Postmodern/Postwar and After Jason Gladstone, Andrew Hoberek, Daniel Worden, 2016-07-01 Within the past ten years the field of contemporary American literary studies has changed significantly Following the turn of the twenty first century and mounting doubts about the continued explanatory power of the category of postmodernism new organizations have emerged book series have been launched journals have been created and new methodologies periodizations and thematics have redefined the field Postmodern Postwar and After aims to be a field defining book a sourcebook for the new and emerging critical terrain that explores the postmodern postwar period and what comes after The first section of essays returns to the category of the post modern and argues for the usefulness of key concepts and themes from postmodernism to the study of contemporary literature or reevaluates postmodernism in light of recent developments in the field and historical and economic changes in the late twentieth and early twenty first centuries These essays take the contemporary abandonments of postmodernism as an occasion to assess the current states of postmodernity After that the essays move to address the critical shift away from postmodernism as a description of the present and toward a new sense of postmodernism as just one category among many that scholars can use to describe the recent past The final section looks forward and explores the question of what comes after the postwar postmodern Taken together these essays from leading and emerging scholars on the state of twenty first century literary studies provide a number of frameworks for approaching contemporary literature as influenced by yet distinct from postmodernism The result is an indispensable guide that seeks to represent and understand the major overhauling of postwar American literary studies that is currently underway

British Exploitation of German

Science and Technology, 1943-1949 Charlie Hall, 2019-01-16 At the end of the Second World War Germany lay at the mercy of its occupiers all of whom launched programmes of scientific and technological exploitation Each occupying nation sought to bolster their own armories and industries with the spoils of war and Britain was no exception Shrouded in secrecy

yet directed at the top levels of government and driven by ingenuity from across the civil service and armed forces Britain made exploitation a key priority By examining factories and laboratories confiscating prototypes and blueprints and interrogating and even recruiting German experts Britain sought to utilise the innovations of the last war to prepare for the next This ground breaking book tells the full story of British exploitation for the first time sheds new light on the legacies of the Second World War and contributes to histories of intelligence science warfare and power in the midst of the twentieth century

Teaching a Dark Chapter Daniela R. P. Weiner, 2024-07-15 Teaching a Dark Chapter explores how textbook narratives about the Fascist Nazi past in Italy East Germany and West Germany followed relatively calm undisturbed paths of little change until isolated flashpoints catalyzed the educational infrastructure into periods of rapid transformation Though these flashpoints varied among Italy and the Germanys they all roughly conformed to a chronological scheme and permanently changed how each dark past was represented Historians have often neglected textbooks as sources in their engagement with the reconstruction of postfascist states and the development of postwar memory culture But as Teaching a Dark Chapter demonstrates textbooks yield new insights and suggest a new chronology of the changes in postwar memory culture that other sources overlook Employing a methodological and temporal rethinking of the narratives surrounding the development of European Holocaust memory Daniela R P Weiner reveals how long before 1968 textbooks in these three countries served as important tools to influence public memory about Nazi Fascist atrocities As Fascism had been spread through education then education must play a key role in undoing the damage Thus to repair and shape postwar societies textbooks became an avenue to inculcate youths with desirable democratic and socialist values Teaching a Dark Chapter wedes the historical study of public memory with the educational study of textbooks to ask how and why the textbooks were created what they said and how they affected the society around them

A New Modern History of East Asia Eckhardt Fuchs, Tokushi Kasahara, Sven Saaler, 2017-12-04 For decades historians and societal forces have campaigned for rapprochement reconciliation and dialogue between East Asian nations This book is a result of these efforts Debates regarding the interpretation of the modern history of East Asia continue to affect bilateral relations between the states of the region History education has become a particularly controversial issue in this context This book s main message is that a common understanding regarding the history of East Asia is possible even though some differences remain It is not only a major contribution to reconciliation in the region but as the first textbook on the history of East Asia written collaboratively by scholars from three East Asian countries it is also highly recommended for use in an anglophone teaching environment The authors are a group of historians teachers and concerned citizens from China Japan and South Korea

Intelligence Agencies, Technology and Knowledge Production Rüdiger Bergien, Debora Gerstenberger, Constantin Goschler, 2022-02-17 This volume examines intelligence services since 1945 in their role as knowledge producers Intelligence agencies are producers and providers of arcane information However little is known about the social cultural and material

dimensions of their knowledge production processing and distribution This volume starts from the assumption that during the Cold War these core activities of information services underwent decisive changes of which scientization and computerisation are essential With a focus on the emerging alliances between intelligence agencies science and computer technology the chapters empirically explore these transformations and are characterised by innovative combinations of intelligence history with theoretical considerations from the history of science and technology and the history of knowledge At the same time the book challenges the bipolarity of Cold War history in general and of intelligence history in particular in favour of comparative and transnational perspectives The focus is not only the Soviet Union and the United States but also Poland Turkey the two German states and Brazil This approach reveals surprising commonalities across systems time and again the expansion and use of intelligence knowledge came up against the limits that resulted from intelligence culture itself The book enriches our global understanding of knowledge of the state and contributes to a historical framework for the past decade of debates about the societal consequences of intelligence data processing This book will be of much interest to students of intelligence studies science and technology studies security studies and International Relations
