Intellectual Agent, Mediator and Interlocutor Toyin Falola, Emmanuel M. Mbah, 2014-06-19 Encompassing the time period from the colonial era to the present day this book critically examines the changing nature of African politics and the factors that underpin such changes We argue in the volume that many of the problems that plague contemporary politics ethnicity governance conflict bad economic policies the absence of dialogue and other social issues have their roots in the fifteen years after the Second World War just prior to independence 1945 1960 Because these issues had been grossly mismanaged by the colonial enterprise those fifteen years could arguably be characterized as the incubation period for the dysfunction that has stymied African politics since independence For it was during these transitional years that African leaders learned how not to speak to each other How to introduce meaningful dialogue to address issues between and among Africans is where the transition in African politics stands today The approach used here is interdisciplinary giving the book a wider appeal to those interested in

history political science peace and conflict studies international relations and many disciplines Additionally the topics covered are so important and intellectual and have been penned by an A team of African scholars that other scholars students and professionals can use the volume as a reference text Therefore college students both undergraduate and graduate college instructors researchers policy makers and the development community working to stabilize Africa will find the book to be of immense importance Furthermore this volume will serve as a guide for advocates for the development community on how to address the numerous problems affecting the continent as well as the correct approach to boosting public awareness about contemporary African issues

Women, Gender and the Legacy of Slavery and Indenture

Farzana Gounder, Kalpana Hiralal, Amba Pande, Maurits S. Hassankhan, 2020-11-01 The age of imperialism ushered in a new phenomenon of large scale organized migration of labourers through the systems of slavery and indenture which were devised to feed the colonial political economy Another feature of such migrations was that it led to the permanent settlement of the uprooted African and Asian labourers in the new lands These developments in the long run intertwined the histories of the ruler and the ruled the so called civilized and the uncivilized along with the people from various continents thus giving rise to plural societies The narratives however remained dominated by the colonial legacies and frames of reference Today such historical colonial narratives are being challenged and clarified through multi disciplinary academic engagements The authors in this volume take gender as a prominent analytical category and raise new questions and understandings in the way we conceptualize document and write about gendered migrations in the diaspora Please note Taylor Francis does not sell or distribute the Hardback in India Pakistan Nepal Bhutan Bangladesh and Sri Lanka

Race and

the Obama Phenomenon G. Reginald Daniel, Hettie V. Williams, 2014-07-17 The concept of a more perfect union remains a constant theme in the political rhetoric of Barack Obama From his now historic race speech to his second victory speech delivered on November 7 2012 that striving is evident Tonight more than two hundred years after a former colony won the right to determine its own destiny the task of perfecting our union moves forward stated the forty fourth president of the United States upon securing a second term in office after a hard fought political contest Obama borrows this rhetoric from the founding documents of the United States set forth in the US Constitution and in Abraham Lincoln s Gettysburg Address How naive or realistic is Obama s vision of a more perfect American union that brings together people across racial class and political lines How can this vision of a more inclusive America be realized in a society that remains racist at its core These essays seek answers to these complicated questions by examining the 2008 and 2012 elections as well as the events of President Obama s first term Written by preeminent race scholars from multiple disciplines the volume brings together competing perspectives on race gender and the historic significance of Obama s election and reelection The president heralded in his November 2012 acceptance speech The idea that if you re willing to work hard it doesn t matter who you are or where you come from or what you look like whether you re black or white Hispanic or Asian or Native American These essayists argue the truth of that statement and assess whether America has made any progress toward that vision

Representations and Renegotiations of the Nation in Anglophone Cameroonian Literature Priscillia M. Manjoh, 2018 Guided by postcolonial theory and the ideas of some Western and African philosophers this study s in depth analysis of the novels of three Anglophone Cameroonian authors addresses the question of how principles of nation formation and nationalism are influenced by both colonialism and pre colonial in situ constituents The analysis focuses on how nations represented in the imaginary worlds constructed by the novelists are dominated by aspects such as ethnicity corruption authoritarianism nepotism solidarity and communitarianism which marginalize the masses leaving them in misery and abject poverty Tracing the historical settings of the novels from 1948 till present day the study delineates the writers representation of the Anglophones of Cameroon as being marginalized as well as suffering from self marginalization and also demonstrates how postcolonial misery in Africa is not caused solely by colonialism but by several other aspects This study reads the works of these Anglophone novelists not only as representing aspects in a nation but as tools of renegotiating a better society and a way forward for this nation

China's Early Mosques Nancy Shatzman Steinhardt, 2019-08-07 What happens when a monotheistic foreign religion needs a space in which to worship in China a civilisation with a building tradition that has been largely unchanged for several millennia The story of this extraordinary convergence begins in the 7th century and continues under the Chinese rule of Song and Ming and the non Chinese rule of the Mongols and Manchus each with a different political and religious agenda The author shows that mosques and ultimately Islam have survived in China because the Chinese architectural system though often unchanging is adaptable it can accommodate the religious requirements of
