devoted but not limited to robot motion planning and manipulation robot control cognitive robotics rehabilitation robotics health care and artificial limb robot learning robot vision human machine interaction mobile robotics micro nano mechanical systems manufacturing automation multi axis surface machining realworld applications **Navy, Marine Corps, and Air Force Tactical Aviation Programs** United States. Congress. House. Committee on Armed Services. Tactical Air and Land Forces Subcommittee, 2011 Algorithms of Armageddon George Galdorisi, Sam J Tangredi, 2024-03-12 It is unclear if U S policy makers and military leaders fully realize that we have already been thrust into an artificial intelligence AI race with authoritarian powers Today the United States peer adversaries China and Russia have made clear their intentions to make major investments in AI and insert this technology into their military systems sensors and weapons Their goal is to gain an asymmetric advantage over the U S military The implications for our national security are many and complex *Algorithms of Armageddon* examines this most pressing security issue in a clear insightful delivery by two experts Authors George Galdorisi and Sam J Tangredi are national security professionals who deal with AI on a day to day basis in their work in both the technical and policy arenas Opening chapters explain the fundamentals of what constitutes big data machine learning and artificial intelligence They investigate the convergence of AI with other technologies and how these systems will interact with humans Critical to the issue is the manner by which AI is being developed and utilized by Russia and China The central chapters of the work address the weaponizing of AI through interaction with other technologies man machine teaming and autonomous weapons systems The authors cover in depth debates surrounding the AI genie out of the bottle controversy AI arms races and the resulting impact on policy and the laws of war Given that global powers are leading large scale development of AI it is likely that use of this technology will be global

in extent Will AI enabled military weapons systems lead to full scale global war Can such a conflict be avoided The later chapters of the work explore these questions point to the possibility of humans failing to control military AI applications and conclude that the dangers for the United States are real Neither a protest against AI nor a speculative work on how AI could replace humans Algorithms of Armageddon provides a time critical understanding of why AI is being implemented through state weaponization the realities for the global power balance and more importantly U S national security Galdorisi and Tangredi propose a national dialogue that focuses on the need for U S military to have access to the latest AI enabled technology in order to provide security and prosperity to the American people *The sound of freedom: Naval Weapons*
