Lucien Febvre, 1982 Lucien Febvre's magisterial study of sixteenth century religious and intellectual history published in 1942 is at long last available in English in a translation that does it full justice The book is a modern classic Febvre founder with Marc Bloch of the journal *Annales* was one of France's leading historians a scholar whose field of expertise was the sixteenth century This book written late in his career is regarded as his masterpiece Despite the subtitle it is not primarily a study of Rabelais it is a study of the mental life the mentality of a whole age Febvre worked on the book for ten years His purpose at first was polemical he set out to demolish the notion that Rabelais was a covert atheist a freethinker ahead of his time To expose the anachronism of that view he proceeded to a close examination of the ideas information beliefs and values of Rabelais and his contemporaries He combed archives and local records compendia of popular lore the work of writers from Luther and Erasmus to Ronsard the verses of obscure neo Latin poets Everything was grist for his mill books about comets medical texts philological treatises even music and architecture The result is a work of extraordinary richness of texture enlivened by a wealth of concrete details a compelling intellectual portrait of the period by a historian of rare insight great intelligence and vast learning Febvre wrote with Gallic flair His style is informal often witty at times combative and colorful almost to a fault His idiosyncrasies of syntax and vocabulary have defeated many who have tried to read let alone translate the French text Beatrice Gottlieb has succeeded in rendering his prose accurately and readably conveying a sense of Febvre's strong often argumentative personality as well as his brilliantly intuitive feeling for Renaissance France **Dominus**

Mundi Pier Giuseppe Monateri, 2018-09-06 This monograph makes a seminal contribution to existing literature on the importance of Roman law in the development of political thought in Europe In particular it examines the expression *dominus mundi* following it through the texts of the medieval jurists the Glossators and Post Glossators up to the political thought of Hobbes Understanding the concept of *dominus mundi* sheds light on how medieval jurists understood ownership of individual

things it is more complex than it might seem and this book investigates these complexities The book also offers important new insights into Thomas Hobbes especially with regard to the end of dominus mundi and the replacement by Leviathan Finally the book has important relevance for contemporary political theory With fading of political diversity Monateri argues that the actual setting of globalisation represents the reappearance of the Ghost of the Dominus Mundi a political refoul repressed a reappearance of its sublime nature and a struggle to restore its universal legitimacy and take its place In making this argument the book adds an important original vision to current debates in legal and political philosophy

Women, Imagination and the Search for Truth in Early Modern France Rebecca M. Wilkin, 2016-12-05 Grounded in medical juridical and philosophical texts of sixteenth and seventeenth century France this innovative study tells the story of how the idea of woman contributed to the emergence of modern science Rebecca Wilkin focuses on the contradictory representations of women from roughly the middle of the sixteenth century to the middle of the seventeenth and depicts this period as one filled with epistemological anxiety and experimentation She shows how skeptics including Montaigne Marie de Gournay and Agrippa von Nettesheim subverted gender hierarchies and or blurred gender difference as a means of questioning the human capacity to find truth while positivists who strove to establish new standards of truth for example Johann Weyer Jean Bodin and Guillaume du Vair excluded women from the search for truth The book constitutes a reevaluation of the legacy of Cartesianism for women as Wilkin argues that Descartes opening of the search for truth even to women was part of his appropriation of skeptical arguments This book challenges scholars to revise deeply held notions regarding the place of women in the early modern search for truth their role in the development of rational thought and the way in which intellectuals of the period dealt with the emergence of an influential female public

The Inquisitor in the Hat Shop Federico Barbierato, 2016-03-03 Early modern Venice was an exceptional city Located at the intersection of trade routes and cultural borders it teemed with visitors traders refugees and intellectuals It is perhaps unsurprising then that such a city should foster groups and individuals of unorthodox beliefs whose views and life styles would bring them into conflict with the secular and religious authorities Drawing on a vast store of primary sources particularly those of the Inquisition this book recreates the social fabric of Venice between 1640 and 1740 It brings back to life a wealth of minor figures who inhabited the city and fostered ideas of dissent unbelief and atheism in the teeth of the Counter Reformation The book vividly paints a scene filled with craftsmen friars and priests booksellers apothecaries and barbers bustling about the city spaces of sociability between coffee houses and workshops apothecaries and barbers shops from the pulpit and drawing rooms or simply publicly speaking about their ideas To give depth to the cases identified the author overlays a number of contextual themes such as the survival of Protestant or

crypto Protestant doctrines the political situation at any given time and the networks of dissenting groups that flourished within the city such as the free metaphysicists who gathered in the premises of the latter Bortolo Zorzi In so doing this rich and thought provoking book provides a systematic overview of how Venetian ecclesiastical institutions dealt with the sheer diffusion of heterodox and atheistical ideas at different social levels It will be of interest not only to scholars of Venice but all those with an interest in the intellectual cultural and religious history of early modern Europe

Radical Ideas and the Crisis of Christianity in England, 1640-1740 Katherine A East,Alex W Barber,2024-08-20 Examines the evolving relationship between Church and State the character of radical thought in Enlightenment England and the nature of that Enlightenment itself A tribute to the work of the late Justin Champion this volume explores the radical religious and political ideas of seventeenth and eighteenth century England which were at the heart of Champion s intellectual contributions Drawing on the debates and upheavals that dominated the period from the British Civil Wars to the mid eighteenth century the essays in this collection interrogate the challenging relationship between politics and religion which prompted what Champion called a Crisis of Christianity Diverse perspectives on that crisis are reconstructed encompassing the experiences of republicans and radicals philosophers and historians atheists and clergymen Through these individuals a complex discourse which defies easy categorisation is recovered but which speaks to central discussions concerning the evolving relationship between Church and State the character of radical thought in Enlightenment England and indeed the nature of that Enlightenment itself

This book s essays seek to cleanse comparative law of some of the epistemic detritus it has been collecting and that has been cluttering its theory and practice to the point where this flotsam has effectively stultified good comparison While a critique would pursue adjustments to the prevailing model this text s negative critique seeks a much more radical refurbishment as it utters an emphatic no to the governing epistemology it pursues in effect a deposition and a disposition of the leading epistemic configuration and the various assumptions regarding the acquisition of knowledge about foreign law that inform it Negative comparative law thus operates at a primordial level inasmuch as it concerns the matter of justice it aims to do justice to foreign law as foreignness finds itself appropriated and travestied by comparatists for ideological purposes In the process negative critique purports significantly to enhance comparative law s institutional intellectual and ethical respectability This book will benefit all law teachers and postgraduate law students interested in the workings of law on the international scene whether specialists in comparative law public international law private international law transnational law or foreign relations law in particular individuals bringing to bear a critical inclination to their subject matter
