Development In Asia Development In Asia:

The Asian Development Experience Seiji Naya, 2002 Stressing that now more than ever Asia is a region largely integrated into the global economy this book details how integration has brought with it many benefits such as rapid economic growth and openness in trade investment and knowledge diffusion Also explored is how integration has heightened the region's vulnerability to regional and international developments such as the Asian financial crises *States and Development in the Asian Pacific Rim* Richard P. Appelbaum, Jeffrey William Henderson, 1992-03-13 This book is an edited volume of eleven chapters that focus on state policy and its consequences for economic development and social transformation in East Asia The introductory chapter anticipates the conclusions of the chapters to follow arguing that an adequate explanation of the Asian miracle East Asian Development Model Shiping Hua, Ruihua Hu, 2014-12-17 Given the impressive growth in East Asia after World War II initially led by Japan the region's development models have been scrutinized since the 1980s The shared Confucian cultural heritage strong government guidance and export led economies were often cited as contributors to the impressive growth However major changes have taken place in Asia on and around the turn of the century Japan experienced two decades of economic slow down while World Bank figures reveal that China is poised to become the largest economy in the world in 2014 overtaking the United States Bearing this in mind is it even possible to formulate an East Asian development model in the context of a shifting twenty first century And if so what is it This book addresses this issue by looking at the economic political and cultural perspectives of China Japan and South Korea focusing on dynamism and potential consensus regarding an East Asian development model The chapters offer a historical background to the East Asian development model as well as in depth case studies of each of the countries concerned to show that whilst the East Asian development model does have distinct characteristics as compared with other areas and other countries may draw some insights from the East Asian experience it is not a panacea that fits all circumstances and fits all times This book will be welcomed by students and scholars of Asian economics Asian politics international political economy and development studies **Future Perspectives On The Economic Development Of Asia** John Malcolm Dowling, 2007-12-17 The future growth and development of Asia the most dynamic economic region in the world today will have important implications for the rest of the global economy This book offers a futuristic perspective of a wide array of developmental challenges and opportunities facing Asian economies over the next two decades The future is approached from several different developmental paradigms including technological change and innovation regional cooperation within Asia and between Asia and the West poverty reduction ethics and corruption and environmental challenges Future prospects for the two giant economies of China and India are also explored By offering a comprehensive look at the medium term future of Asia from such a wide range of different viewpoints this fascinating book will interest economists social scientists politicians international investment managers and the general public alike *The Future of Asia in the World Economy*

Asian Development Bank, Organisation for Economic Co-operation and Development. Development Centre, 1998 This book is a calmer look at Asian economies than has usually been produced in the midst of the current frenzy about financial crises among the Asian Tigers and a somewhat more reassuring one without being overly optimistic **Economic and Social Development in Pacific Asia** Chris Dixon, David W. Smith, 2002-09-26 There can be no doubt that Japan remains unchallenged as the economic giant of the Pacific However the economies of East and South East Asia are increasingly becoming integrated into a broad Pacific Asia region which contains most of the world's fastest growing economies In *Economic and Social Development in Pacific Asia* a group of world authorities set the area in its global context and examine the economic emergence of the region In so doing they illustrate that despite superficial similarities there have been many more differences and it is not possible to offer a model of Asian development The authors also challenge the perceived wisdom that this dynamic growth is the result of laissez faire market led economies They argue that on the contrary there has been a great deal of government intervention and this growth is actually a result of a policy of guiding the market ***Asian Development*** William E. James, Seiji Naya, Gerald M. Meier, 1989 While the world's attention has been focused on the spectacular economic success of Japan and Korea the less developed countries of Asia have often been neglected *Asian Development* closes the gap In nontechnical style and with minimal mathematics it presents an in depth perspective on the economic development of fourteen countries in East Southeast and South Asia *Asian Development* is mainly a story of success Though some problems remain Asian countries have shown remarkable resilience in responding to sharp changes in the international economy oil shocks world recession and inflation exchange rate and interest rate fluctuations and rapid technological change The authors conclude that their ability to adjust to changing external conditions is closely related to intelligent governmental policies Looking back they comment In the past growth of the United States and Japan pulled up the growth rates of the smaller economies in the region Looking forward they predict In the future increasingly it will be the growth of the Asian developing countries that acts as a catalyst to growth in the more advanced economies ***Economic Development in China, India and East Asia*** Kartik Chandra Roy, Hans-Christer Blomqvist, Cal Clark, 2012-01-01 This is an unusually rich and comprehensive comparative analysis of industrialisation and development in Asia Drawing on the diverse experiences of Malaysia Singapore China India and more Roy Blomqvist and Clark skilfully tease out the common institutional threads and the subtle differences in their developmental trajectories An essential reading for all those interested in the lessons from Asian development Jude Howell London School of Economics UK This is a thorough and comprehensive study both in terms of country coverage and in depth analysis covering the economic development of all the major economies in the Asian continent namely China India Japan South Korea Taiwan Malaysia and Singapore Before embarking on analyses of different aspects of economic growth and development of these countries the authors present a thought provoking analysis of how institutional factors such as geography history of religion culture and political governance

have been deeply interwoven with development dynamics to shape the growth and development trajectory that each country has subsequently followed Each country s development path consequently appeared almost be pre determined Japan s role as the lead country in technology transfer under the flying geese pattern of development is discussed however the emphasis has shifted of late to China India Korea Malaysia and Singapore the authors also propose that instead of discussing the failure of India to catch up with China in growth and development outcomes economists should be commenting on whether China bestowed with India s highly decentralized democratic governance structure and institutional rigidities would have been able to achieve the same results as that of India Only then will a true understanding and appreciation of India s achievements in economic growth and development emerge Economic Development in China India and East Asia will be warmly welcomed and appreciated by academics and researchers of international and development economics as well as Asian development and economics Policy makers and those involved in NGOs in the development and aid arenas will also find this of great interest

