Gerontology An Interdisciplinary Perspective:

Gerontology John C. Cavanaugh, Susan Krauss Whitbourne, 1999 Gerontology An Interdisciplinary Perspective provides a thorough and broad based survey of the current knowledge base and is the first gerontology text aimed at the graduate level. The authors of each chapter are leading experts in their respective fields. Each chapter reflects current trends and emerging issues as well as a firm grounding in previous research and theory and includes review questions and a list of additional references. The interdisciplinary nature of the text clearly reflects the state of the field and emphasizes the need to take a broader view of age related phenomena. Ideal for master's level students in gerontology, psychology, sociology, nursing, geriatrics and related disciplines. Gerontology An Interdisciplinary Perspective can also serve as a core text in appropriate advanced undergraduate courses.

Gerontology John C. Cavanaugh, Susan Krauss Whitbourne, 1999 As the baby boom generation ages, the number of older adults continues to increase at a dramatic rate. This trend has created a need for well educated professionals in the rapidly expanding fields of psychology, social work, health care, education, public administration and policy and human services. Because of this, the growth of courses in gerontology has created a demand for appropriate textbooks, particularly at the graduate level. Gerontology An Interdisciplinary Perspective provides a thorough and broad based survey of the current knowledge base and is the first gerontology text aimed at the graduate level. The authors of each chapter are leading experts in their respective fields. Topics covered include theory, methodology, physiological processes, health, culture and ethnicity, dying and bereavement, basic cognitive processes, intellectual abilities, personality assessment, mental health and intervention, caregiving, work, retirement and leisure, competency and nursing homes and public policy issues. Each chapter reflects current trends and emerging issues as well as a firm grounding in previous research and theory and includes review questions and a list of additional references. The interdisciplinary nature of the text clearly reflects the state of the field and emphasizes the need to take a broader view of age related phenomena. Ideal for master's level students in gerontology, psychology, sociology, nursing, geriatrics and related disciplines. Gerontology An Interdisciplinary Perspective can also serve as a core text in appropriate advanced undergraduate courses.

Introduction to Aging Judith A. Sugar, 2019-08-08 The second edition of this engaging text reflects a welcome new paradigm for aging that of aging as a positive stage of life. Written for undergraduate and masters level students, it provides an interdisciplinary perspective on the wide variety of subject areas within gerontology and combines research with engrossing narratives, new trends and controversial topics. Substantially updated, the second edition features integrated content on the diversity of the aging population. State of the art information includes new science on the biology of aging, chronic conditions, integrated care, changing roles for older adults, new demographics and critical policy issues. The second edition examines career opportunities in gerontology and includes Practical Applications and Student Activities, new scenarios and many more charts and graphs. Qualified instructors have access to supplementary material including PowerPoint slides, a test bank and an instructor's

The Clinical Care of the Aged Person David G. Satin, Barbara A. Blakeney, 1994 As the population of aged people increases throughout the world the need for comprehensive integrated geriatric care is rapidly becoming a high priority Developed from an education program in clinical geriatrics offered through the Division on Aging of the Harvard Medical School this authoritative text provides broad interdisciplinary coverage of geriatric health care The book incorporates the theory and skill needed for many disciplines to work together effectively It integrates the various topics covered by way of section introductions cross references within chapters a case study and case conference and an introductory chapter of discussions among a panel of aged people With contributions from a wide range of experts this book teaches an interdisciplinary perspective on the aged and their health care and examines the working relationships among the many professionals providing care for the aged

The International Handbook on Aging Erdman P. Palmore, Frank Whittington, Suzanne Kunkel, 2009-10-27 The United Nations World Assembly on Aging has made advancing health and well being into old age a worldwide call for action And this text at hand shows us what researchers worldwide are doing to answer that call Here three of America s most esteemed experts on aging lead a global team of contributors each an expert in his or her country to show us what the top challenges of each nation are and what top research is being done there to meet those While we cannot predict with absolute certainty all of the issues that will arise over the next 20 years we can anticipate some and we must start now to prepare for these challenges an expert from the U S Department of Health and Human Services warned at a recent UN World Assembly on Aging Needed response to the global population shift is not just the responsibility of governments but will be a product of wise long term decisions made by individuals and societies she explained In most nations globally populations are graying and the number of people aged 65 and older is vastly increasing creating a larger segment of senior citizens than the world has ever before seen Across human history the elderly accounted for no more than 3 percent of the world population By the year 2030 the elderly are expected to make up about 25 percent of the world population And while longevity is of course seen as a great success longer lifespan for such masses also creates dilemmas For example the incidence of dementia has already increased significantly with an 11 fold increase in people aged 65 and older in the US since the turn of the century and a similar increase in aged people in Scotland has researchers there scrambling to find treatments for what they expect will be a 75 percent increase in dementia over the next 25 years Chronic diseases that come with aging are already taxing health care systems in the US and around the world to Japan with most experts aware their current health systems would be overrun and lack enough staff and facilities to handle the needs of an elderly population multiplying largely in the coming two decades Increases in psychological issues such as dealing with the depression often striking aged people are impending too as are social issues such as how families and public policies will deal with the changing shape of the family

