mathematics include preparing a new generation of mathematics researchers and a cadre of technically competent users of mathematics training students to think logically and because mathematics is as much part of cultural heritage as literature or music. These reasons remain valid though open to critique but a deeper analysis is required that recognizes the roles of mathematics in framing many aspects of contemporary society that will connect mathematics education to the lived experiences of students, their communities and society in general and that acknowledges the global ethical responsibilities of mathematicians and mathematics educators. The book is organized in four sections: 1 Mathematics education: For what and why? 2 Globalization and cultural diversity 3 Mathematics education and society and 4 Social justice in and through mathematics education.
