SUPER HAIRO Nikki Cestaro, 2024-07-30 I've spent the last thirty five years of my life up to my elbows in hair From shampoo assistant to top stylist to owner of a hair salon for eighteen years I've seen this shaggy world evolve from simple beauty parlors to extravagant hair boutiques From dysfunctional workplaces and nutty clients to the joys and sorrows of salon ownership I feel it's finally time to lather up all the dirty details of what life is like behind the chair This is a life journal of my experience in the hair industry a compilation of stories and situations that I've experienced from years behind the chair and a road map on how to get through it to succeed All the good the bad and the hairy

**Practicing Mindfulness** Alice McIntyre, 2019-03-18 Much of the literature about stress and its effects on children is focused on how these various groups can learn how to cope adapt and or manage stress Practicing mindfulness on the other hand is about becoming familiar with how one responds to stress and as important how one can differentiate between stressors that generate beneficial actions and ones that escalate distress and discomfort It was the latter approach that characterized the year long mindfulness project that a group of racial ethnic and culturally diverse fifth graders in a local Boston public school participated in during the AY2016 2017 The facilitator of the project met with participating students for an average of 75 minutes once per week In large and small group discussions and numerous creative techniques and processes e.g. photography symbolic art the participants explored documented and assessed how they experienced various forms of mindfulness and how those processes informed their thinking emotions and actions As important participating in the project provided the young people with opportunities to become mindfulness ambassadors who brought mindfulness into their families school and respective communities Engaging in mindfulness practices provided the young people with opportunities to develop life long skillful ways to become familiar with their minds increase their self awareness more effectively respond to difficult thoughts and emotions and provide strategies to foster positive connections with others In addition sharing and exploring strategies for developing a mindful perspective contributed to creating an environment for learning that intersected with young people's capacity to be critical thinkers and thoughtful decision makers The greatest contribution of the book is that it is threaded with the voices of young girls and boys who speak about themselves their thoughts and emotions their experiences with fear anxiety success and failure with directness honesty and a confidence in their skills and abilities Their participation in the project demonstrates the possibilities classroom teachers have to integrate mindfulness practices into the school day As important teachers are invited to hone their own mindfulness practices to ensure that they are intentionally working with their own thoughts emotions and assumptions as they relate to the students they teach

**The Age of the Image** Stephen

Apkon,2013-04-16 An urgent erudite and practical book that redefines literacy to embrace how we think and communicate now We live in a world that is awash in visual storytelling The recent technological revolutions in video recording editing and distribution are more akin to the development of movable type than any other such revolution in the last five hundred years And yet we are not popularly cognizant of or conversant with visual storytelling s grammar the coded messages of its style and the practical components of its production We are largely in a word illiterate But this is not a gloomy diagnosis of the collapse of civilization rather it is a celebration of the progress we ve made and an exhortation and a plan to seize the potential we re poised to enjoy The rules that define effective visual storytelling much like the rules that define written language do in fact exist and Stephen Apkon has long experience in deploying them teaching them and witnessing their power in the classroom and beyond In *The Age of the Image* drawing on the history of literacy from scroll to codex scribes to printing presses SMS to social media on the science of how various forms of storytelling work on the human brain and on the practical value of literacy in real world situations Apkon convincingly argues that now is the time to transform the way we teach create and communicate so that we can all step forward together into a rich and stimulating future *UnSlut* Emily
