Unit # 3: Looking Closely Observing, Labeling, and Listening Like Scientists	Time: November
<p>Overview: This unit has three important purposes. First is to help children develop the foundational knowledge that will put them in good stead as they move from emergent toward conventional reading and writing. This unit channels them to transfer and apply their growing knowledge of letters and sounds to a new context: writing labels and sentences about items they observe. The unit emphasizes slowing down, stretching out each word, listening to all the sounds in a word. It also channels children toward learning and writing high-frequency words.</p> <p>Second this unit is designed to teach children that writing is not only a tool for writing about things they know or have experienced; it is also a tool for learning about science. The unit provides opportunities for students to learn about the work and to expand their background knowledge. It also shows them how to use writing to organize, hold on to, and spotlight whatever content they learn. This, of course, is also an important part of the Common Core State Standards, which call for kindergarten writers to compose informative/explanatory texts that name a topic and supply some information, and to recall information from various sources to answer questions. This unit allows them to begin to work toward these goals as they notice ways that they can write about the world around them.</p> <p>Third, this unit provides opportunities for children to see that learning about one thing leads to learning about lots of other things. Writing about a shared research topic provides a supportive scaffold you're your kindergarten writers early in the year. By studying a topic across days and weeks, and through repeated practice applying and transferring content knowledge in multiple contexts, children engage in the cognitively more demanding work described in Webb's DOK Level 3.</p> <p>Part One: Launching the Unit: Living Like Writers, Living Like Scientists</p> <ul style="list-style-type: none"> • Write in 3 to 5 page booklets • Paper contains at least a few lines at the bottom of each page • Stay focused on one topic • Representational drawings • Teach revision • Drawing is a prelude to writing • Invent their own sentences and patterns • Accountable talk prompts • Writing partners • Scientific vocabulary <p>Part Two: Writing More! Elaboration, Writing Sentences, Adding Details and Information</p> <ul style="list-style-type: none"> • Elaborate – think and write more • Inventive spelling- tackling words fearlessly • Different kind of sentences • Elaboration – write what they first see and then look again • Approximately 3 books a week • Science word wall <p>Part Three: Scientists Think, Make Connections, Predict, Have Ideas, Compare and Contrast-and So Do</p>
