## **Getting Played African American Girls Urban Inequality And Gendered Violence:**

**Getting Played** Jody Miller, 2008-03 Sexual harassment sexual assault dating violence and even gang rape are not uncommon experiences for many African American girls living in poor urban neighborhoods In *Getting Played* Jody Miller presents a compelling picture of how inextricably linked such violence is to their daily lives Drawing from richly textured interviews with adolescent girls and boys Miller brings a keen eye to how urban neglect and gender inequality coalesce to structure girls risks for gendered violence Her analysis shows how young women struggle to navigate this dangerous terrain despite vastly inadequate social and institutional support Back cover **Twelve Weeks to Change a Life** Max A. Greenberg, 2019-01-08 Hailed as a means to transform cultural norms and change lives violence prevention programs signal a slow rolling policy revolution that has reached nearly two thirds of young people in the United States today Max A. Greenberg takes us inside the booming market for programming and onto the asphalt campuses of Los Angeles where these programs are implemented many just one hour a week for 12 weeks He spotlights how these ephemeral programs built on troves of risk data are disconnected from the lived experiences of the young people they were created to support Going beyond the narrow stories told about at risk youth through data and in policy Greenberg sketches a vivid portrait of young men and women coming of age and forming relationships in a world of abiding harm and fleeting fragmented support At the same time Greenberg maps the minefield of historical and structural inequalities that program facilitators must navigate to build meaningful connections with the youth they serve Taken together these programs shape the stories and politics of a generation and reveal how social policy can go wrong when it ignores the lives of young people [The Oxford Handbook of the Social Science of Poverty](#) David Brady, Linda M. Burton, 2016-03-23 Despite remarkable economic advances in many societies during the latter half of the twentieth century poverty remains a global issue of enduring concern Poverty is present in some form in every society in the world and has serious implications for everything from health and well being to identity and behavior Nevertheless the study of poverty has remained disconnected across disciplines [The Oxford Handbook of the Social Science of Poverty](#) builds a common scholarly ground in the study of poverty by bringing together an international inter disciplinary group of scholars to provide their perspectives on the issue Contributors engage in discussions about the leading theories and conceptual debates regarding poverty the most salient topics in poverty research and the far reaching consequences of poverty on the individual and societal level The volume incorporates many methodological perspectives including survey research ethnography and mixed methods approaches while the chapters extend beyond the United States to provide a truly global portrait of poverty A thorough examination of contemporary poverty this Handbook is a valuable tool for non profit practitioners policy makers social workers and students and scholars in the fields of public policy sociology political science international development anthropology and economics [The Praeger Handbook of Social Justice and Psychology](#) Chad V. Johnson, Harris L. Friedman, 2014-07-23 By introducing and explaining the intersection of two exciting

and important areas of study this landmark work unleashes their potential to address some of the most complex and globally relevant challenges of our time In this unique handbook experts team up to explain the many innovative ways psychology is being applied to promote social justice The wide ranging three volume work addresses such significant issues as social justice ideology and critical psychology war and trauma poverty and classism environmental justice and well being and suffering It showcases approaches for integrating social justice into psychology and it examines psychology s application of social justice within special populations such as sexual minorities youth women disabled persons prisoners older adults people of color and many others Chapter authors represent a diversity of perspectives making the handbook an ideal resource for those who want information on a specific concern as well as for those looking for an introduction to the subject as a whole Combining the practical with the theoretical the work provides culturally sensitive tools that can effectively combat injustices locally and globally

**Gender and Crime** Sandra L. Browning,Leah C. Butler,Cheryl Lero Jonson,2024-05-23 This volume takes stock of contemporary perspectives on gender and crime In 1975 Freda Adler published her pathbreaking book Sisters in Crime The Rise of the New Female Criminal She made the bold claim that changes in American society including changing attitudes and opportunities would allow for greater participation of women in criminal enterprises Beyond her substantive thesis which turned out to be partially accurate Adler opened up a vibrant new area within criminology the study of gender and crime Now nearly a half century later the field of criminology is replete with women scholars who are making plentiful and important contributions As a result this volume explores cutting edge issues Part I starts by laying out a theoretical foundation focusing on the origins of theories of female criminality and then providing an overview of more contemporary perspectives Part II explores the role of race in shaping women s criminality drawing on the novel approaches of Black Criminology and the study of intersectionality Part III gives attention to issues that heretofore

