Private Collecting, Exhibitions, and the Shaping of Art History in London Stacey J. Pierson, 2017-01-12 The Burlington Fine Arts Club was founded in London in 1866 as a gentlemen s club with a singular remit to exhibit members art collections Exhibitions were proposed organized and furnished by a group of prominent members of British society who included aristocrats artists bankers politicians and museum curators Exhibitions at their grand house in Mayfair brought many private collections and collectors to light using members social connections to draw upon the finest and most diverse objects available Through their unique mode of presentation which brought museum style display and interpretation to a grand domestic style gallery space they also brought two forms of curatorial and art historical practice together in one unusual setting enabling an unrestricted form of connoisseurship where new categories of art were defined and old ones expanded The history of this remarkable group of people has yet to be presented and is explored here for the first time Through a framework of exhibition themes ranging from Florentine painting to Ancient Egyptian art a study of lenders objects and their interpretation paints a picture of private collecting activities connoisseurship and art world practice that is surprisingly diverse and interconnected *The Digital Transformation of Labor* Anthony Larsson, Robin Teigland, 2019-11-11 Through a series of studies the overarching aim of this book is to investigate if and how the digitalization digital transformation process causes or may cause the autonomy of various labor functions and its impact in creating or stymieing various job opportunities on the labor market This book also seeks to illuminate what actors groups are mostly benefited by the digitalization digital transformation and which actors groups that are put at risk by it This book takes its point of departure from a 2016 OECD report that contends that the impact digitalization has on the future of labor is ambiguous as on the one hand it is suggested that technological change is labor saving but on the other hand it is suggested that digital

technologies have not created new jobs on a scale that it replaces old jobs Another 2018 OECD report indicated that digitalization and automation as such does not pose a real risk of destroying any significant number of jobs for the foreseeable future although tasks would by and large change significantly This would affect welfare as most of its revenue stems from taxation and particularly so from the taxation on labor directly or indirectly For this reason this book will set out to explore how the future technological and societal advancements impact labor conditions The book seeks to provide an innovative enriching and controversial take on how various aspects of the labor market can be and are affected the ongoing digitalization trend in a way that is not covered by extant literature As such this book intends to cater to a wider readership from a general audience and students to specialized professionals and academics wanting to gain a deeper understanding of the possible future developments of the labor market in light of an accelerating digitalization digital transformation of society at large

An Ethical Evaluation of Lethal Functions in Autoregulative Weapons Systems Nicole Kunkel, 2024-12-30 This book connects two of the most pressing ethical topics of our time questions of peace and technology materialized in so called autonomous weapons systems which can operate without human control and intervention in real time The author however criticizes the term autonomy as

too anthropomorphic and therefore misleading She consequently proposes using the term autoregulation in its place Taking a contingent pacifist stance this book addresses the question of whether such technological means help or hinder peace processes The argument is tripartite First it is demonstrated that the risk of harm to nonparticipants is very likely to increase Second and with respect to responsibility it is indicated that a human machine system can only be operated responsibly if a human is in control Finally this idea is transferred into theological thought through reference to Bonhoeffer's idea of incurring guilt in acting responsibly In that context autoregulative technology might pose the possibility of shying away from responsibility and therefore becoming guilty This book is among the first ethical considerations of lethal autoregulative weaponry from a contingent pacifist stance and brings together peace ethical thinking and theories from various backgrounds

Improvisation in Music and Philosophical Hermeneutics Sam McAuliffe, 2023-02-23 In the first book to examine the overlooked relationship between musical improvisation and philosophical hermeneutics Sam McAuliffe asks what exactly is improvisation And how does it relate to our being in the world *Improvisation in Music and Philosophical Hermeneutics* answers these questions by investigating the underlying structure of improvisation McAuliffe argues that improvising is best understood as attending and responding to the situation in which one finds itself and as such is essential to how we engage with the world Working within the hermeneutic philosophical tradition drawing primarily on the work of Martin Heidegger Hans Georg Gadamer and Jeff Malpas this book provides a rich and detailed account of the ways in which we are all already experienced improvisers Given the dominance of music in discussions of improvisation Part I of this book uses improvised musical performance as a case study to uncover the ontological structure of improvisation a structure that McAuliffe demonstrates is identical to the structure of hermeneutic engagement Exploring this relationship between improvisation and hermeneutics Part II offers a new reading of Gadamer's philosophical hermeneutics examining the way in which Gadamer's accounts of truth and understanding language and ethics each possess an essentially improvisational character Working between philosophy and music theory *Improvisation in Music and Philosophical Hermeneutics* unveils the hermeneutic character of musical performance the musicality of hermeneutic engagement and the universality of improvisation

