Manual of Molecular and Clinical Laboratory Immunology Barbara Detrick, John L. Schmitz, Robert G. Hamilton, 2020-07-16 THE authoritative guide for clinical laboratory immunology

For over 40 years the Manual of Molecular and Clinical Laboratory Immunology has served as the premier guide for the clinical immunology laboratory From basic serology testing to the present wide range of molecular analyses the Manual has reflected the exponential growth in the field of immunology over the past decades This eighth edition reflects the latest advances and developments in the diagnosis and treatment of patients with infectious and immune mediated disorders The Manual features detailed descriptions of general and specific methodologies placing special focus on the interpretation of laboratory findings and covers the immunology of infectious diseases including specific pathogens as well as the full range of autoimmune and immunodeficiency diseases cancer and transplantation Written to guide the laboratory director the Manual will also appeal to other laboratory scientists especially those working in clinical immunology laboratories and pathologists It is also a useful reference for physicians mid level providers medical students and allied health students with an interest in the role that immunology plays in the clinical laboratory

The Obstetric Hematology Manual Sue Pavord, Beverley Hunt, 2010-04-15 Obstetric hematology is a fast growing area of medicine covering the diagnosis and management of hematological problems of pregnancy Comprehensive in approach The Obstetric Hematology Manual addresses the many hematological conditions that can cause serious problems in pregnancy delivery and the post partum period for both mother and baby Written by a team of international authorities this text provides up to date evidence based guidelines on best care

as well as sound advice based on the experience and opinion of experts Where appropriate basic principles are discussed to clarify the rationale for management and systems and procedures for disease prevention are highlighted Many conditions and cases are discussed including venous thromboembolism pre eclampsia anemia thrombocytopenia and inherited disorders This book will appeal to both trainees and practitioners in obstetrics obstetric medicine obstetric anesthesia and hematology It is also an accessible text for midwives nurses and laboratory staff *Mergent International Manual* ,2002 *Manual of Cardiovascular Disease in Women* Angela H.E.M. Maas,Eva Gerdts,2024-09-27 This manual defines sex and gender differences in cardiovascular disease and how they have become an important topic within most subspecialties in the field of cardiology It is now evident that sex differences in biology and lifestyle influence the pathophysiology of heart disease Consequently risk factors for cardiac disease are modified by sex and gender and women and men develop partly different variants of the same heart diseases These facts profoundly influence prevention and management in clinical practice Good medical practice demands a more tailored and personal care for each individual patient In addition the life course of women has a few unique phases related to hormonal changes in pregnancy and after menopause that also interact with individual risk and the development of co morbidities As heart disease is now the number one cause of death in women worldwide a more specific attention to cardiovascular disease in women is justified Most important advances in gender specific knowledge are related to ischemic heart disease and its traditional and sex specific risk factors Diagnostic pathways have changed coronary angiography is no longer the gold standard that it used to be Recent guidelines and position papers have paid attention to these new insights whereas educational programs urgently need to be adapted The ongoing paradigm shift in cardiology needs to be updated for the clinician in an easy and accessible manner Other important topics in which sex and gender differences have been elaborated are heart failure atrial fibrillation aortic valve disease and its treatment cardiac rehabilitation co morbidities cardiotoxicity in cancer treatment and neurology In addition female specific risk factors and socio economic factors are relevant to women s cardiovascular health We will invite the best EU experts in this field to contribute to the various chapters Manual of Cardiovascular Disease in Women has an educational role for established cardiologists and vascular specialists in training nurses and other allied professionals It represents an update on the most recent insights in sex and gender differences in cardiovascular health with a focus on women s cardiovascular diseases Additional questions via app Download the Springer Nature Flashcards app for free and use exclusive additional material to test your knowledge **The SAGES Manual of Metabolic and Bariatric Surgery** Omar M. Ghanem,Farah Husain,Judy Y. Chen,Robert B. Lim,Matthew Kroh,2024-12-26 Obesity is an epidemic more than 40% of the United States population suffers from obesity and as such it has a high burden of weight related conditions and diseases Metabolic and bariatric surgery has proven to be the most effective and durable treatment of severe obesity Technological advances including applications of laparoscopy robotics and endoluminal techniques have rapidly advanced this field Data and outcomes examining treatments

have also improved and as providers we have a wide spectrum of therapeutic options to treat patients As techniques and outcomes change rapidly access to a comprehensive yet focused resource regarding bariatric surgery is currently limited The third edition of this manual is designed to present a comprehensive and state of the art approach to the current and future status of metabolic and bariatric surgery Sections will address the evolution in specific treatments available to patients initial evaluation and selection of procedures for individual patients the latest surgical and endoscopic techniques being employed to treat patients including data on outcomes and future directions for therapy In particular and unique amongst references a major focus of this text will be on both the bariatric and metabolic bases of therapies and outcomes

