Prediction and Treatment of Recurrent Depression John Cobb, Nicola L. M. Goeting, 1990 *Psychopharmacology Bulletin*, 1995 *Contemporary Psychiatry* Fritz Henn, Norman Sartorius, Hanfried Helmchen, Hans Lauter, 2013-11-11

Contemporary Psychiatry is an international textbook developed on the basis of the experience with its first three German editions making it a work with long and distinguished tradition. It combines the German tradition of phenomenology and diagnosis going back to Kraepelin with the Anglo American tradition and the DSM IV diagnostic system. In doing so, Contemporary Psychiatry becomes a unique source among psychiatric texts offering a truly international approach to state of the art knowledge and future perspectives of psychiatry. The four internationally renowned editors were able to acquire the leading specialists as contributors. No less than 120 authors from 10 different countries ensure an extremely high standard and guarantee the consideration of cross cultural aspects. A special feature of Contemporary Psychiatry is that it includes chapters on psychiatric disorders caused by extreme circumstances such as for example migration, torture, rape, violence and natural and man made disasters.

DSM-IV Sourcebook Thomas A. Widiger, American Psychiatric Association. Task Force on DSM-IV., 1996. Section Contents: Disorders usually first diagnosed in infancy, childhood or adolescence; Parts I and II; Eating disorders; The DSM-IV multiaxial system; Family relational problems; Cultural issues.

The Oxford Handbook of Mood Disorders Robert J. DeRubeis, Daniel R. Strunk, 2017-04-24. The most comprehensive volume of its kind. The Oxford Handbook of Mood Disorders provides detailed coverage of the characterization, understanding and treatment of mood disorders. Chapters are written by the world's leading experts in their respective areas. The Handbook provides coverage of unipolar depression, bipolar disorder and variants of these disorders. Current approaches to classifying the mood disorders are reviewed and contemporary controversies are placed in historical context. Chapter authors offer a variety of approaches to understanding the heterogeneity of the experiences of those who meet criteria for mood disorders both within and across cultures. The role of genetic and environmental risk factors as well as premorbid personality and cognitive processes in the development of mood pathology are detailed. Interpersonal, neurobiological and psychological factors also receive detailed consideration. The volume reviews mood disorders in special populations, e.g. postpartum and seasonal mood disorders as well as common comorbidities, e.g. anxiety, substance use disorders. Somatic and psychosocial treatment approaches receive in-depth coverage with chapters that describe and review empirical evidence regarding each of the most influential treatment approaches. The depth and breadth offered by this Handbook make it an invaluable resource for clinicians and researchers as well as scholars and students.
