Geltzer, 2009-09-10 This book examines the communicative aspects and implications of US counter terrorist policies towards al Qaeda Recent US counter terrorist strategy has been largely based upon projecting certain perceptions of America as an actor to those drawn to al Qaeda and this book investigates in what ways and to what extent US officials believed that the signals sent by what America did and said could influence the behaviour of the terrorist and would be terrorist The study then draws on a growing understanding of that audience to analyse how those drawn to al Qaeda were and indeed still are likely to be influenced by the perceptions of America that Washington s policies generated The study s central argument is that given al Qaeda s unconventional strategy and the particularities of the world view characterising those drawn to the group America s counter terrorist signalling proved largely counter productive to America s objective of undermining al Qaeda s strategic narrative instead serving in many ways to validate it Firstly this book seeks to reveal the significant and largely unexplored role that signalling has played in US counter terrorist policy towards al Qaeda Second it tries to capture the objectives strategy tactics ideology and other defining features of the world view characterising those drawn to al Qaeda Third it strives to combine those two lines of inquiry by applying the al Qaeda world view to a critical analysis of the signals sent by US policies Finally the book aims to offer broad policy implications that demonstrate how an informed understanding of the world view of those drawn to al Qaeda can be employed to revise and refine American counter terrorist signalling This book will be of much interest to students of US foreign policy and public diplomacy counter terrorism strategy and international security Joshua Alexander Geltzer has a PhD in War Studies from Kings College London and is currently a juris doctoral student at Yale Law School
