Cilluffo, 2000 *National Emerging Infectious Diseases Laboratories*, 2005 **Environmental Change and Security Project Report**, 2002 *White Paper*, 2003 *The Proliferation Security Initiative as a New Paradigm for Peace and Security* Mark R. Shulman, 2006 The author examines the Proliferation Security Initiative a multinational activity launched in 2003 to enable the United States and like minded countries to interdict the flow of weapons of mass destruction WMD This Initiative also may bring dramatic changes the international security system by enabling concerned states to interdict international trade in WMD regardless of the location or nationality of their owners As such the Proliferation Security Initiative not only addresses one of the most urgent threats to peace and security that the world has ever witnessed but it does so in an innovative way that has the potential to change the basic paradigm of peace and security by legitimizing the proportional and discriminating use of force to prevent a great harm The author argues that the Initiative can be most successful by building broad support through increased transparency and a greater willingness to address forth rightly the legal challenges that it faces **Responding to Homeland Threats** United States. Failed States and the Origins of Violence Tiffiany Howard,2016-04-15 What makes a terrorist Is an individual inherently predisposed to be attracted to political violence or does exposure to a certain environment desensitize them in such a way that violence represents a viable mode for addressing political grievances Identifying state failure as the impetus for political violence this book addresses these questions and focuses on why existing extremist groups find failed states so attractive Utilizing global barometer data Tiffiany Howard examines the underpinnings of individual support for political violence and argues that an insidious pattern of deprivation within failed states drives ordinary citizens to engage in and support extreme acts of political violence A rigorous examination of four regions plagued by a combination of failed states and political violence Sub Saharan Africa The Middle East and North Africa Southeast and South Asia and Latin America this text draws parallels to arrive at a single conclusion that failed states are a natural breeding ground for terrorism and political violence

Protecting the American Homeland Michael E. O'Hanlon,Peter R. Orszag,Ivo H. Daalder,2011-10-25 A good deal has been done to improve the safety of Americans on their own soil since the attacks of September 11 2001 Yet there have been numerous setbacks The Bush administration and Congress wasted at least six months in 2002 due to partisan disagreement over a new budget for homeland security and as one consequence resources were slow to reach first responders across the country Most improvements in homeland security have focused on refighting the last war improving defenses against attacks similar to those the country has already suffered Not enough has been done to anticipate possible new kinds of terrorist actions Policymakers have also focused too much attention on the creation of a department of homeland security rather than identifying and addressing the kinds of threats to which the country remains vulnerable While the creation of a cabinet level agency focusing on homeland security may have merit the authors of this study argue that the department will not in and of itself make Americans safer To the contrary the complexity of merging so many disparate agencies threatens to distract Congress and the administration from other more urgent security efforts This second edition of *Protecting the American Homeland* urges policymakers to focus on filling key gaps that remain in the current homeland security effort identifying better protection for private infrastructure using information technology to share intelligence and more effectively connect the dots that could hold hints to possible terrorist tactics expanding the capacities of the Coast Guard and Customs Service as well as airline transportation security dealing with the possible threat

of surface to air missiles to airliners and encouraging better coordination among intelligence agencies While acknowledging the impossibility of preventing every possible type of terrorist violence the authors recommend a more systematic approach to homeland security that focuses

The Tragedy of Failure Tiffany O. Howard, 2010-04-21 This intriguing approach to international conflict seeks to facilitate a dialogue between academics and policymakers on how to better anticipate and prevent state failure subsequent forced migration and the terrorist threat that often results Despite the far reaching implications of state failure little research has been devoted to its consequences Postulating that failed and failing states enable the existence of terrorist organizations The Tragedy of Failure Evaluating State Failure and Its Impact on the Spread of Refugees Terrorism and War bridges that gap Both descriptive and prescriptive the book offers a nuanced examination of the relationship between forced migration state failure and terrorism The author suggests policy strategies that are capable of anticipating the onset of forced migration situations before they develop into crises and presents quantitative forecasting models with the ability to predict the occurrence of state failure and forced migration as much as two years in advance Buoyed by this work and the tools it offers policymakers can focus more closely on the issue of failed states and the movement of refugees and internally displaced persons in the interest of targeting and eliminating dangerous terrorist organizations

Homeland Security John Parachini, Lynn Etheridge Davis, Timothy Liston, 2003 Presents recent recommendations from various commissions and think tanks regarding U S homeland security policy

Terrorism Diana Miller, 2002 This book presents articles analyses and Congressional testimony which has been carefully edited excerpted and indexed with regard to actual and potential terrorist attacks Excerpts are also presented from reports issued well before 11 September 2001 which predicted the country's vulnerability and which were promptly buried in the graveyard of unread and unacted upon reports Questions are raised whether the dozens of federal agencies charged with aspects of homeland security can ever be coordinated by anyone without seriously reshuffling various government agencies which may turn out to be more difficult than eliminating terrorism
