Development, Security and Unending War Mark R. Duffield, 2011

Development, Security and Unending War Mark Duffield, 2013-08-23 According to politicians we now live in a radically interconnected world Unless there is international stability even in the most distant places the West's way of life is threatened In meeting this global danger reducing poverty and developing the unstable regions of the world are now imperative In what has become a truism of the post Cold War period security without development is questionable while development without security is impossible In this accessible and path breaking book Mark Duffield questions this conventional wisdom and lays bare development not as a way of bettering other people but of governing them He offers a profound critique of the new wave of Western humanitarian and peace interventionism arguing that rather than bridging the lifechance divide between development and underdevelopment it maintains and polices it As part of the defence of an insatiable mass consumer society those living beyond its borders must be content with self reliance With case studies drawn from Mozambique Ethiopia and Afghanistan the book provides a critical and historically informed analysis of the NGO movement humanitarian intervention sustainable development human security coherence fragile states migration and the place of racism within development It is a must read for all students and scholars of development humanitarian intervention and security studies as well as anyone concerned with our present predicament

The Oxford Handbook of the International Law of Global Security Robin Geiß, Nils Melzer, James Gerard Devaney, 2021 A unique overview of the relationship between international law and global security Major areas of coverage include armed conflict human rights the environment and technology Book jacket

The Politics and Policies of Relief, Aid and Reconstruction Fulvio Attina, 2012-10-15 Disaster policies present a new challenge to the practitioners and students of global politics this book explains how political science enriches the contribution of the social sciences to the study of disaster relief aid and reconstruction following the major disaster events both natural and man made of recent times

Understanding Emerging Security Challenges Ashok Swain, 2013 This book offers an overview of emerging security challenges in the global environment in the post Cold War era After the fall of the Berlin Wall and the subsequent shifting of international political environment a new broader concept of security began to gain acceptance This concept encompassed socio economic environmental challenges such as resource scarcity and climate change water sharing issues deforestation and forest protection measures food and health security and large population migration The book examines the causes and consequences of these emerging security threats and retains a critical focus on evolving approaches to address these issues The author attempts to develop a framework for sustainable security in a rapidly changing global political landscape which

seeks to bring states and societies together in a way that addresses weaknesses of the evolving international system Moreover through a detailed analysis of the emerging security issues and their pathways the book further argues that the evolving processes not only pose critical challenges but also provide remarkable opportunity for cooperation and collaboration among and within various stakeholders This book will be of much interest to students of global security war and conflict studies peace studies and IR in general

Human Rights and Sovereign Standards in US Security Sarah Earnshaw, 2025-03-31 This book examines the history of human rights in US security imaginaries and provides a theoretical framework to explore the common sense assumptions around US foreign relations and the universality of the human The inability or unwillingness to provide fundamental freedoms is a central feature in the US presentation of postcolonial spaces as failed and rogue states as nodes of disorder and instability that are then subject to increasingly pre-emptive pacification While largely focused on contemporary history from the post WWII Universal Declaration to drone war the author critically engages with longer entwined histories such as Westphalian mythology humanitarian intervention and imperial aerial policing Bridging history law politics culture and war the theoretical bounding of the regime of truth offers a fresh reading for those knowledgeable on human rights and as security policy This volume will be of value to students and scholars of American Studies history critical International Relations IR human rights history and those interested in conceptions of liberty and US foreign relations

Rethinking Peace and Security Paula Duarte Lopes, Stephen Villanueva Ryan, 2009-01-01 During ten days in July 2008 around fifty students and a dozen professors from twelve different European universities met at the University of Coimbra for the Fifth Intensive Seminar of the European Doctorate Enhancement Programme on Peace and Conflict EDEN and discussed the new dimensions of peace and security studies Their contributions reflect the research agendas of a new generation who continue to address enduring themes in peace and conflict studies but whose formative influences are those of a complex post Cold War world

The Globalization of Foreign Aid Liam Swiss, 2017-12-01 Why do aid agencies from wealthy donor countries with diverse domestic political and economic contexts arrive at very similar positions on a wide array of aid policies and priorities This book suggests that this homogenization of policy represents the effects of common processes of globalization manifest in the aid sector Drawing on both quantitative and qualitative analysis of policy adoption the book argues that we need to examine macro level globalizing influences at the same time as understanding the micro level social processes at work within aid agencies in order to adequately explain the so called emerging global consensus that constitutes the globalization of aid The book explores how global influences on aid agencies in Canada Sweden and the United States are mediated through micro level processes Using a mixed methods approach the book combines cross national statistical analysis at the global level with two comparative case studies which look at the adoption of common policy priorities in the fields of gender and security The Globalization of Foreign Aid will be useful to researchers of foreign aid development international relations and globalization as well as to the aid policy community The

