Germany Pacifism And Peace Enforcement Europe In Change:

Germany, pacifism and peace enforcement Anja Dalgaard-Nielsen, 2013-07-19 Germany pacifism and peace enforcement is about the transformation of Germany's security and defence policy in the time between the 1991 Gulf War and the 2003 war against Iraq. The book traces and explains the reaction of Europe's biggest and potentially most powerful country to the ethnic wars of the 1990s, the emergence of large scale terrorism and the new US emphasis on pre-emptive strikes. Based on an analysis of Germany's strategic culture, it portrays Germany as a security actor and indicates the conditions and limits of the new German willingness to participate in international military crisis management that developed over the 1990s. It debates the implications of Germany's transformation for Germany's partners and neighbours and explains why Germany said yes to the war in Afghanistan but no to the Iraq War.

European Defence Cooperation in EU Law and IR Theory T. Dyson, Theodore Konstadinides, 2013-05-07 This book offers a novel contribution to the study of post Cold War European defence. Interdisciplinary in approach, it uses European law to assess the utility of existing theoretical accounts. By exploring the balance of threat theory, it provides new insights into the forces driving and hindering European defence cooperation.

Security, Strategy and Military Change in the 21st Century Jo Inge Bekkevold, Ian Bowers, Michael Raska, 2015-05-22 This edited volume explores and analyses strategic thinking, military reform and adaptation in an era of Asian growth, European austerity and US rebalancing. A significant shift in policy, strategy and military affairs is underway in both Asia and Europe, with the former gaining increasing prominence in the domain of global security. At the same time, the world's powers are now faced with an array of diverse challenges. The resurgence of great power politics in both Europe and Asia, along with the long-term threats of terrorism, piracy and sustained geopolitical instability, has placed great strain on militaries and security institutions operating with constrained budgets and wary public support. The volume covers a wide range of case studies, including the transformation of China's military in the 21st century, the internal and external challenges facing India, Russia's military modernization program and the USA's reassessment of its strategic interests. In doing so, the book provides the reader with the opportunity to conceptualize how strategic thinking, military reform, operational adaptation

and technological integration have interacted with the challenges outlined above With contributions by leading scholars and practitioners from Europe and Asia this book provides a valuable contribution to the understanding of strategic and operational thinking and adjustment across the world This book will be of much interest to students of military and strategic studies security studies defence studies Asian politics Russian politics US foreign policy and IR in general *The transatlantic divide* Osvaldo Croci, Amy Verdun, 2024-07-30 This book available in paperback for the first time examines the period between the military intervention against Serbia by NATO and the one in Iraq by the US It has been a particularly turbulent one for transatlantic security relations Is the malaise currently affecting the Transatlantic Alliance more serious than ever before and if so why Will differences in the assessment of how to provide order and stability in the international system as well as in the evaluation of threats and how to respond to them mark the end of the Transatlantic Alliance Or will the US NATO the EU and EU member states work together using different instruments and accepting a degree of division of labour to pacify stabilise and rebuild troublesome areas as they have done in South Eastern Europe This book with contributions from leading American Canadian and European scholars analyses the reasons behind the latest crisis of the Transatlantic Alliance and dissects its manifestations **European Integration Since the 1920s** Mark

Hewitson, 2024-10-14 Brexit populism and Euroscepticism seem to have challenged old assumptions about European integration and raised the prospect of disintegration This book re-examines why the European Union and its forerunners were created and investigates how and why they have changed It links contemporary events to historical explanation arguing that there were long term sets of conditions dating back to the 1920s which pushed European governments to cooperate economically and to try to resolve their diplomatic differences The failure of the French and German governments to create what Aristide Briand had called a European federal union demonstrated both the precariousness of the enterprise and its connection to the domestic politics of European states After 1945 the unexpected advent of a Cold War and the military diplomatic and economic presence of the United States in Europe facilitated the gradual development of habits of cooperation and institutional integration but they also placed limits on European governments activities as did disagreements between political parties and the expectations of citizens As a consequence supranational bodies such as the European Commission have been accompanied and often overshadowed by intergovernmental institutions such as the European Council with the EU as a whole functioning in important respects as a type of confederation The volume addresses a series of large scale historical questions which are integral to an understanding of the European Union It asks how and why citizens of member states have identified with the EU how matters of security affected the development of the European Community during and after the Cold War whether economic and social convergence have taken place and with what consequences and why European institutions have come to function as they have The study is thematic focusing on the most important aspects of European integration and explaining why member states have decided to carry out or have consented to the unique

