based products in food systems in which the role of nutritional and techno functional properties is described Handbook of Food Enzymology John R. Whitaker, Alphons G. J. Voragen, Dominic W.S. Wong, 2002-12-05 Discussing methods of enzyme purification characterization isolation and identification this book details the chemistry behavior and physicochemical properties of enzymes to control enhance or inhibit enzymatic activity for improved taste texture shelf life nutritional value and process tolerance of foods and food products The book covers **Chemical and Functional Properties of Food Proteins** Zdzislaw E. Sikorski, 2001-06-22 Chemical and Functional Properties of Food Proteins presents the current state of knowledge on the content of proteins in food structures the chemical functional and nutritive properties of food proteins the chemical and biochemical modification of proteins in foods during storage and processing and the mutagenicity and carcinogenicity of nitrogenous compounds It emphasizes the structure function relationship as well as the effects of practical conditions applied in food processing on the biochemical and chemical reactions in food proteins and food product quality The first ten chapters discuss structure function relationships methods of analysis of nitrogenous compounds chemical and enzymatic modifications nutritive roles and mutagenicity and carcinogenicity of food proteins The following six chapters describe the proteins of meat and fish milk eggs cereals legumes oilseeds and single cell organisms and present detailed information on the effects of conditions applied in storage and processing on the reactions in proteins and their impact on quality attributes of food products **Protein Structure-Function Relationships in Foods** Rickey Y. Yada, R.L. Jackman, 2012-12-06 Food proteins constitute a diverse and complex collection of biological macro molecules Although contributing to the nutritional quality of the foods we consume proteins also act as integral components by virtue of their diverse functional properties The expression of these functional properties during the preparation processing and storage of foods is largely dictated by changes to the structure or structure related properties of the proteins involved Therefore germane to the optimal use of existing and future food protein sources is a thorough understanding of the nature of the relationships between structure and function It is the goal of this book to aid in better defining these relationships Two distinct sections are apparent firstly those chapters which address structure function relationships using a variety of food systems as examples to demonstrate the intricacies of this relationship and secondly those chapters which discuss techniques used to either examine structural parameters or aid in establishing quantitative relationships between protein structure and function The editors would like to thank all contributors for their assistance co operation and above all their patience in putting this volume together and the following companies organizations for their financial support without which it would not have been the success it was Ault Foods Limited Best Foods Canada Limited Natural Sciences and Engineering Research Council of Canada Ontario Ministry of Agriculture and Food Quest International Canada Inc and University of Guelph R Y Y R LJ **Surface Activity of Proteins** Shlomo Magdassi, 1996-08-16 Offers discussions on the chemical and physicochemical modification of proteins for the enhancement of surface activity and functional properties in a variety of systems The volume
