Cadres And Corruption The Organizational Involution Of The Chinese Communist Party:

Cadres and Corruption Xiaobo Lü, 2000 The most up to date and comprehensive analysis of corruption and change in the Chinese Communist Party *Cadres and Corruption* reveals the long history of the party's inability to maintain a corps of committed and disciplined cadres Contrary to popular understanding of China's pervasive corruption as an administrative or ethical problem the author argues that corruption is a reflection of political developments and the manner in which the regime has evolved Based on a wide range of previously unpublished documentary material and extensive interviews conducted by the author the book adopts a new approach to studying political corruption by focusing on organizational change within the ruling party In so doing it offers a fresh perspective on the causes and changing patterns of official corruption in China and on the nature of the Chinese Communist regime By inquiring into the developmental trajectory of the party's organization and its cadres since it came to power in 1949 the author argues that corruption among Communist cadres is not a phenomenon of the post Mao reform period nor is it caused by purely economic incentives in the emerging marketplace Rather it is the result of a long process of what he calls organizational involution that began as the Communist party state embarked on the path of Maoist continuous revolution In this process the Chinese Communist Party gradually lost its ability to sustain officialdom with either the Leninist cadre or the Weberian bureaucratic mode of integration Instead the party unintentionally created a neotraditional ethos mode of operation and set of authority relations among its cadres that have fostered official corruption

Making Law Work Mattias

Burell, Marina Svensson, 2011-04-30 By studying law implementation in different areas and at different levels contributors from various disciplines give a nuanced picture of law implementation in China showing that it is rare to find examples of complete success or failure Instead making law work in actual practice and in any society is a matter of degree The study is multidisciplinary in character and builds on insights from both sociology of law and political science The Writing on the Wall Will Hutton, 2006-11-14 Evaluating China's economic and military presence in the twenty first century critically acclaimed author of The World We're In Will Hutton discusses why it is crucial for the United States to embrace the powerful country as a partner or face it as an enemy In this provocative and stimulating book critically acclaimed author Will Hutton warns that China is running up against a set of daunting challenges from within its own political and economic system that could well derail its rise leading to a massive shock to the global economy The United States he argues must recognize that it has a vital stake in working to assure this doesn't happen for if China's political liberalization and economic growth collapse the United States will suffer crippling consequences If the twenty first century is to be the China century the Chinese will have to embrace the features of modern Western nations that have spurred the political stability and economic power of the United States and Europe the rule of law an independent judiciary freedom of the press and authentic representative government that is accountable to the people Turning conventional wisdom on its head The Writing on the Wall is a brilliantly argued book that is vital reading at a crucial juncture in world affairs *Vietnam* Martin Gainsborough, 2013-07-04 Vietnam Rethinking the State offers an exciting and up to date look at the politics of this fascinating country as it seeks to make the transition from war torn economic backwater to a dynamic and modern society The book argues for a move away from the commonly associated idea of reform arguing for a deeper understanding of the concept and questioning the idea of state retreat The result is a path breaking book which gets beneath the surface of Vietnam's politics in a way which few outsiders otherwise could **Politics in China** William A. To Govern China Vivienne Shue, Patricia M. Thornton, 2017-10-26 How practically speaking is the Chinese polity as immense and fissured as it has now become actually being governed today Some analysts highlight signs of progress in the direction of more liberal open and responsive rule Others dwell instead on the many remaining obstacles to a hoped for democratic transition Drawing together cutting edge research from an international panel of experts this volume argues that both those approaches rest upon too starkly drawn distinctions between democratic and non democratic regime types and concentrate too narrowly on institutions as opposed to practices The prevailing analytical focus on adaptive and resilient authoritarianism a neo institutionalist concept fails to capture what are often cross cutting currents in ongoing processes of political change Illuminating a vibrant repertoire of power practices employed in governing China today these authors advance instead a more fluid open ended conceptual approach that privileges nimbleness mutability and receptivity to institutional and procedural invention and evolution

State, Market, and Bureau-contracting in Reform China Yuen Yuen Ang, 2009 Why and how has China succeeded as a developmental state despite a seemingly rents ridden bureaucracy Following conventional wisdom Weberian bureaucracies are an institutional precondition for development especially in interventionist states like China However my research finds that China's fast growing economy has not been governed by a purely salaried civil service Instead Chinese bureaucracies still remain partially prebendal at every level of government each office systematically appropriates authority to generate income for itself My study unravels the paradox of developmentalism without Weberianness by illuminating China's unique path of bureaucratic adaptation in the reform era labeled as bureau contracting where contracting takes place within the state bureaucracy In a bureau contracting structure the state at each level contracts the tasks of governance to its own bureaucracies assigning them revenue making privileges and property rights over income earned in exchange for services rendered Contrasting previous emphases on the prevalence of illicit corruption in China my study shows how and why bureaucracies in this context are actually authorized by the state to profit from public office Specifically I identify two factors that constrain arbitrary and excessively predatory behavior among Chinese bureaucracies first mechanisms of rents