Gynecology for Developing Countries Friday Okonofua, Joseph A. Balogun, Kunle Odunsi, Victor N. Chilaka, 2021-08-05 This book is a comprehensive and easy to read guide to obstetrics and gynecology in developing countries. Although significant progress has been made towards the reduction of maternal mortality and morbidity globally they are still unacceptably high in developing countries. This can be directly or indirectly tied to poor quality maternal health care and lack of access to cost effective comprehensive healthcare. Health practitioners in developing countries also contend with trying to keep abreast of recent developments in obstetrics and gynecology while dealing with lack of time resources and access to relevant information. This textbook was thus created by experts in obstetrics and gynecology with extensive experience in African clinical settings and consultants in developed countries to teach proper and accurate diagnosis treatment and management of gynecologic and obstetric health issues within the context of developing countries. This second edition has been fully updated throughout with an added 25 chapters that cover topics such as reproductive health, gynecological cancers and research methods. The book is divided into six sections: Women's Reproductive Health, Obstetrics, Medical and Surgical Disorders in Pregnancy, General Gynecology, Gynecological Malignancies, Health Systems Organization, Research Methodology and Biostatistics. These section topics have been carefully covered by expert authors with the use of valid scientific data, policy instruments and adapted to the cultural and social context of developing countries with particular in-depth coverage of conditions that have greater prevalence and incidence in developing countries. Each chapter also focuses on filling gaps in knowledge with a distinct pedagogical approach starting with a set of learning objectives and ending with key takeaways for the chapter. This is an ideal guide for residents, medical students, practitioners of obstetrics and gynecology, midwives, general practitioners and pediatricians particularly those working in developing countries.

Building Babies

Kathryn B.H. Clancy, Katie Hinde, Julianne N. Rutherford, 2012-08-27 The ontogeny of each individual contributes to the physical, physiological, cognitive, neurobiological and behavioral capacity to manage the complex social relationships and diverse foraging tasks that characterize the primate order. For these reasons, *Building Babies* explores the dynamic, multigenerational processes of primate development. The book is organized thematically along the developmental trajectory: conception, pregnancy, lactation, the mother-infant dyad, broader social relationships and transitions to independence. In this volume, the authors showcase the myriad approaches to understanding primate developmental trajectories from both proximate and ultimate perspectives. These collected chapters provide insights from experimental manipulations in captive settings to long term observations of wild living populations and consider levels of analysis from molecule to organism to social group to taxon. *Strepsirrhines*, New World monkeys, Old World monkeys, apes and humans are all well represented. Contributions by anthropologists, microbiologists, psychologists, population geneticists and other primate experts provide *Building Babies* a uniquely diverse voice. *Building Babies* features multi- and trans-disciplinary research approaches to primate developmental trajectories and is particularly useful for researchers and instructors in anthropology, animal behavior,

psychology and evolutionary biology This book also serves as a supplement to upper level undergraduate courses or graduate seminars on primate life history and development In these contexts the book provides exposure to a wide range of methodological and theoretical perspectives on developmental trajectories and models how researchers might productively integrate such approaches into their own work

Tourism and Responsibility Martin Mowforth, Clive Charlton, Ian Munt, 2008 This book discusses the responsibility or otherwise of tourism activities in Latin America and the Caribbean It considers issues such as the reduction of poverty through tourism and the conflict between increasing volumes of air travel spent in our continuing search for pleasure and the resulting contribution to global warming The authors believe that tourism can only be adequately assessed through a consideration of how it fits into the structure of power It is also argued that tourism cannot be analyzed without a consideration of its impacts on and links with development This relationship between tourism responsibility power and development is explored in chapters covering both the macro and the micro level of responsibility The authors look at methods of practising tourism responsibly or irresponsibly at the personal company national and international levels The questions and dilemmas of placing responsibility in the tourism industry are examined throughout Widely illustrating all these themes and issues with examples and case studies from throughout the sub continent this book will be of importance to students and academics and to the work of practitioners of development and tourism related projects run by both governmental and non governmental aid and development agencies

Christian Interculture

Arun W. Jones, 2021-02-26 Despite the remarkable growth of Christianity in Africa Asia and Latin America in the twentieth century there is a dearth of primary material produced by these Christians This volume explores the problem of writing the history of indigenous Christian communities in the Global South Many such indigenous Christian groups pass along knowledge orally and colonial forces have often not deemed their ideas and activities worth preserving In some instances documentation from these communities has been destroyed by people or nature Highlighting the creative solutions that historians have found to this problem the essays in this volume detail the strategies employed in discerning the perspectives ideas activities motives and agency of indigenous Christians The contributors approach the problem on a case by case basis acknowledging the impact of diverse geographical cultural political and ecclesiastical factors This volume will inspire historians of World Christianity to critically interrogate and imaginatively use existing Western and indigenous documentary material in writing the history of Christianity in Asia Africa the Americas and Oceania In addition to the editor the contributors to this volume include J J Carney Adrian Hermann Paul Kollman Kenneth Mills Esther Mombo Mrinalini Sebastian Christopher Vecsey Haruko Nawata Ward and Yanna Yannakakis