experiment of the European Union Inclusion, exclusion and the governance of European security Mark Webber, 2013-07-19 How inclusive are NATO and the EU The enlargement of both organisations seems to give some substance to the vision of a Europe whole and free articulated at the Cold War's end Yet more recently enlargement's limits have increasingly come to be recognised bringing with it an important debate on the balance to be struck between inclusion and exclusion This book examines that sometimes awkward balance Its analytical starting point is the characterisation of much of Europe as a security community overlain by a system of security governance The boundary of this system is neither clear nor fixed but a dynamic of inclusion and exclusion can be said to exist by reference to its most concrete expression that of institutional enlargement On this basis the book offers an elaboration of the concept of security governance itself complemented by a historical survey of the Cold War and its end the post Cold War development of NATO and the EU and case studies of two important excluded states Russia and Turkey **The Europeanisation of Conflict Resolutions** Boyka Stefanova, 2013-07-19 This book is about the EU's role in conflict resolution and reconciliation in Europe Ever since it was implemented as a political project of the post World War II reality in Western Europe European integration has been credited with performing conflict resolution functions It allegedly transformed the long standing adversarial relationship between France and Germany into a strategic partnership Conflict in Western Europe became obsolete The end of the Cold War further reinforced its role as a regional peace project While these evolutionary dynamics are uncontested the deeper meaning of the process its transformative power is still to be elucidated How does European integration restore peace when its equilibrium is broken and conflict or the legacies of enmity persist This book sets out to do exactly that It explores the peace and conflict resolution role of European integration by testing its somewhat vague albeit well established macro political rationale of a peace project in the practical settings of conflicts The analytical lens of that of Europeanization The central argument of the book is that the evolution of the policy mix resources framing influences and political opportunities through which European integration affects conflicts and processes of conflict resolution demonstrates a historical trend through which the EU has become an indispensable factor of conflict resolution It begins with the pooling together of policy making at the European level for the management of particular sectors early integration in the European Coal and Steel Community through the functioning of core EU policies Northern Ireland to the challenges of enlargement Cyprus and the European perspective for the Western Balkans Kosovo The book will be of value to academics and non expert observers alike with an interest in European integration and peace studies Germany's New Security Demographics Wenke Apt, 2013-12-04 Military recruitment will become more difficult in times of demographic aging The question arises whether demographic change will constrain the capacity of aging states like Germany to conduct foreign policy and pursue their national security interests Since contemporary military operations still display a strong human element particular scrutiny is given to the empirical analysis of the determinants of military propensity and military service among youth An additional

human capital projection until 2030 illustrates how the decline in the youth population will interact with trends in educational attainment and adolescent health to further complicate military recruitment in the future A concluding review of recruiting practices in other NATO countries provides insight in best practice policy options to reduce the military's sensitivity to demographic change Following this approach the book gives prominence to a topic that has thus far been underrepresented in the greater discussion of demographic change today namely the demographic impact on international affairs and strategic calculations Strategic Cultural Change and the Challenge for Security Policy C. Hilpert, 2014-05-07 For more than a decade international troops have been deployed to Afghanistan Out of all NATO members this mission was the most difficult for Germany that had thus far never engaged in combat and offensive military activities This book analyses how Germany's experiences in Afghanistan have changed the country's strategic culture **EU foreign and security policy in Bosnia** Ana Juncos, 2015-11-01 This book represents the first ever comprehensive study of the EU's foreign and security policy in Bosnia Drawing on a wealth of fresh empirical material it demonstrates that institutions are a key variable in explaining levels of common foreign security policy CFSP coherence and effectiveness over time In doing so it also sheds new light on the role that intergovernmental bureaucratic and local political contestation have played in the formulation and implementation of a European foreign policy The study concludes that the EU's involvement in Bosnia has not only had a significant impact on this Balkan country in its path from stabilisation to integration but has also transformed the EU its foreign and security policy and shaped the development of the EU's international identity along the way The book will be of great interest to researchers and students of EU politics International Relations and Bosnian politics *Great Powers' Foreign Policy*, 2022-12-19 By comparing the great powers foreign policy this book investigates the global competition and revisionist attempts to dismantle the Western liberal order Since February 2022 the international system has been challenged by the Russian invasion in Ukraine and its profound multiple consequences Putin's War has reinvented the West But still this is not the end of history To illustrate that tensions between democratic and autocratic great powers are nowadays at their peak since the end of the Cold War one should consider President Biden's words in Warsaw referring to President Putin For God's sake this man cannot remain in power **The European Union and the accommodation of Basque difference in Spain** Angela Bourne, 2013-07-19 How does the European Union affect devolution and nationalist conflict in member states Does the EU reduce the scope of regional self government or enhance it Does it promote conflict or cooperation among territorial entities These are pressing questions in Spanish politics where devolution has been an important tool for managing nationalist disputes and for the Basque Country where protracted and sometimes violent nationalist conflicts persist Addressing these issues this book explores prospects for an autonomous Basque role in EU politics institutional arrangements for autonomous community participation in EU decision making Basque government alliances with other regions and the EU's supranational bodies EU incentives for collaboration among Basque and central

