Cable Visions Television Beyond Broadcasting:

Cable Visions Sarah Banet-Weiser, Cynthia Chris, Anthony Freitas, 2007-09 Looks beyond broadcasting's mainstream toward cable's alternatives to critically consider the capacity of commercial media to serve the public interest This work offers an overview of the industry's history and regulatory trends case studies of cable newcomers aimed at niche markets and analyses of programming forms introduced by cable TV *Social TV* Cory Barker, 2022-06-27 Winner of the 2023 SCMS Media Industries Scholarly Interest Group Outstanding Book Award sponsored by the Center for Entertainment Media Industries On March 15 2011 Donald Trump changed television forever The Comedy Central Roast of Trump was the first major live broadcast to place a hashtag in the corner of the screen to encourage real time reactions on Twitter generating more than 25 000 tweets and making the broadcast the most watched Roast in Comedy Central history The Trump Roast initiative personified the media and tech industries' utopian vision for a multi screen and communal live TV experience In *Social TV: Multi Screen Content and Ephemeral Culture* author Cory Barker reveals how the US television industry promised but failed to deliver a social media revolution in the 2010s to combat the imminent threat of on demand streaming video Barker examines the rise and fall of Social TV across press coverage corporate documents and an array of digital ephemera He demonstrates that despite the talk of disruption the movement merely aimed to exploit social media to reinforce the value of live TV in the modern attention economy Case studies from broadcast networks to tech start ups uncover a persistent focus on community that aimed to monetize consumer behavior in a transitional industry period To trace these unfulfilled promises and flopped ideas Barker draws upon a unique mix of personal Social TV experiences and curated archives of material that were intentionally marginalized amid pivots to the next big thing Yet in placing this now forgotten material in recent historical context Social TV shows how the era altered how the industry pursues audiences Multi screen campaigns have shifted away from a focus on live TV and toward all day content streams The legacy of Social TV then is the further embedding of media and promotional material onto every screen and into every moment of life *Feminist Television Criticism: A Reader* Brunsdon, Charlotte, Spigel, Lynn, 2007-12-01 Covers the area of feminist media criticism This edition discusses subjects including alternative family structures de westernizing media studies industry practices Sex and the City Oprah and Buffy **Media Industries** Jennifer Holt, Alisa Perren, 2011-09-19 Media Industries History Theory and Method is among the first texts to explore the evolving field of media industry studies and offer an innovative blueprint for future study and analysis capitalizes on the current social and cultural environment of unprecedented technical change convergence and globalization across a range of textual institutional and theoretical perspectives brings together newly commissioned essays by leading scholars in film media communications and cultural studies includes case studies of film television and digital media to vividly illustrate the dynamic transformations taking place across national regional and international contexts **Television and Postfeminist Housekeeping** Elizabeth Nathanson, 2013 In this book Nathanson examines how

contemporary American television and associated digital media depict women's everyday lives as homemakers, career women and mothers. Her focus on American popular culture from the 1990s through the present reveals two extremes: narratives about women who cannot keep house and narratives about women who only keep house. Nathanson looks specifically at the issue of time in this context and argues that the media constructs panics about domestic time scarcity while at the same time offering solutions for those very panics. Analyzing TV programs such as *How Clean is Your House*, *Up All Night* and *Supernanny*, she finds that media's portrayals of women's time is crucial to understanding definitions of femininity, women's labor and leisure in the postfeminist context.

The Indecent Screen Cynthia Chris, 2019-01-07 *The Indecent Screen* explores clashes over indecency in broadcast television among U.S.-based media advocates, television professionals, the Federal Communications Commission and TV audiences. Cynthia Chris focuses on the decency debates during an approximately twenty-year period since the Telecommunications Act of 1996, which in many ways restructured the media environment. Simultaneously, ever-increasing channel capacity, new forms of distribution and time-shifting in the form of streaming and on-demand viewing options radically changed how, when and what we watch. But instead of these innovations quelling concerns that TV networks were too often transmitting indecent material that was accessible to children, complaints about indecency skyrocketed soon after the turn of the century. Chris demonstrates that these clashes are significant battles over the role of family, the role of government and the value of free speech in our lives, arguing that an uncensored media is so imperative to the public good that we can and must endure the occasional indecent screen.

