Government Transparency Gregory Porumbescu, Albert Meijer, Stephan Grimmelijsen, 2022-07-07 This Element argues that to understand why transparency works in one context but fails in another we have to take into account how institutional macro organizational meso contexts interact with individual behavior micro A review of research from each of these perspectives shows that the big promises thought to accompany greater transparency during the first two decades of the 20th century have not been delivered For example transparency does not necessarily lead to better government performance and more trust in government At the same time transparency is still a hallmark of democratic governance and as this book highlights for instance transparency has been relatively successful in combating government corruption Finally by explicitly taking a multilayered perspective into account this Element develops new paths for future research