state authorities the impact of EU decisions on politically sensitive Basque competencies and the incidence of EU issues in nationalist disputes It presents a new theoretical framework for analysing the impact of the EU on regional power and will be of interest to students researchers and general observers of Basque Spanish and EU politics Green Tyranny Rupert Darwall,2017-10-03 Climate change was political long before Al Gore first started talking about it In the 1970s the Swedish Social Democrats used global warming to get political support for building a string of nuclear power stations It was the second phase of their war on coal which began with the acid rain scare and the first big UN environment conference in Stockholm in 1969 Acid rain swept all before it America held out for as long as Ronald Reagan was in the White House but capitulated under his successor Like global warming acid rain had the vocal support of the scientific establishment but the consensus science collapsed just as Congress was passing acid rain cap and trade legislation Rather than tell legislators and the nation the truth the EPA attacked a lead scientist and suppressed the federal report showing that the scientific case for action on curbing power station emissions was baseless Ostensibly neutral in the Cold War Sweden had a secret military alliance with Washington A hero of the international Left Sweden's Olof Palme used environmentalism to maintain a precarious balance between East and West Thus Stockholm was the conduit for the KGB inspired nuclear winter scare The bait was taken by Carl Sagan and leading scientists who tried to undermine Ronald Reagan's nuclear strategy and acted as propaganda tools to end the Cold War on Moscow's terms Nuclear energy was to have been the solution to global warming It didn't turn out that way most of all thanks to Germany Instead America and the world are following Germany's lead in embracing wind and solar German obsession with renewable energy originates deep within its culture Few know today that the Nazis were the first political party to champion wind power Hitler calling wind the energy of the future Post 1945 West Germany appeared normal but anti nuclear protests in the 1970s led to the fusion of extreme Left and Right and the birth of the Greens in 1980 Their rise changed Germany then Europe and now the world Radical environmentalism became mainstream It demands more than the rejection of the abundant hydrocarbon energy that fuels American greatness It requires the suppression of dissent **Habermas and European integration** Shivdeep Grewal,2018-09-30 From its conception to the referendum of 2005 where it met its end German philosopher Jürgen Habermas wrote in support of the European Constitution This is the first in depth account of his project Emphasis is placed on the conception of the European Union that informed his political prescriptions The book is divided into three parts The first considers the unfolding of social modernity at the level of the EU among the subjects covered are Habermas's concept of juridification the latter's affinities with integration theories such as neofunctionalism and the application of Habermas's democratic theory to the EU The second part addresses cultural modernity in Europe Europessimism is argued to be a subset of the broader cultural pessimism that has assailed the project of modernity in recent decades with renewed intensity in the wake of 9/11 The final section looks at the conceptual landscape of the Constitutional Convention The author's academia.edu page can be reached

Precision Strike Warfare and International Intervention Mike Aaronson, Wali Aslam, Tom Dyson, Regina Rauxloh, 2014-09-15 This book explores whether the new capabilities made possible by precision strike technologies are reshaping approaches to international intervention Since the end of the Cold War US technological superiority has led to a more proactive and some would argue high risk approach to international military intervention New technologies including the capacity to mount precision military strikes from high level bombing campaigns and more recently the selective targeting of individuals from unmanned aerial vehicles UAVs have facilitated air campaigns supported by Special Forces without the commitment of large numbers of troops on the ground Such campaigns include for example NATO's high level aerial bombardment of Milosevic's forces in Kosovo in 1999 and of Gaddafi's in Libya in 2011 and the US operation involving Special Forces against Osama Bin Laden The development of UAVs and electronic data intercept technologies has further expanded the potential scope of interventions for example against Islamic militants in the tribal areas of Pakistan This volume examines three key and interrelated dimensions of these new precision strike capabilities 1 the strategic and foreign policy drivers and consequences 2 the legal and moral implications of the new capabilities and 3 the implications for decision making at the strategic operational and tactical levels This book will be of much interest to students of war and technology air power international intervention security studies and IR

European Internal Security Christian Kaunert, 2018-07-30 European institutions are either loathed or underestimated This book analyses the role of EU institutions in the area of European internal security From Justice and Home Affairs this area has become more like a European Area of Freedom Security and Justice In this process the European Commission has demonstrably played the role of an engine of integration in areas such as counter terrorism policing asylum migration and border management This book uses the framework of supranational policy entrepreneurs SPE those who stand at the policy window in order to propose lobby for and sell their policy proposal and synthesises it with insights from the literature on norm entrepreneurship This book will be of great interest to scholars and practitioners interested in European internal security European integration terrorism security studies and international relations