Critical Perspectives on Human Security David Chandler, Nik Hynek, 2010-09-13 This new book presents critical approaches towards Human Security which has become one of the key areas for policy and academic debate within Security Studies and IR. The Human Security paradigm has had considerable significance for academics, policy makers and practitioners. Under the rubric of Human Security, security policy practices seem to have transformed their goals and approaches re-prioritising economic and social welfare issues that were marginal to the state-based geopolitical rivalries of the Cold War era. Human Security has reflected and reinforced the reconceptualisation of international security both broadening and deepening it and in so doing it has helped extend and shape the space within which security concerns inform international policy practices. However, in its wider use, Human Security has become an amorphous and unclear political concept, seen by some as progressive and radical and by others as tainted by association with the imposition of neo-liberal practices and values on non-Western spaces or as legitimizing attacks on Iraq and Afghanistan. This book is concerned with critical perspectives towards Human Security, highlighting some of the tensions which can emerge between critical perspectives which discursively radicalise Human Security within frameworks of emancipatory possibility and those which attempt to deconstruct Human Security within the framework of an externally imposed attempt to regulate and order the globe on behalf of hegemonic power. The chapters gathered in this edited collection represent a range of critical approaches which bring together alternative understandings of human security. This book will be of great interest to students of human security studies and critical security studies, war and conflict studies and international relations.

Decentring Security Mark Bevir, 2018-12-07 Contemporary security governance often relies on markets and networks to link public agencies to non-governmental actors. This book explores the rise, nature and future of these new forms of security governance across various domestic, transnational and international settings. The chapters reveal similarities and differences in the way security governance operates in various policy settings. The contributors argue that the similarities generally arise because policy elites at various levels of governance have come to believe that security depends on building resilience and communities through various joined-up arrangements, networks and partnerships. Differences nonetheless persist because civil servants, street-level bureaucrats, voluntary sector actors and citizens all draw on diverse traditions to interpret and at times resist the joined-up security being promoted by these policy elites. This book therefore decentres security governance, showing how all kinds of local traditions influence the way it works in different settings. It pays particular attention to the meanings, cultures and ideologies by which policy actors encounter, interpret and evaluate security dilemmas. This book was originally published as a special issue in *Global Crime*.

Routledge Handbook of International Statebuilding David Chandler, Timothy D. Sisk, 2013-09-02 This new Handbook offers a combination of theoretical, thematic and empirical analyses of the statebuilding regime, written by leading international scholars. Over the

past decade international statebuilding has become one of the most important and least understood areas of international policy making Today there are around one billion people living in some 50 60 conflict affected fragile states vulnerable to political violence and civil war The international community grapples with the core challenges and dilemmas of using outside force aid and persuasion to build states in the wake of conflict and to prevent such countries from lapsing into devastating violence The Routledge Handbook of International Statebuilding is a comprehensive resource for this emerging area in International Relations The volume is designed to guide the reader through the background and development of international statebuilding as a policy area as well as exploring in depth significant issues such as security development democracy and human rights Divided into three main parts this Handbook provides a single source overview of the key topics in international statebuilding Part One Concepts and Approaches Part Two Security Development and Democracy Part Three Policy Implementation This Handbook will be essential reading for students of statebuilding humanitarian intervention

Nurses Cleovi C. Mosuela, 2020-05-14 Sitting at the nexus of labor migration and health care work this book examines the dynamic relationship between nurses cross border movement and efforts to regulate their migration Grounded in multi sited qualitative research this volume analyzes the changing social dimensions and transnational scale of global nursing focusing particularly on the recruitment from the Philippines to Germany The flow of nursing skills from resource poor countries to well off ones is not only producing a global care crisis but also serves as a prime example of the international race for talent and skill As it takes a critical eye to the emerging field of migration governance or management as the preferred policy response to competing discourses of global care crises and the global competition for skilled care work this book highlights not only the shifting web of actors discourses and practices in care work migration management but also and more importantly how various forms of care figure in the global migration of nurses *Security Unbound* Jef

