*Energy Research Abstracts*, 1980      **Advocacy Organizations and Collective Action** Aseem Prakash, Mary Kay Gugerty, 2010-11-25 Advocacy organizations are viewed as actors motivated primarily by principled beliefs This volume outlines a new agenda for the study of advocacy organizations proposing a model of NGOs as collective actors that seek to fulfil normative concerns and instrumental incentives face collective action problems and compete as well as collaborate with other advocacy actors The analogy of the firm is a useful way of studying advocacy actors because individuals via advocacy NGOs make choices which are analytically similar to those that shareholders make in the context of firms The authors view advocacy NGOs as special types of firms that make strategic choices in policy markets which along with creating public goods support organizational survival visibility and growth Advocacy NGOs strategy can therefore be understood as a response to opportunities to supply distinct advocacy products to well defined constituencies as well as a response to normative or principled concerns      *When Demand Exceeds Supply* Jorge C. Rios MD FACC FACP, 2016-08-20 Every year 36 997 students apply for the first time for admission to a US medical school a number that has been increasing over the years Of these 37 000 only approximately half will gain admission What happens to the rest Many have true avocation for a medical career and will search for other options to pursue their dream Many will search for a second option a Caribbean medical school Caribbean medical schools remain an enigma to those most involved in medical education Many US medical educators may see them as insignificant a lower quality version of US medical schools Dr Jorge Rios has been an insider in US and Caribbean medical education He shares candid information about the role that Caribbean medical schools play for both students and the US medical system as a whole Applicants to medical school will benefit from his insights His frank remarks will be particularly helpful to students who are interested in Caribbean medical schools as an education option In addition the Caribbean schools themselves would be wise to head his advice about how to improve their place within the hierarchy of medical schools Finally the book helps those involved in US education to differentiate between Caribbean medical schools and how the US system can benefit from greater alliances with them      *Economics* Prentice-Hall Staff, 2003 Bringing Economics to Life      **Estimating the Demand, Supply, and National Costs of HIV Testing**, 1989      **Collaborative Planning in Supply Chains** Gregor Dudek, 2013-06-29 In light of the vast number of publications on Supply Chain Management SCM it is not easy to extract those which will have a great impact both on theory and practice The dissertation of Gregor Dudek certainly is one such valuable source because it tackles inter organizational collaboration in a novel and effective manner SCM is concerned with the coordination of material information and financial flows within and across often legally separated organizational units It has gained great attention both in industry and research as an important area for improving competitiveness A Supply Chain SC can be regarded as a hybrid between a market relationship and a hierarchical organization and as such requires specific tools to support the efficient planning and execution of the order fulfillment process

ess Software vendors have developed so called Advanced Planning Systems APS to overcome deficiencies of traditional Enterprise Resource Planning systems and to better support the planning functions needed in SCM However APS are based on the principles of hierarchical planning which are well suited for intra organizational SCs but fall short when non hierarchical collaboration between partners companies is needed This is particularly true when a buyer and a supplier have to align their medium term order and supply plans
