**Combat Aircraft of the United States Air Force** Michael

Green, 2016-07-30 When the United States Army Signal Corps created the Aeronautical Division in August 1907 it had a mission to take charge of all matters pertaining to military ballooning air machines and all kindred matters That small inconsequential portion of the US Army would grow progressively over the many decades to become a separate service named the USAir Force in 1947 following the Second World War Overnight it became the worlds most powerful military establishment able to deliver conventional and nuclear ordnance anywhere around the globe Todays cutting edge example of this power projection is the supersonic bat winged B 2 Spirit stealth bomber which can fly at an altitude of 50 000 feet and is built of carbon graphite composite materials The B 2 Spirit is a far cry from the early days of the service when it relied on fragile prop driven wood and fabric aerial platforms such as the Wright Type B which could barely reach an altitude of 100 feet In between have been such iconic Second World War aircraft as the P 51 Mustang and P 47 Thunderbolt fighters and bombers such as the B 25 Mitchell B 17 Flying Fortress and B 29 Super Fortress which dropped the first A Bomb in 1945 The Cold War demanded ever more powerful aircraft such as the B 58 Hustler and B 52 Stratofortress and fighters including the F 86 Sabre F 104 Starfighter and F 4 Phantom All these aircraft and more are vividly illustrated and described in detail in this superb Images of War publication

*Combat Aircraft of the World* John William Ransom Taylor, **The Cutting Edge** Mark A. Lorell, Hugh P. Levaux, 1998 The proposition that innovation is critical in the cost effective design and development of successful military aircraft is still subject to some debate RAND research indicates that innovation is promoted by intense competition among three or more industry competitors Given the critical policy importance of this issue in the current environment of drastic consolidation of the aerospace defense industry the authors here examine the history of the major prime contractors in developing jet fighters since World War II They make use of an extensive RAND database that includes nearly all jet fighters fighter attack aircraft and bombers developed and flown by U S industry since 1945 as well as all related prototypes modifications upgrades etc The report concludes that 1 experience matters because of the tendency to specialize and thus to develop system specific expertise 2 yet the most dramatic innovations and breakthroughs came from secondary or marginal players trying to compete with the industry leaders and 3 dedicated military R D conducted or directly funded by the U S government has been critical in the development of new higher performance fighters and bombers