Transmedia Creatures Francesca Saggini, Anna Enrichetta Soccio, 2018-10-19 On the 200th anniversary of the first edition of Mary Shelley's *Frankenstein* *Transmedia Creatures* presents studies of *Frankenstein* by international scholars from converging disciplines such as humanities musicology film studies television studies English and digital humanities These innovative contributions investigate the afterlives of a novel taught in a disparate array of courses *Frankenstein* disturbs and transcends boundaries be they political ethical theological aesthetic and not least of media ensuring its vibrant presence in contemporary popular culture *Transmedia Creatures* highlights how cultural content is redistributed through multiple media forms and modes of production including user generated ones from below that often appear synchronously and dismantle and renew established readings of the text while at the same time incorporating and

revitalizing aspects that have always been central to it The authors engage with concepts value systems and aesthetic moral categories among them the family horror monstrosity diversity education risk technology the body from a variety of contemporary approaches and highly original perspectives which yields new connections Ultimately Frankenstein as evidenced by this collection is paradoxically enriched by the heteroglossia of preconceptions misreadings and overreadings that attend it and that reveal the complex interweaving of perceptions and responses it generates Published by Bucknell University Press Distributed worldwide by Rutgers University Press

The Long Walk to Equality Avis Whyte, Patricia Tuitt, Judith Bourne, 2024-02-20 In 1965 the UK enacted the Race Relations Act while the International Convention on the Elimination of all Forms of Racial Discrimination ICERD opened for signature and ratification In the US the changes that brought down the walls of segregation conveying some equality to black people essentially began with the Civil Rights Act of 1964 These ground breaking instruments marked a commitment domestically and internationally by the state parties to the ICERD to address racial injustice and inequality through legal means Yet the intervening years reveal the challenges of pursuing racial justice and equality through the medium of law In recent years allegations of institutional racism have been levelled against numerous public institutions in the UK while the rise of populism globally has challenged the ability of law to effect change This edited collection draws attention to the need to reflect on the persistence of racial inequalities and injustices despite law s intervention and arguably because of its unconscious role in their promotion It does so from a multiplicity of perspectives ranging from the doctrinal socio legal critical and theoretical thereby generating different kinds of knowledge about race and law By exploring contemporary issues in racial justice and equality contributors examine the role of law whether domestic or international hard or soft in advancing racial equality and justice and consider whether it can effect substantive change

Overcoming Epistemic Injustice Benjamin R. Sherman, Stacey Goguen, 2019-06-28 Prejudice influences people s thoughts and behaviors in many ways it can lead people to underestimate others credibility to read anger or hysteria into their words or to expect knowledge and truth to sound a certain way or to come from a certain type of person These biases and mistakes can have a big effect on everything from an institutional culture to an individual s self understanding These kinds of intellectual harms are known as epistemic injustice Most people are opposed to unfair prejudices at least in principle and no one wants to make avoidable mistakes But research in the social sciences reveals a disturbing truth Even people who intend to be fair minded and unprejudiced are influenced by unconscious biases and stereotypes We may sincerely want to be epistemically just but we frequently fail and simply thinking harder about it will not fix the problem The essays collected in this volume draw from cutting edge social science research and detailed case studies to suggest how we can better tackle our unconscious reactions and institutional biases to help ameliorate epistemic injustice The volume concludes with an afterward by Miranda Fricker who catalyzed recent scholarship on epistemic injustice reflecting on these new lines of research and potential future directions to explore
