*Euthanasia and Law in the Netherlands* John Griffiths, Alex Bood, Heleen Weyers, 1998 The Netherlands is the only country in the world in which euthanasia under narrow defined circumstances is legally permissible Considerable attention has been paid over a number of years to the problem of regulating it and information has been systematically collected concerning actual practice Therefore the Dutch experience is of interest not only to the Dutch but to anyone who is considering whether or not to make euthanasia a legal practice This book is written for a reader without specific knowledge of law The central focus of the book is on Dutch law pertaining to euthanasia but it also considers the moral and legal principles that have played a role in the Dutch debate the available evidence bearing on actual practice and on the effectiveness of legal control It ends with some reflections on the problem of the slippery slope and the question whether the Dutch experience is exportable It includes translations of the relevant legislation including proposed reforms and of three leading cases *Bibliography of the History of Medicine*, 1984

**Judicial Politics and Policy-making in Western Europe** Mary L. Volcansek, 2014-04-08 Focusing on the intersection of politics and law in six western European countries and in two supra national bodies the contributors here aim to debunk the myth that judges are merely la bouche de la loi and analyze similarities in policy making of the judiciaries from one nation to the next *A History of the University in Europe: Volume 3, Universities in the Nineteenth and Early Twentieth Centuries (1800-1945)* Walter Rüegg, 2004-09-16 This is the third volume of a four part series which covers the development of the university in Europe east and west from its origins to the present day focusing on a number of major themes viewed from a European perspective The originality of the series lies in its comparative interdisciplinary collaborative and trans national nature It deals also with the content of what was taught at the universities but its main purpose is an appreciation of the role and structures of the universities as seen against a backdrop of changing conditions ideas and values This 2004 volume deals with the modernisation differentiation and expansion of higher education which led to the triumph of modern science changing the relations between universities and national states teachers and students their ambitions and political activities Special attention is focused on the fundamental advances in learning the content of what was taught at the universities *National Library of Medicine Current Catalog* National Library of Medicine (U.S.),

**Out of Otherness** Annet Mooij, 2020-02-10 From a punishment for the immoral acts of others venereal disease has become a malady that may confront any one of us This book examines the different stages in this long development and reveals the strange disjunction between waves of public anxiety and the factual incidence of disease in this troubled overlap between medical science and social life It describes the various efforts that have been made since 1850 to contain the hazard of sexually transmitted diseases and places the changing views on venereal infection in their historical and social context The comparisons drawn between the late 19th century battle against syphilis and present day responses to the AIDS epidemic underscore the notable changes that have taken place not only in thinking about sexuality

but also in the authority of the medical profession and in the position of patients vis vis policy makers and all those involved in determining modes of treatment and prevention

**The Low Countries History Yearbook** I. Schöffer, 2012-12-06 The present volume number 15 of the *Acta Historiae Neerlandicae* which have been appearing since 1978 under the title *The Low Countries History Yearbook* is the last of the series Economic reasons force the publishers to discontinue it This is a matter for regret Both the editors of the Yearbook and the board of the *Nederlands Historisch Genootschap* under the auspices of which it has been published are convinced that the books serve a useful purpose We hope that in the future more favourable circumstances will enable Dutch and Flemish historians to start a second series We feel however that the Yearbook should not be allowed to disappear completely In our opinion one of its most attractive features has been the Survey of recent historical works on Belgium and the Netherlands published in Dutch It is the intention of the *Nederlands Historisch Genootschap* to seek means to continue this in another form probably in that of pamphlets appearing every two years and written by the same or a similar group of experts In that way we may be able to provide a useful service to our colleagues abroad
