Left Behind Edward P. St. John, Victoria J. Milazzo Bigelow, Kim Callahan Lijana, Johanna C. Massé, 2015-11-30 Urban schools are falling short of preparing students for college In *Left Behind* a team of education scholars led by Edward P St John argues that American cities have been engaged for the past three decades in a radical but failing effort to transform general and vocational high schools into college preparatory institutions By examining the educational reforms in four urban charter schools across the United States and four public high schools in New York City *Left Behind* reveals how educators contend with the challenge of developing new courses while providing social support for students to build college going cultures The research shows that district schools struggle to comply with standards that leave little room to develop advanced thematic curricula and that charter schools have not succeeded in substantially raising student test scores Many students who start in rigorous charter schools transfer back to public schools while both public and charter schools struggle to prepare their students for college level work *Left Behind* provides crucial insights into the troubling trajectory of public policy while offering teachers and administrators effective strategies for overcoming barriers

**The Algebra Miracle: The True Story of a High-Poverty School's Triumph in the Age of**

**Accountability** Stuart Alan Singer, 2012-02-21 A miracle is defined as a highly improbable or extraordinary accomplishment. The story of the Algebra program at JEB Stuart High School in Fairfax Virginia qualifies for such a designation. Over a period of fifteen years a series of ambitious no cost innovations which challenged the prevailing status quo in math education led to a set of academic accomplishments that were indeed improbable and extraordinary. This miracle was achieved by a high poverty ethnically diverse student body that was unique at the time but is now representative of schools found throughout the U S. For everyone touched by education from parents and students to teachers and administrators. The Algebra Miracle will provide insights into the complexity of finding a low cost formula for academic success in the tight budgetary times of the 21st century. This story serves as a model of what can be accomplished when a dedicated school staff commits its time energy and creativity to the needs of their students.

**The Multi-age Learning Community in Action** Barbara Cozza, 2017-09-18 As schools struggle to teach all students the multi age teaching and learning framework has emerged as one of today's most effective ways to structure schools. Multi age Learning Community (MAC) Program is a professional development program in action. It presents a framework that can transform schools from a graded system to a multi age learning environment. This multi age school targets students' individual and personal needs and allows students to excel and succeed. The school reform climate today focuses on schools of choice and building effective school environments. This multi age program creates a unique school niche that is marketable to families. Parents have the option of sending their children to schools that concentrate on achievement that best meets the needs of the learner without disrupting the mandates of the curricula. This book is intended to assist educators at all levels of all school organizations as well as give policymakers educators and parents the information on an effective school program. This book gives information on how to transform schools into multi age classrooms. This book is divided into four parts that explain both the theory and the practice of effective strategies for the multi age school program: Organizational Practice, Building Culture, Learning Processes and Assessment and Systemic Improvement. There are specific basic principles and practices that are integrated into a quality and effective framework discussed in the chapters of this book. Each chapter begins with a vignette based on my experiences in multiage schools and concludes with an educator's reflection to recap the concepts in the chapter. Each chapter also integrates snapshots that are short real to life passages that bring to life concepts discussed in the chapter. Although this book discusses multi age schools these ideas may be applied to all school environments. To accommodate all school programs at the end of each chapter a section titled Application for All Schools is a framework that discusses just how to apply chapter concepts in any school or classroom program. It is recommended that the reader review the book one time in sequence and then reread each chapter as needed to give meaning to the reader's purpose.