were male centric illuminating female desistance from crime the effects of peer groups and gender differences in attitudes toward criminal justice policies Finally Part IV considers the explanation of three important realms of criminality risky lifestyles white collar crime and terrorism This volume will be of interest to a wide range of criminologists and is an ideal choice for use in graduate seminars and upper level undergraduate courses South Asian American Stories of Self Tasneem Mandviwala, 2022-10-04 This book acknowledges and discusses the now politically infamous aspects of an American Muslim woman's life such as Islamophobia and hijab but it more importantly examines how women actually deal with these obstacles intentionally shifting the lens to capture a more holistic nuanced understanding of their human experiences This text is based on a three year long qualitative interdisciplinary cultural and developmental psychology and gender systems study It uniquely organizes risks protective factors and coping mechanisms according to developmental life stages from teenage to adulthood Results show how second generation Muslim American women's identities develop during adolescence 11-18 emerging adulthood 19-29 and adulthood 30-39 within multiple socio cultural contexts Discussions regarding Muslim Americans often erroneously equate Muslim with Arab or Middle Eastern By focusing on South Asian Muslim Americans this work bluntly discusses the overlaps of South Asian culture with Islam an important contribution to the field since the majority of immigrant Muslims in America are of South Asian descent This study adds nuance and detail to American Muslim girls and women's experiences while fighting misinformation and stereotypes It is a significant contribution to anthropological developmental psychology and cultural psychology The focus on a historically academically marginalized population is beneficial to students researchers and professionals in the field **Building a Black Criminology, Volume 24** James D. Unnever, Shaun L. Gabbidon, Cecilia Chouhy, 2018-10-26 In light of the Black Lives Matter movement and protests in many cities race plays an ever more salient role in crime and justice Within theoretical criminology however race has oddly remained on the periphery It is often introduced as a control variable in tests of theories and is rarely incorporated as a central construct in mainstream paradigms e.g. control social learning and strain theories When race is discussed the standard approach is to embrace the racial invariance thesis which argues that any racial differences in crime are due to African Americans being exposed to the same criminogenic risk factors as are Whites just more of them An alternative perspective has emerged that seeks to identify the unique racially specific conditions that only Blacks experience Within the United States these conditions are rooted in the historical racial oppression experienced by African Americans whose contemporary legacy includes concentrated disadvantage in segregated communities racial socialization by parents experiences with and perceptions of racial discrimination and disproportionate involvement in and unjust treatment by the criminal justice system Importantly racial invariance and race specificity are not mutually exclusive perspectives Evidence exists that Blacks and Whites commit crimes for both the same reasons invariance and for different reasons race specific A full understanding of race and crime thus must involve demarcating both the general and specific causes of crime the latter

embedded in what it means to be Black in the United States This volume seeks to explore these theoretical issues in a depth and breadth that is not common under one cover Again given the salience of race and crime this volume should be of interest to a wide range of criminologists and have the potential to be used in graduate seminars and upper level undergraduate courses

The Routledge Handbook of Qualitative Criminology Heith Copes, J. Mitchell Miller, 2015-03-02 Despite illustrious origins dating to the 1920s qualitative crime research has long been overshadowed by quantitative inquiry After decades of limited use there has been a notable resurgence in crime ethnography naturalistic inquiry and related forms of fieldwork addressing crime and related social control efforts The Routledge Handbook of Qualitative Criminology signals this momentum as the first major reference work dedicated to crime ethnography and related fieldwork orientations Synthesizing the foremost topics and issues in qualitative criminology into a single definitive work the Handbook provides a first look reference source for scholars and students alike The collection features twenty original chapters on leading qualitative crime research strategies the complexities of collecting and analyzing qualitative data and the ethical propriety of researching active criminals and incarcerated offenders Contributions from both established luminaries and talented emerging scholars highlight the traditions and emerging trends in qualitative criminology through authoritative overviews and lived experience examples Comprehensive and current The Routledge Handbook of Qualitative Criminology promises to be a sound reference source for academics students and practitioners as ethnography and fieldwork realize continued growth throughout the 21st Century

Stop Street Harassment Holly Kearl, 2010-08-03 Using groundbreaking studies news stories and interviews this book underscores that there will never be gender equity until men stop harassing women in public spaces and it details strategies for achieving this goal Street harassment is generally dismissed as harmless but in reality it causes women to feel unsafe in public at least sometimes To achieve true gender equality it must come to an end Stop Street Harassment Making Public Places Safe and Welcoming for Women draws on academic studies informal surveys news articles and interviews with activists to explore the practice s definition and prevalence the societal contexts in which it occurs and the role of factors such as race and sexual orientation Perhaps more crucially the book makes clear how women experience street harassment how they feel about and respond to it and the ways it negatively impacts lives But understanding is only a beginning In the second half of the book readers will find concrete strategies for dealing with street harassers and ways to become involved in working to end this all too common violation Educators counselors parents and other concerned individuals will discover resources for teaching about harassment and modeling behavior that will help prevent harassment incidents

**Intersectionality and Criminology** Hillary Potter, 2015-05-15 The use of intersectionality theory in the social sciences has proliferated in the past several years putting forward the argument that the interconnected identities of individuals and the way these identities are perceived and responded to by others must be a necessary part of any analysis Fundamentally intersectionality claims that not only are people s lived experiences affected by their racial identity and by their gender

identity but that these identities and others continually operate together and affect each other With official statistical data that indicate people of Color have higher offending and victimization rates than White people and with the overrepresentation of men and people of Color in the criminal legal system new theories are required that address these phenomena and that are devoid of stereotypical or debasing underpinnings Intersectionality and Criminology provides a comprehensive review of the need for and use of intersectionality in the study of crime criminality and the criminal legal system This is essential reading for academics and students researching and studying in the fields of crime criminal justice theoretical criminology and gender race and socioeconomic class
