elementary school if they still struggled at the end of third grade age eight then they would be assessed for special education. The problem with this was not only a delayed assessment timeline but also the standardized tests not having an adequate set of questions to assess early elementary grade skills as well as the ethical problems and racial/ethnic biases of test questions. MTSS provides educators with a renewed emphasis on early intervention and progress monitoring assessment once or twice a week to monitor each student's skills and make instructional changes to promote success. This book offers a description and case examples of how schools and teachers can apply MTSS concepts for writing.