Media Globalization and the Discovery Channel Networks Ole J. Mjos, 2009-09-10 Offering a thorough and accessible account of the global expansion of Discovery and its relationship with media globalization, Mjos explores the way in which the processes of media globalization unfold and develop and traces some of the possible consequences.

Television Studies After TV Graeme Turner, Jinna Tay, 2009-03-27 Television studies must now address a complex environment where change has been vigorous but uneven and where local and national conditions vary significantly. Globalizing media industries, deregulatory policy regimes, the multiplication, convergence and trade in media formats, the emergence of new content production industries outside the US/UK umbrella and the fragmentation of media audiences are all changing the nature of television today: its content, its industrial structure and how it is consumed. *Television Studies After TV* leads the way in developing new ways of understanding television in the post-broadcast era. With contributions from leading international scholars, it considers the full range of convergent media now implicated in understanding television and also focuses on large non-Anglophone markets such as Asia and Latin America in order to accurately reflect the wide variety of structures, forms and content which now organise television around the world.

Television and New Media Jennifer Gillan, 2010-10-18 We watch TV on computers, phones and other mobile devices; television is now online as much as it is on air. *Television and New Media* introduces readers to the ways that new media technologies have transformed contemporary broadcast television production, scheduling

distribution and reception practices Drawing upon recent examples including *Lost* *24* and *Heroes* this book examines the ways that television programming has changed transforming nearly every TV series into a franchise whose on air online and on mobile elements are created simultaneously and held together through a combination of transmedia marketing and storytelling Television studios strive to keep their audiences in constant interaction with elements of the show franchise in between airings not only to boost ratings but also to move viewers through the different divisions of a media conglomerate Organized around key industrial terms platforming networking tracking timeshifting placeshifting schedule shifting micro segmenting and channel branding this book is essential for understanding how creative and industrial forces have worked together to transform the way we watch TV

Republic on the Wire John McMurria, 2017-02 The history of cable television in America is far older than networks like MTV ESPN and HBO which are so familiar to us today Tracing the origins of cable TV back to the late 1940s media scholar John McMurria also locates the roots of many current debates about premium television cultural elitism minority programming content restriction and corporate ownership *Republic on the Wire* takes us back to the pivotal years in which media regulators and members of the viewing public presciently weighed the potential benefits and risks of a two tiered television system split between free broadcasts and pay cable service Digging into rare archives McMurria reconstructs the arguments of policymakers whose often sincere advocacy for the public benefits of cable television were fueled by cultural elitism and the priority to maintain order during a period of urban Black rebellions He also tells the story of the people of color rural residents women s groups veterans seniors and low income viewers who challenged this reasoning and demanded an equal say over the future of television By excavating this early cable history and placing equality at the center of our understanding of media democracy *Republic on the Wire* is a real eye opener as it develops a new methodology for studying media policy in the past and present

TV Cops Jonathan Nichols-Pethick, 2012 The police drama has been one of the longest running and most popular genres in American television In *TV Cops* Jonathan Nichols Pethick argues that perhaps more than any other genre the police series in all its manifestations from *Hill Street Blues* to *Miami Vice* to *The Wire* embodies the full range of the cultural dynamics of television Exploring the textual industrial and social contexts of police shows on American television this book demonstrates how police dramas play a vital role in the way we understand and engage issues of social order that most of us otherwise experience only in such abstractions as laws and crime statistics And given the current diffusion and popularity of the form we might ask a number of questions that deserve serious critical attention Under what circumstances have stories about the police proliferated in popular culture What function do these stories serve for both the television industry and its audiences Why have these stories become so commercially viable for the television industry in particular How do stories about the police help us understand current social and political debates about crime about the communities we live in and about our identities as citizens