Huysmans, 2014-05-09 Security concerns have mushroomed Increasingly numerous areas of life are governed by security policies and technologies Security Unbound argues that when insecurities pervade how we relate to our neighbours how we perceive international politics how governments formulate policies at stake is not our security but our democracy Security is

not in the first instance a right or value but a practice that challenges democratic institutions and actions We are familiar with emergency policies in the name of national security challenging parliamentary processes the space for political dissent and fundamental rights Yet security practice and technology pervade society heavily in very mundane ways without raising national security crises in particular through surveillance technology and the management of risks and uncertainties in many areas of life These more diffuse security practices create societies in which suspicion becomes a default way of relating and governing relations ranging from neighbourhood relations over financial transactions to cross border mobility Security Unbound demonstrates that governing through suspicion poses serious challenges to democratic practice Some of these challenges are familiar such as the erosion of the right to privacy others are less so such as the post human challenge to citizenship Security unbound provokes us to see that the democratic political stake today is not our security but preventing insecurity from becoming the organising principle of political and social life

Between Security Markets and Protection Rackets Marc von Boemcken, 2013-02-20 Security is a social practice which constitutes different formations of political order Developing a political economy of security practice the author distinguishes these formations with a view to the actual exchanges between various providers and receivers of security services He thus departs from a popular perspective in political science which charts ongoing transformations in the global security landscape along a series of categorical divisions between state and non state or between the public and the private A more rewarding analytical perspective conceives the two most dominant security formations in the contemporary world as either based on commercial or on compulsory relations

Routledge Handbook of Security Studies Myriam Dunn Cavelty, Thierry Balzacq, 2016-07-01 This revised and updated second edition features over twenty new chapters and offers a wide ranging collection of cutting edge essays from leading scholars in the field of Security Studies The field of Security Studies has undergone significant change during the past 20 years and is now one of the most dynamic sub disciplines within International Relations This second edition has been significantly updated to address contemporary and emerging security threats with chapters on organised crime migration and security cyber security energy security the Syrian conflict and resilience amongst many others Comprising articles by both established and up and coming scholars The Routledge Handbook of Security Studies provides a comprehensive overview of the key contemporary topics of research and debate in the field of Security Studies The volume is divided into four main parts Part I Theoretical Approaches to Security Part II Security Challenges Part III Regional In Security Part IV Security Governance This new edition of the Handbook is a benchmark publication with major importance for both current research and the future of the field It will be essential reading for all scholars and students of Security Studies War and Conflict Studies and International Relations

War and the Body Kevin McSorley, 2013 This book places the body at the centre of critical thinking about war giving embodiment and bodily issues an analytic recognition they have often been denied in the annals and ontology of conventional war scholarship Page 1

Food Aid in Sudan

Susanne Jaspars, 2018-05-15 In 2004 the UN's Humanitarian Coordinator for Sudan called Darfur the world's worst humanitarian crisis. A comprehensive food aid programme soon followed, at the time the largest in the world. Yet by 2014, while the crisis continued, international agencies found they had limited access to much of the population, with the Sudanese regime effectively controlling who received aid. As a result, acute malnutrition remains persistently high. Food Aid in Sudan argues that the situation in Sudan is emblematic of a far wider problem. Analysing the history of food aid in the country over fifty years, Jaspars shows that such aid often serves to enrich local regimes and the private sector while leaving war-torn populations in a state of permanent emergency. Drawing on her decades of experience as an aid worker and researcher in the region and extensive interviews with workers in the food aid process, Jaspars brings together two key topics of our time: the failure of the humanitarian system to respond to today's crises and the crisis in the global food system. Essential reading for students and researchers across the social sciences studying the nature and effectiveness of contemporary humanitarianism, development and international aid.

Human Security as Statecraft Nik Hynek, 2012-02-20 This book critically investigates the discourses and practices of human security and aims to delve below the stereotypical imageries representing them. Drawing on Foucault and Deleuze, the author approaches human security from a new perspective with the aim of ascertaining what has been behind and underneath a certain spatio-temporal articulation of human security and with what political implications and consequences. Each human security assemblage is composed of messy discourses and practices which are loosely related and sometimes even disconnected. This book examines the Canadian and Japanese articulations of human security and establishes the kinds of structural terrains that have enabled, shaped or blocked the unfolding of these versions of human security. The pivotal contention of the book is that Canadian and Japanese articulations of human security have been different because they have grown from completely different domestic economies of power governing the relationship between the state apparatus and the non-profit and voluntary sector. While the Canadian human security assemblage has been shaped by transformations in the country's advanced liberal model of government, the Japanese has been shaped by the continuities of Japan's bureaucratic authoritarianism. A novel approach is employed for the related process tracing a general series linking structural conditions with actual articulations of the human security projects and their further development, including analysis of their unintended consequences. This book will be of much interest to students of Critical Security Studies, human security, global governance, foreign policy and IR Security studies.