East Asian Development Yılmaz Akyüz,1999 Comprises fove papers which examine the success of economic development in South East and East Asia in the period from the 1950s to the early 1990s Argues that this success was built on a strong accumulation dynamic rather than market efficiency Includes a paper on administrative reform in South Korea and Taiwan

East Asian Development Experience Tōru Yanagihara,Susumu Sambommatsu,1997 Divides into 4 parts East Asian development experience and its applicability present conditions and challenges of Latin American development the applicability of the East Asian development experience to African countries and economic system and the role of government

Asian Development Gerald Tan,2000

Critical Issues in Asian Development Muhammad Ghulam Quibria,1995 Focusing on Asia site of the world s most dynamic economies Critical Issues in Asian Development brings new insights to long standing debates in development economies and international trade theory The book s ten contributors each a leading authority in the field clearly and succinctly address themes relevant both to the countries of Asia and the rest of the developing world Environmental preservation and sustainable development are the topics of the chapter by Partha Dasgupta who analyzes the impacts on the natural environment of market and government failures and entrenched poverty Robert Repetto continues with a discussion of related dynamics as he considers the influences of trade liberalization on sustainable development

Asian Development John P. Lewis,1987-09-16 Official Development Aid ODA nonmilitary support given to developing countries by donor governments seeking to influence development has been provided to Asian countries since soon after World War II The Asian record provides a variety of perspectives on the interplay between two functions that aid programs can play one as a deliverer of resources the other as an influencer of recipient government policies This book discusses the general conclusions that emerge Co published with the Asia Society

Migration and Remittances for Development Asia Asian Development Bank,The World Bank,2018-05-01 Asia and the Pacific has a significant rise in migration about one in three migrants comes from Asia according to the United Nations Currently over 80 million people

from Asia and the Pacific live and work outside of their countries of origin Migration and remittances have both positive and negative effects For the countries remittances became an important source of foreign exchange At the household level remittances enable families to spend more on education and health However migration also has a negative social impact including the exploitation and abuse of workers This report explores ways to enhance the welfare of migrant workers as well as ways to improve the productive investments of remittances to support the countries growth and development

Development Asia—Deepening Divide: Can Asia Beat the Menace of Rising Inequality? Asian Development Bank, 2013-04-01 Development Asia examines Asia's widening inequality from many different perspectives It looks at the role of globalization in producing inequality and considers the disputed relationship between inequality and economic growth Beneath the gloss of Asia's newfound prosperity lies an unsettling reality Rising inequality has denied the benefits of Asia's economic growth to many millions of its citizens The problem is worsening as the region's rich get richer much faster than the poor who miss out on the income education and health care they need to lead fulfilling lives Asia isn't the only region suffering from a wealth gap but unlike others it has failed so far to narrow the divide Most of its large economies have shown rising income inequality since the 1990s and rural poverty is outpacing urban poverty across much of the continent If left unchecked the consequences of this trend could be dire In this issue Development Asia examines Asia's widening inequality from many different perspectives It looks at the role of globalization in producing inequality and considers the disputed relationship between inequality and economic growth The Dynamics of Asian Economic Development Hitoshi

Hirakawa, Ferdinand C. Maquito, 2024-12-10 One feature of this book is the clarification of the development mechanism of Asia as a regional economy for over half a century based on an Asian Economy Within the Global Economy approach that goes beyond the single country analytical framework The development of emerging economies has caught the world's attention from the Newly Industrializing Countries or Newly Industrializing Economies of the 1980s to the BRICs entering this century General economics cannot clarify the internal mechanism of the changing of newly industrialized economies led by Asia This book clarifies such regional development structure by focusing on the direct investments of multinational firms and the importance of gradual changes of specific policies adopted by newly industrialized economies Moreover the book concretely deals with the US China trade war and China's Belt and Road Initiative BRI as a problem of Asian economies In so doing the book not only perceives the structural change of the global economy as a structural change from a US centric global economy of the twentieth century to a China centric one but also focuses on the birthing of a new growth frontier in the world economy under a crisis brought about by a war for hegemony between the US and China The investment initiative through China's BRI has prompted the investment competition between Japan and the US which has made even stronger the possibility of giving birth to a new economic frontier in Afro Eurasia Another feature is the consideration of various issues that confront Asian countries in their search for economic development using the Philippines as a case study The analysis of

the study points to the importance of a shared growth perspective which is based on an Asian development model and discusses the challenge of overcoming the issues of the economic development model within the region At the same time this book studies the significance and new issues as a region of the economy and overseas policies of attention drawer China

Development Asia—Beyond the MDGs Asian Development Bank,2013-11-01 This issue of Development Asia discusses the post 2015 development agenda and its implications for Asia and the Pacific The Millennium Development Goals MDGs have served humanity well They galvanized global attention for helping the world s poor and vulnerable In less than 3 years a new development agenda will take up the challenge of delivering a sustainable future for humanity The successor goals will benefit from the MDG s focus But they must accomplish much more in a world that has changed dramatically since the MDGs were conceived A global conversation is underway to frame the new goals It s early days but the vision is bold a world without acute poverty where the marginalized lead productive lives and where economic growth doesn t strain the planet to breaking point The goals will likely be universal measurable few in number and easily understood The developing world s strong voice in the consultation process is likely to result in goals that are both emphatic and far reaching The post 2015 development agenda and the goals that will drive it will be a moment of truth for the world This issue of Development Asia goes further into these pivotal issues and their implications for Asia and the Pacific
