Measuring Health Ian McDowell, 2006-03-09 Worldwide economic constraints on health care systems have highlighted the importance of evidence based medicine and evidence based health policy The resulting clinical trials and health services research studies require instruments to monitor the outcomes of care and the output of the health system However the over abundance of competing measurement scales can make choosing a measure difficult at best Measuring Health provides in depth reviews of over 100 of the leading health measurement tools and serves as a guide for choosing among them LNow in its third edition this book provides a critical overview of the field of health measurement with a technical introduction and discussion of the history and future directions for the field This latest edition updates the information on each of the measures previously reviewed and includes a complete new chapter on anxiety measurement to accompany the one on depression It has also added new instruments to those previously reviewed in each of the chapters in the book LChapters cover measurements of physical disability social health psychological well being anxiety depression mental status testing pain general health status and quality of life Each chapter presents a tabular comparison of the quality of the instruments reviewed followed by a detailed description of each method covering its purpose and conceptual basis its reliability and validity and where possible shows a copy of the actual scale To ensure accuracy of the information each review has been approved by the original author of each instrument or by an acknowledged expert Oxford Textbook of

Neurorehabilitation Volker Dietz, Nick S. Ward, 2020-05-28 Neurorehabilitation is an expanding field with an increasing clinical impact due to an ageing population During the last 20 years neurorehabilitation has developed from a discipline with little scientific background separated from other medical centers to a medical entity largely based on the principles of evidenced based medicine with strong ties to basic research and clinical neurology Today neurorehabilitation is still a work in progress and treatment standards are not yet established for all aspects of the field There are very few books that address contemporary neurorehabilitation from this perspective This new edition of the Oxford Textbook of Neurorehabilitation

provides an understanding of the theoretical underpinnings of the subject as well as a clear perspective on how and why to approach treatment decisions on an individualized basis The book has been thoroughly updated to reflect novel important developments in the field and includes new chapters on vocational rehabilitation self management strategies in neurorehabilitation and music supported therapy in neurorehabilitation This indispensable book will be of great interest to rehabilitation physicians neurologists and allied health care professionals who look after patients requiring neurorehabilitation