International Handbook of Positive Aging Rachael E. Docking, Jennifer Stock, 2017-07-14 As our global demographic shifts towards an increasingly aging population we have an opportunity to

transform how we experience and think about getting older and embrace the diversity and contribution that this population can bring to society The International Handbook of Positive Aging showcases the latest research and theory into aging examining the various challenges faced by older adults and the ways in which we can bring a much needed positive focus towards dealing with these The handbook brings together disparate research from medical academic economic and social community fields with contributions from NHS partners service users universities across the United Kingdom and collaborations with international research leaders in the field of aging Divided into sections the first part of the book focuses on introducing the concept of positive aging before going on to cover the body over the life course well being and care delivery All contributors recognise the fact that we are living longer which is providing us with a tremendous opportunity to enjoy and flourish in healthy and fulfilling later lives and this focus on the importance of patient empowerment is integral to the book This is a valuable reference source for those working in developmental psychology clinical psychology mental health health sciences medicine neuropsychological rehabilitation sociology anthropology social policy and social work It will help encourage researchers professionals and policymakers to make the most of opportunities and innovations to promote a person's sense of independence dignity well being good health and participation in society as they get older

Aging and Older Adulthood Joan T.

Erber, 2011-08-24 Updated and substantially revised the second edition of *Aging and Older Adulthood* reflects the most current scientific research and theoretical foundations that contribute to our understanding of aging and older adulthood Updated content and references include recent neurological findings on brain structure and functioning as well as factors that influence cognitive functioning health care decision making and social relationships Chapter opening vignettes engage students with real world illustrations of older adults which relate to the concepts to come Applying Research boxes offer examples of current research findings that can be applied to the everyday lives of older adults Understanding Aging boxes highlight phenomena such as sundown syndrome and end of life desires which provide a deeper insight into the aging process Integrated themes of diversity environmental influences on aging and applications to everyday life relate the story of aging more directly to key concepts New Chapter 13 explores what older adulthood may look like in the future and ties together the author's theoretical framework with views on positive aging Instructor's Manual with Test Bank and PowerPoint slides available online at www.wiley.com/go/erber *The Oxford Handbook of Retirement* Mo Wang, 2013 This handbook reviews existing theoretical perspectives and research findings on retirement explores current and future challenges in retirement research and practice and provides corresponding recommendations and suggestions *Annual Review of Gerontology and Geriatrics, Volume 30, 2010* Keith E. Whitfield, 2010-11 Print CourseSmart Cross-Cultural and Cross-Disciplinary Perspectives in Social Gerontology Tannistha Samanta, 2016-08-02 This volume intends to re establish

social gerontology as a discipline that has pragmatic links to policy and practice Collectively the chapters enrich public debates about the moral cultural and economic questions surrounding aging thereby ameliorating the problems associated with aging societies This volume is uniquely cross cultural theory driven and cross disciplinary It fills a gap in the gerontological scholarship of the global south that is predominantly descriptive and empirical Based on original research this volume examines in particular the sociological question of inequality and its intersection with age gender health family and social relations In the process the studies herein highlight the unique historical institutional and social systems that govern the subjective experience of aging in diverse contexts globally Specifically societies in transition including India Lebanon Nigeria Japan China Israel and in Europe are studied while connecting the micro social experience of aging loneliness wellbeing discrimination relationships and resilience with larger temporal and political contexts This exercise generates intellectual capital that reformulates links between aging research and policy in innovative ways Overall the volume echoes the global scientific commitment to understand the socio cultural process of aging in transitional societies and utilizes rich opportunities for cross fertilization of ideas disciplines and methods to advance the gerontological promise of critical inquiry training and practice

Functional Movement Development Across the Life Span Donna J. Cech, Suzanne Tink

Martin, 2002-03-29 The 2nd edition of this expert text emphasizes normal development and function examining how function is attained and how it can be optimized across the life span Its logical organization and presentation equips readers with the background and tools needed to understand the components of functional movement A solid grounding in normal development including the cellular and systems changes that begin in the embryo and continue throughout life enables readers to recognize understand and appropriately treat abnormal motor function This new expanded edition features enhanced content related to development of specific age groups with a unique focus on the ongoing development of the healthy older adult Specifically the chapters dealing with the skeletal system the cardiovascular and pulmonary system and the nervous system have been extensively updated and more comprehensively illustrated

Human Aging Paul W. Foos, M. Cherie Clark, 2016-01-08 This text offers a readable and friendly presentation of the important methods findings and theories of human aging while actively involving the reader in meaningful exercises and critical thinking Students are repeatedly challenged to apply information in the text to the older adults in their own lives Specifically suggestions for enhancing the lives of their older relatives are offered and encouraged These include guidelines for discussions they might have regarding social emotional and environmental changes as well encouraging intellectual and social interaction In this Edition Emphasis on the science of the study of aging and why questions in aging are difficult to answer how social scientists attempt to handle such difficulties and the successes and failures social scientists have had thus far in answering those questions The text also demonstrates how current research findings are now being applied in the real world and or how they might be applied in the future Cross cultural comparisons and ethnic group comparisons are included wherever possible Each chapter begins with

Senior View which introduces students to a real person and gives them a chance to hear what older adults think and say about important issues related to the chapter and a chance to compare those opinions to the research findings Each chapter ends with Making Choices emphasizing the important behavioral emotional and social choices that students can make now to prolong a healthy happy life Chapter Projects offer the opportunity for active learning as students investigate for themselves an issue related to the chapter Instructors can expand these projects for students who want to learn more or for independent study Focus on Aging boxes compliment the material in the text providing additional insight and examples and encouraging critical thinking Every chapter includes discussion questions study questions chapter exercises and related online resources