A European Television Fiction Renaissance Luca Barra, Massimo Scaglioni, 2020-11-29 This book maps the landscape of contemporary European premium television fiction offering a detailed overview of both the

changes in the digital production and distribution and the emergence of specific national and transnational case histories. Combining a media production approach with a textual and audience analysis, the volume offers a complex stratified systemic view of ongoing aesthetic, sociocultural and industrial developments in contemporary European TV. With contributions from leading experts in the field, the book first offers an overview of the industrial policy and cultural context for the renaissance of European television drama over the past decade based on original comparative research. This research is then supported by case study chapters from the key contexts within which quality European television is being produced, offering a complex and complete picture of the industry's strengths and limitations, its traditions and trends, its constraints and future perspectives. *A European Television Fiction Renaissance* is a must-read book for TV scholars working across Europe and beyond in the areas of media studies, international communications and television studies, media industries studies, production studies, European studies and media policy studies, as well as for those with an interest in television drama, Netflix, globalisation, pay TV and on demand.

Post-TV Michael Strangelove, 2015-03-27 In the late 2000s, television no longer referred to an object to be watched; it had transformed into content to be streamed, downloaded and shared. Tens of millions of viewers have cut the cord, abandoned cable television, tuned into online services like Netflix, Hulu and YouTube, and also watch pirated movies and programmes at an unprecedented rate. The idea that the Internet will devastate the television and film industry in the same way that it gutted the music industry no longer seems far-fetched. The television industry, however, remains driven by outmoded market-based business models that ignore audience behaviour and preferences. In *Post TV*, Michael Strangelove explores the viewing habits and values of the post-television generation, one that finds new ways to exploit technology to find its entertainment for free rather than for a fee. Challenging the notion that the audience is constrained by regulatory and industrial regimes, Strangelove argues that cord-cutting, digital piracy, increased competition and new modes of production and distribution are making audiences and content more difficult to control, opening up the possibility of a freer, more democratic media environment. A follow-up to the award-winning *Watching YouTube*, *Post TV* is a lively examination of the social and economic implications of a world where people can watch what they want when they want, wherever they want.

Prestige Television Seth Friedman, Amanda Keeler, 2022-11-11 *Prestige Television* explores how an array of 21st-century US programming is produced and received in ways that elevate select series above the competition in a saturated market. Essays focusing on diverse series ranging from widely recognized constituents such as *The Americans* to contested examples like *Queen of the South* highlight how contributing authors extend conceptions of the genre beyond expected parameters.

Queer TV Glyn Davis, Gary Needham, 2008-12-03 How can we queerly theorise and understand television? How can the realms of television studies and queer theory be brought together in a manner beneficial and productive for both? *Queer TV Theories* *Histoires Politiques* is the first book to explore television in all its scope and complexity: its industry, production, texts, audiences, pleasures and politics in relation to queerness. With contributions from distinguished

authors working in film television studies and the study of gender sexuality it offers a unique contribution to both disciplines An introductory chapter by the editors charts the key debates and issues addressed within the book followed by three sections each central to an understanding of the relationships between queerness and television theories and approaches histories and genres and television itself Individual essays examine the relationships between queers queerness and television across the multiple sites of production consumption reception interpretation and theorisation as well as the textual and aesthetic dimensions of television and the televisual The book crucially moves beyond lesbian and gay textual analyses of specific TV shows that have often focussed on evaluations of positive negative representations and identities Rather the essays in *Queer TV* theorise not just the queerness in on television the production personnel the representations it offers but also the queerness of television as a distinct medium

Television Studies in Queer Times F. Hollis Griffin, 2023-05-09 This timely collection of accessible essays interrogate queer television at the start of the twenty first century The complex political cultural and economic milieu requires new terms and conceptual frameworks to study television and media through a queer lens Gathering a range of well known scholars the book takes on the relationship between sexual identity desire and television breaking new ground in a context where existing critical vocabularies and research paradigms used to study television no longer hold sway in the ways they used to The anthology sets out to confound conventional categories used to organize queer television scholarship like programming industry audience genre and activism Instead the anthology offers four interpretive frames historicity temporal play ideological limitation and industrial contextualization in the interest of creating new queer tools for studying digital television in the contemporary age This collection is suitable for scholars and students studying queer media studies television studies gender studies and sexuality studies
