Arkansas was an economic powerhouse in the latter half of the twentieth century It was the largest employer in the
interconnected region of South Arkansas and North Louisiana surrounding El Dorado and the fates of many related
companies and farms depended on its continued financial success We Just Keep Running the Line is the story of the rise of
the poultry processing industry in El Dorado and the labor force composed primarily of black women upon which it came to
rely At a time when agricultural jobs were in decline and Louisiana stood at the forefront of rising anti welfare sentiment
much of the work available in the area went to men driving women into less attractive labor intensive jobs LaGuana Gray
argues that the justification for placing African American women in the lowest paying and most dangerous of these jobs like
poultry processing derives from longstanding mischaracterizations of black women by those in power In evaluating the
perception of black women as less than white women less feminine less moral less deserving of social assistance and less
invested in their families and communities well being Gray illuminates the often exploitative nature of southern labor the
growth of the agribusiness model of food production and the role of women of color in such food industries Using collected
oral histories to allow marginalized women of color to tell their own stories and to contest and reshape narratives commonly
used against them We Just Keep Running the Line explores the physical and psychological toll this work took on black women
analyzing their survival strategies and their fight to retain their humanity in an exploitative industry **Water**
