Entering a PIN

You will need to enter a valid PIN to access various features and system information.

After a period of inactivity, a screensaver will appear, and the keypad will go into power save mode. Press any button to wake it up. A screen will appear requesting to enter your PIN. A valid PIN is required to unlock the screen and access the system.

Enter Your Code, then J

Enter a valid user code followed by Enter. User PINs can be between 4 and 8 digits in length. The default master user PIN is 1234.

If the PIN is invalid for the feature you are trying to access, the Access Denied warning message will be shown.

Permissions are assigned to users and keypads to determine what features a user can access and at what times. If you are unable to access a feature, contact your installation company or building manager.

Using Cards

NXG-1832-EUR and NXG-1833-EUR keypads are equipped with a Mifare card reader that allows you to use cards to log into the system and perform particular operations (NXG-180x-5 series of cards).

The cards/tobs must be presented close to the keypad display, preferably in the middle of the screen area (item 1 in Figure 1).

- Once the card is recognized, the reader generates a single beep sound.
- If the card is being held by the reader for a second, the reader will generate double beep sound.
- If the card is still being held by the reader for another second, the reader will generate triple beep sound.

By removing the card after single/double/triple beep, user can select which functions are to be triggered.

Every beep level can be independently configured to any combination of the following actions:

- logging into the system
- arming/disarming
- triggering system scenes or actions
- unlocking the door

See *xGenConnect Installation and Programming Guide* for more details.

Note: Card functions are triggered only if the keypad shows the screensaver or the main screen.

Cards are inactive when the user already entered keypad menus, or is in the process of arming/disarming. The exception is the User Cards menu. See "Programming Cards" on page 6 for details.

System status

The xGenConnect security system displays system status messages on the screen (Figure 1, item 1). For example, the main screen below shows the Fault system status category.

Fault
Press J for Info

To get more details about the system fault, press the System Info (i) button.
