What most businesspeople don't know and what is crucial if they are to succeed in their transactions with India is what India needs from them and not always is this mere capital. Bullis describes the rise of India's middle class and consumer economy since 1991 and provides readers with what very few outsiders know how India really works. The result is an essential resource for corporate management in marketing sales strategic planning and investment and important collateral reading for students and teachers of international business. Bullis argues that India has long been misunderstood by the West. Now as the business climate goes global India looms as the largest country in the world to embrace the market economy. As India emerges as a mass consumer market and a major low cost manufacturing center not only the Indian economy but the world economy is likely to be changed. If overseas businesspeople are to enter India and compete successfully they need a clear broad up to the minute and useful view of the country its markets its resources and its people.