management and second the mediation of narrow departmental interests by local developmental incentives In short I argue that it is the combination of an incentive compatible fiscal design and increasingly sophisticated instruments of oversight that have sustained an otherwise unorthodox structure of governance in China In a phrase bureau contracting presents a high powered but opportunistic alternative to the Weberian ideal type The Chinese experience suggests that market compatible bureaucratic institutions need not necessarily conform to and may even diverge significantly from standard Western models at least at early stages of development My research draws on interviews with 165 cadres across different regions and governmental sectors as well as statistical analysis of previously unavailable budget data **The Sinews of State Power**

Juan Wang,2017-03-16 The Sinews of State Power seeks to explain why rural China has been so unstable since 2000 despite numerous national reforms Using original fieldwork it traces the rise and demise of cohesive local states in rural China since the Maoist era It shows that the county township and village levels of government when in alliance have facilitated economic growth and caused social grievances However national reforms redressing local deviation together with individual responses from each level of administration have dismantled elite alliances and consequentially undermined the extractive coercive and responsive capacity of the state This book forms dialogue with two fields of inquiry in China studies and comparative politics First researches on farmer protest often either focus on farmers grievances organizations and strategies or examine responses from the state as a uniform entity This book instead highlights the anthropology of the state by looking into elite cohesion across administrative levels that determines the exercise of state capacity Second studies of regime stability or endurance have stressed holistic factors such as institutional adaptability political culture or epidemic corruption The Sinews of State Power instead revisits the fundamental components of a capable government a coherent and robust local leadership that enables the function of a state Conservative Thought in Contemporary China Peter R. Moody,2007-01-01

Conservative Thought in Contemporary China examines the evolution of conservative politics in China which has become increasingly prevalent following the death of Mao Zedong in 1978 Peter Moody traces the roots of conservatism through the imperial system the Republican period and the pre Cultural Revolution People s Republic all of which influence contemporary Chinese politics China and Globalization Doug Guthrie,2012-06-14 Choice Outstanding Academic Title 2009 In its quarter century long shift from communism to capitalism China has transformed itself from a desperately poor nation into a country with one of the fastest growing and largest economies in the world Doug Guthrie examines the reforms driving the economic genesis in this compact and highly readable introduction to contemporary China He highlights the social cultural and political factors fostering this revolutionary change and interweaves a broad structural analysis with a consideration of social changes at the micro and macro levels In this new revised edition author Guthrie updates his story on modern China and provides the latest authoritative data and examples from current events to chart where this dynamically changing society is headed and what the likely consequences for the rest of the world will be **Africa Now!** Adebusuyi Adeniran,Lanre

Ikuteyijo,2017-11-20 This book presents relevant and timely endogenous procedures for addressing the challenge of transforming ideas into sustainable opportunities in Africa It explores how Africa could be understood in the context of emerging global realities providing alternative frameworks that will not just be participatory in conception and practice but equally show a contextual workability for the varying aspects of the developmental enterprise in Africa Despite having alternative and less cumbersome sources of funding with commendable economic growth indices and several economies among the fastest growing globally African countries have been unable to transmute related opportunities into sustainable human development outcomes for majority of its citizenry Over four rich sections the authors cover subjects ranging from environment and natural resource management to governance economy and sustainable development The book continues with a section on Education and Human Development and a case study in transnationalism The final section discusses crime conflict and regional dynamics including highly disputed topics such as forced migration and sex trade This indispensable resource will be of great use to students and researches globally in fields such as sociology anthropology environmental studies politics and economics with a focus on contemporary Africa as well as to policy planners and human rights activists invested in the future development of Africa

Government and Policy-Making Reform in China Bill K.P. Chou,2009-05-07 China's rapid economic development has not translated automatically into political development with many of its institutions still in need of major reform In the post Mao era despite the decentralization of local government with significant administrative and fiscal authority China's government and policy making processes have retained much of the inefficiency and corruption characteristic of the earlier period This book analyzes the implementation of government and policy making reform in China focusing in particular on the reform programmes instituted since the early 1990s It considers all the important areas of reform including the enhancement of policy making capacity reform of taxation and fund transfer policies tightening of financial control civil service reform and market deregulation Bill K P Chou assesses the course of policy reform in each of these areas considers how successful reforms have been and outlines what remains to be done In particular he explores the impact on the reform process of China's entry into the WTO in 2001 demonstrating that the process of reform in China has been one of continuous conflict between the agenda of political elites in central government and the priorities of local leaders with local agents often distorting delaying or ignoring the policies emanating from the central government
