Biafra's War 1967-1970 Al J. Venter, 2016-02-19 Almost half a century has passed since the Nigerian Civil War ended But memories die hard because a million or more people perished in that internecine struggle the majority women and children who were starved to death Biafra's war was modern Africa's first extended conflict It lasted almost three years and was based largely on ethnic by inference tribal grounds It involved on the one side a largely Christian or animist southeastern quadrant of Nigeria which called itself Biafra pitted militarily against the country's more populous and preponderant Islamic north These divisions almost always brutal persist Not a week goes by without reports coming in of Christian communities or individuals persecuted by Islamic zealots It was also a conflict that saw significant Cold War involvement the Soviets and Britain siding and supplying Federal Nigeria with weapons aircraft and expertise and several Western states Portugal South Africa and France especially providing clandestine help to the rebel state For that reason alone this book is an important contribution towards understanding Nigeria's ethnic divisions which are no better today than they were then Biafra was the first of a series of religious wars that threaten to engulf much of Africa Similar conflicts have recently taken place in the Ivory Coast Kenya Southern Sudan the Central African Republic Senegal Cassamance both Congo Republics and elsewhere As the war progressed Biafra also attracted mercenary involvement many of whom arriving from the Congo which had already seen much turmoil Western pilots were hired by Lagos and they flew the first Soviet MiG 17 jet fighters to have played an active role in a Western war Al Venter spent time covering this struggle He left the rebel enclave in December 1969 only weeks before it ended and claims the distinction of being the only foreign correspondent to have been rocketed by both sides first by Biafra's tiny Swedish built Minicon fighter planes while he was on a ship lying at anchor in Warri harbour and thereafter by MiG jets flown by mercenaries Among his colleagues inside the beleaguered territory were the celebrated Italian photographer Romano Cagnoni as well as Frederick Forsyth who originally reported for the BBC and then resigned because of the partisan pro Nigerian stance taken by Whitehall He briefly shared quarters with French photographer Giles Caron who was later killed in Cambodia Prior to that Venter had been working for John Holt in Lagos It is interesting that his office at the time was at Ikeja International Airport Murtala Muhammed today where the second Nigerian army mutiny was plotted and from where it was launched From this perspective he had a proverbial ringside seat of the tribal divisions that followed as hostilities escalated Venter took numerous photos while on this West African assignment both in Nigeria while he was based there and later in Biafra itself Others come from various sources including some from the same mercenary pilots who originally targeted him from the air

A History of the Republic of Biafra Samuel Fury Childs Daly, 2020-08-27 The Republic of Biafra lasted for less than three years but the war over its secession would contort Nigeria for decades to come Samuel Fury Childs Daly examines the history of the Nigerian Civil War and its aftermath from an uncommon vantage point the courtroom Wartime Biafra was glutted with firearms wracked by famine and administered

by a government that buckled under the weight of the conflict In these dangerous conditions many people survived by engaging in fraud extortion and armed violence When the fighting ended in 1970 these survival tactics endured even though Biafra itself disappeared from the map Based on research using an original archive of legal records and oral histories Daly catalogues how people navigated conditions of extreme hardship on the war front and shows how the conditions of the Nigerian Civil War paved the way for the country's long experience of crime that was to follow **Biafra Genocide** Al J. Venter, 2018-08-30 One of the great tragedies of Africa is not only the fact that a million people mostly civilians and a large proportion of them children died in one of Africa's first post independence wars but that until it happened the world thought Nigeria was immune from the wasting disease of tribalism It certainly was not because the Biafran War is still the most expansive tribal conflagration that the continent has experienced barring perhaps the ongoing Great Lakes conflict involving the forces of East and West only this time with the British siding with the Soviets Worse some of the religious differences that emerged before and after that dreadful carnage are still with us today During the course of hostilities that lasted almost four years a lot of other shortcomings surfaced in Africa's most populous nation including the kind of corruption that until then had always been linked to countries rich in oil Disunity incompetence and instability from which Nigeria never really recovered also emerged Two bloody army coups followed after the rebels capitulated together with an appalling series of massacres mostly of southern Christians by Muslim northerners Half a century later the slaughter continues *Governance in Nigeria post-1999: Revisiting the democratic 'new dawn' of the Fourth Republic* Edited by Romola Adeola & Ademola Oluborode Jegede, 2020-03-06 At the start of Nigeria's Fourth Republic on 29 May 1999 there was great optimism as to the emergence of a new democratic future representing a significant break from the political undulations of the past Two decades and four presidential epochs later there is a prevalent question as to how well Nigeria has fared in governance and human rights post 1999 This book revisits the democratic new dawn of the Fourth Republic discussing pertinent matters integral to Nigeria's democratic future post 2019 **I was Born a Slave** Yuval Taylor, 1999 The narratives in this volume include tales of Africa pirate ships wild animals witches a slave who had ten owners and another who led a rebellion that killed fifty five whites the kidnapping of a white woman and her rescue by a slave the nightmarish tortures of the infamous Mr Gooch the tragicomic experiences of a pair of white slaves and the story of the original Uncle Tom **I was Born a Slave: 1849-1866** Yuval Taylor, 1999 Between 1760 and 1902 more than 200 book length autobiographies of ex slaves were published together they form the basis for all subsequent African American literature I Was Born a Slave collects the 20 most significant slave narratives They describe whippings torture starvation resistance and hairbreadth escapes slave auctions kidnappings and murders sexual abuse religious confusion the struggle of learning to read and write and the triumphs and difficulties of life as free men and women Many of the narratives such as those of Frederick Douglass and Harriet Jacobs have achieved reputations as masterpieces but some of the lesser known narratives are equally brilliant This unprecedented

The Lever of Riches Joel Mokyr, 1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation s creativity and then illustrates them

by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential
