Development Democracy And Welfare States Latin America East Asia And Eastern Europe:

Development, Democracy, and Welfare States Stephan Haggard, Robert R. Kaufman, 2008-09-14 Comparing the welfare states of Latin America East Asia and Eastern Europe the authors trace the origins of social policy in these regions to political changes in the mid 20th century and show how the legacies of these early choices are influencing welfare reform following democratization and globalization *Haggard, Stephan; Kaufman, Robert: Development, Democracy, and Welfare States: Latin America, East Asia, and Eastern Europe* Kristin Nickel Makszin, 2009 **New Welfare States in East Asia** Gyu-Jin Hwang, 2011 The fast changing economic climate is creating substantial pressure for welfare state restructuring worldwide Yet the discussion regarding challenges faced and the responses required has been confined to the standard welfare states in the West This book examines whether these challenges also apply to the countries in the East whether these countries have generated different responses to their Western counterparts and whether they have undergone a process of regime transformation while responding to these pressures Comparative in approach this book offers lively discussion on the new social challenges faced in East Asia following the unprecedented scale of the recent global financial crisis It reaches beyond policy descriptions to offer more systematic analyses of welfare restructuring in the region in relation to the fast changing global economic order By examining the dynamics of welfare state restructuring both in terms of continuity and change it explores intensified impacts of global restructuring of welfare and the nature of welfare state adaptation in the region **ICSGS 2019** Muhammad Syaroni Rofii, Adis Imam Munandar, Danial Mohd. Yusof, 2020-11-13 The International Conference on Strategic and Global Studies is organized by the School of Strategic and Global Studies SSGS Universitas Indonesia The ICSGS conference is an annual meeting event involving lecturers students and researchers who are concerned with contemporary national and international issues that are directly related to the problems faced by the government and the private sector using a multidisciplinary approach Participants of this conference came from the ASEAN region and the global network of the Universitas Indonesia **New Democracy and Autocratization in Asia** Kuyoun Chung, Wonbin Cho, 2022-08-19 This book examines the quality of democracies in Asia and determines why current democracies especially during the so called new normal era following the 2008 financial crisis have become less stable and less resilient to increasing authoritarianism Based on the assumption that the concept of democracy consists of three elements procedure participation competition and distribution of power effectiveness representation accountability and responsiveness and performance social welfare inequality and trust the contributors to this book determine which elements are responsible for diverging trajectories within the Asian democratic recession Examining South Korea Japan Taiwan Singapore Vietnam Indonesia India Myanmar and China the authors employ different research methods quantitative comparative or individual case studies to explore the conditions under which democratic rules and norms erode over time and which type of governance is preferred by citizens in this region as an ideal type The book puts forward the argument that a procedure

oriented concept of democracy is not sufficient for understanding the source of democratic recession and develops a new concept of new democracy based on procedure effectiveness and performance. It also demonstrates to what extent the experience changes and how the countries respond to these changes. A novel contribution on the state of democracy in Asia written by experts from the region, this book will be of interest to academics in the field of political science especially comparative politics and international relations, regional study of East and Southeast Asia, sociology, public policy, economics and social science methods. Also, this book will appeal to think tanks and policy oriented researchers.

Routes to Reform Ben Ross Schneider, 2024. This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read on the Oxford Academic platform and offered as a free PDF download from OUP and selected open access locations. The key to sustained and equitable development in Latin America is high quality education for all. However, coalitions favoring quality reforms in education are usually weak because parents are dispersed, business is not interested, and much of the middle class has exited public education. In *Routes to Reform*, Ben Ross Schneider examines education policy throughout Latin America to show that reforms to improve learning, especially making teacher careers more meritocratic and less political, are possible. Several Andean countries and state governments in Brazil achieved notable reform since 2000, though on markedly different trajectories. Although rare, the first bottom-up route to reform was electoral. The second route was more top-down and technocratic, with little support from voters or civil society. Ultimately, by framing education policy in a much broader comparative perspective, Schneider demonstrates that, contrary to much established theory, reform outcomes in Latin America depended less on institutions and broad coalitions but rather due to the emptiness of the education policy space on more micro factors like civil society organizations, teacher unions, policy networks, and technocrats.

Inequality After the Transition Ekrem Karakoç, 2018-10-03. *After the Transition* is an all-encompassing examination of the origins, increase, and persistence of inequality in new democracies. It challenges the conventional thinking found in much of the democratization inequality literature and offers a new theory. It speaks simultaneously to literature of democratization, party systems, social policy, and inequality to explain why democracies are not able to fulfill their promise to

the disadvantaged and why they cannot achieve income equality It investigates social policy programs such as pensions unemployment benefits and other social transfers in Poland and the Czech Republic in Post Communist Europe and Turkey and Spain in Southern Europe The volume traces the origins and development of social policy from the formation of nation states to the present and considers how different political regimes whether totalitarian post totalitarian or authoritarian designed welfare policies to prioritize civil servants and the working classes in formal sectors at the expense of the majority poor It then demonstrates how these legacies perpetuate and widen disparities in access to welfare policies and thus income inequality in countries where low mobilization by the poor and unstable party systems prevail This study employs interviews with Polish Czech Turkish and Spanish union leaders bureaucrats and business people while also conducting an original survey in Turkey to dissect the linkage between organized groups and parties Employing a multi method approach two paired case studies on these countries also demystify why and how new populist parties have successfully appealed to voters and affected the trajectory of social policy party systems and inequality Comparative Politics is a series for researchers teachers and students of political science that deals with contemporary government and politics Global in scope books in the series are characterised by a stress on comparative analysis and strong methodological rigour The series is published in association with the European Consortium for Political Research For more information visit www.ecprnet.eu The series is edited by Emilie van Haute Professor of Political Science Universit libre de Bruxelles Ferdinand M ller Rommel Director of the Center for the Study of Democracy Leuphana University and Susan Scarrow John and Rebecca Moores Professor of Political Science University of Houston

Inequality and Democratic Politics in East Asia Chong-Min Park, Eric M. Uslaner, 2019-07-31 Bringing together scholars of inequality both inside and outside of Asia this book examines how the distribution of income has affected political institutions representation and behaviour in Asia Through detailed data analysis the international team of contributors engages with the existing literature arguing that the connection between inequality and political institutions is much more complex than has been suggested by previous studies from outside the region Instead Inequality and Democratic Politics in East Asia demonstrates that the micro level evidence for the correlation between inequality and democracy is mixed and the impact of distributive politics is conditioned not only by institutional but also by historical and geopolitical factors As such this volume suggests that the median voter theorem and simplified partisan models

prove to be ineffectual in accounting for distributive politics in East Asia Analysing history structure and context to further understand the politics of inequality in East Asia this book will be invaluable to students of Asian politics as well as students of inequality democracy and political economy more widely *Routledge Handbook of Brazilian Politics* Barry Ames,2018-10-25 With contributions from leading international scholars this Handbook offers the most rigorous and up to date analyses of virtually every aspect of Brazilian politics including inequality environmental politics foreign policy economic policy making social policy and human rights The Handbook is divided into three major sections Part 1 focuses on mass behavior while Part 2 moves to representation and Part 3 treats political economy and policy The Handbook proffers five chapters on mass politics focusing on corruption participation gender race and religion three chapters on civil society assessing social movements grass roots participation and lobbying seven chapters focusing on money and campaigns federalism retrospective voting partisanship ideology the political right and negative partisanship five chapters on coalitional presidentialism participatory institutions judicial politics and the political character of the bureaucracy and eight chapters on inequality the environment foreign policy economic and industrial policy social programs and human rights This Handbook is an essential resource for students researchers and all those looking to understand contemporary Brazilian politics

Political Parties and Electoral Clientelism Sergiu Gherghina,Miroslav Nemčok,2023-09-26 Contemporary political parties often use state resources to win elections In this context electoral clientelism evolved from the straightforward vote buying to sophisticated exchanges in which the relationship between patrons parties or candidates and clients voters is sometimes difficult to grasp We address the question how do the distributive politics and electoral clientelism interact how these forms of interactions differ across various context and what implications they bring for the functioning of political systems The special issue provides theoretical methodological and empirical contributions to the burgeoning literature about the multifaceted feature of electoral clientelism It unfolds the complex relationship between distributive politics and clientelism and conceptualizes electoral clientelism as a dynamic process that occurs through different sequences It enriches the methodological tools aimed at investigating electoral clientelism Finally the special issue approaches clientelism from several perspectives and brings together substantive empirical evidence about the varieties of clientelism around the world

Effective and Sustainable Redistribution **The Political Economy of Extractivism** Hannes Warnecke-Berger, Jan Ickler, 2023-07-21 For many countries primarily in the Global South extractivism the exploiting and exporting of natural resources is big business For those exporting countries natural resource rents create hope and promise for development which can be a seductive force This book explores the depth of extractivism in economies around the world The contributions to this book investigate the connection between the political economy of extractivism and its impact on the sociopolitical fabric of natural resource exporting societies in Asia Africa Latin America and Eastern Europe The book engages with a comparative perspective on the persistence of extractivism in these four different world regions The book focuses on the formative power of rents and argues that rents are seductive The individual contributions flesh out this seductive force of rents on different political scales and how this seduction affects a variety of actors The book investigates how these actors react to the prevalence of rent how they align or break with specific political and economic strategies and how myths of resource driven development play out on the ground The book therefore underlines that rent theory bridges current debates in different area communities and offers fresh insights into extractivist societies social economic and political dynamics This book will be of significant interest to readers in political economy political science development studies and area studies
