Cyberfeminism Bisexuality Jane Cyborg:

Cyberfeminism and Bisexuality Jane Cyborg, 2015-12 This is a short essay about cyberfeminism and bisexuality published as a book **Feminist Collections** University of Wisconsin System. Women's Studies Librarian, University of Wisconsin System. Gender & Women's Studies Librarian, 1999 *Radical Philosophy*, 1972 **Sociological Theory- Classical Statements** Dejerius Burgess, 2019-06-04 The basic insight of sociology is that human behaviour is largely shaped by the groups to which people belong and by the social interaction that takes place within those groups The main focus of sociology is the group not the individual Sociologist is mainly interested in the interaction between people the ways in which people act towards respond to and influence one another Sociology does not however study everything that happens in society or under social conditions Classical Sociological Theory continues to include two historical chapters covering the early history of the field as well as its most recent developments These chapters give students an overview that allows them to put the work of each theorist in its historical social and political context This book offers students a handy overview of most of what they need to know about classical sociological theory Cybersexualities Jenny Wolmark, 1999 Cyberspace the cyborg and cyberpunk have given feminists new imaginative possibilities for thinking about embodiment and identity in relation to technology This is the first anthology of the key essays on these potent metaphors Divided into three sections Technology Embodiment and Cyberspace Cybersubjects Cyborgs and Cyberpunks Cyborg Futures the book addresses different aspects of the human technology interface The extensive introduction surveys the ways cyborg and cyberspace metaphors have been used in relation to current critical theory and indicates the context for the specific essays This is an invaluable guide for students studying any aspects of contemporary theory and culture Brings together in a unique collection the work of key authors in feminist and cyber theory Demonstrates the wide range of contemporary critical work Challenges constructions of gender race and class An extensive introduction surveys the ways cyborg and cyberspace metaphors have been used in relation to current critical theory Brief section introductions indicate the context for the specific essays The Gendered Cyborg Gill Kirkup, 2000 Considers how the cyborg has been used in cultural representation from reproductive technology to sci fi and questions the power of the cyborg as a symbol which disrupts categories man machine and male female

Cybersexualities Jenny Wolmark, 1992 Cyberspace the cyborg and cyberpunk have given feminists new imaginative possibilities for thinking about embodiment and identity in relation to technology This is the first anthology of the key essays on these potent metaphors *Cyberfeminism and Artificial Life* Sarah Kember, 2003 Examining the construction manipulation and re definition of life in contemporary technoscientific culture this book aims to re focus concern on the ethics rather than on the nature of artificial life *Cyborg* Laura Forlano, Danya Glabau, 2024-02-06 A concise introduction to cyborg theory that examines the way in which technology is situated political and embodied This introduction to cyborg theory provides a critical vantage point for analyzing the claims around emerging technologies like automation robots and AI

Cyborg analyzes and reframes popular and scholarly conversations about cyborgs from the perspective of feminist cyborg theory Drawing on their combined decades of training teaching and research in the social sciences design and engineering education Laura Forlano and Danya Glabau introduce an approach called critical cyborg literacy Critical cyborg literacy foregrounds power dynamics and pays attention to the ways that social and cultural factors such as gender race and disability shape how technology is imagined developed used and resisted Forlano and Glabau offer critical cyborg literacy as a way of thinking through questions about the relationship between humanity and technology in areas such as engineering and computing art and design and health care and medicine as well as the social sciences and humanities Cyborg examines whether modern technologies make us all cyborgs if we consider for instance the fact that we use daily technologies at work have technologies embedded into our bodies in health care applications or use technology to critically explore possibilities as artists designers activists and creators Lastly Cyborg offers perspectives from critical race feminist and disability thinkers to help chart a path forward for cyborg theory in the twenty first century *An Analysis of Donna Haraway's A Cyborg Manifesto* Rebecca Pohl,2019-06-26 Haraway's A Cyborg Manifesto is a key postmodern text and is widely taught in many disciplines as one of the first texts to embrace technology from a leftist and feminist perspective using the metaphor of the cyborg to champion socialist postmodern and anti identitarian politics Until Haraway's work few feminists had turned to theorizing science and technology and thus her work quite literally changed the terms of the debate This article continues to be seen as hugely influential in the field of feminism particularly postmodern materialist and scientific strands It is also a precursor to cyberfeminism and posthumanism and perhaps anticipates the development of digital humanities

Cyberfeminism. Next Protocols Claudia Reiche,Verena Kuni,2004 Cyberfeminism Next Protocols invents and documents with approaches coming from art theory and activism a cyberfeminism which is dedicated to the wilderness of precise critique and experimental thinking It opens with the following questions What are the everyday embodied conditions of women's lives as they are being altered by the new technologies and communications networks What are new forms of oppression and of liberation Has the digital medium starting with the indecisiveness of the Turing test and in its latest form when calculation tasks have become autonomous data processing taken the place of the subject Can you tell Where do you or the machine end From this starting point develops a multifaceted very complex critique and analysis of the many intersections of power gender and technology in the digital age **TechnoFeminism** Judy Wajcman,2013-05-20 This timely and engaging book argues that technoscientific advances are radically transforming the woman machine relationship However it is feminist politics rather than the technologies themselves that make the difference TechnoFeminism fuses the visionary insights of cyberfeminism with a materialist analysis of the sexual politics of technology Technologies of the Gendered Body Anne Marie Balsamo,1996 On feminism and technology
