Junior Certificate, 1981 A Radical History of Development Studies Uma Kothari, 2016-12-15 In this book some of the leading thinkers in development studies trace the history of their multi disciplinary subject from the late colonial period and its establishment during decolonization all the way through to its contemporary concerns with poverty reduction They present a critical genealogy of development by looking at the contested evolution and roles of development institutions and exploring changes in development discourses These recollections by those who teach research and practise development challenge simplistic unilinear periodizations of the evolution of the discipline and draw attention to those ongoing critiques of development studies including Marxism feminism and postcolonialism which so often have been marginalized in mainstream development discourse The contributors combine personal and institutional reflections with an examination of key themes including gender and development NGOs and natural resource management The book is radical in that it challenges orthodoxies of development theory and practice and highlights concealed critical discourses that have been written out of conventional stories of development The contributors provide different versions of the history of development by inscribing their experiences and interpretations some from left inclined intellectual perspectives Their accounts elucidate a more complex and nuanced understanding of development studies over time simultaneously revealing common themes and trends and they also attempt to reposition Development Studies along a more critical trajectory The volume is intended to stimulate new thinking on where the discipline may be moving It ought also to be of great use to students coming to grips with the historical continuities and divergences in the theory and practice of development **Building Development Studies for**

Dictating Development Jonathan T. Kriekhaus,2010-06-15 Dictating Development presents a powerful and original analysis of how colonialism has profoundly impacted the varying economic growth of developing nations While previous studies have focused primarily on the domestic neoliberal policies of government and the political capacity of developing states Dictating Development argues that economic growth is equally influenced positively and negatively by colonial powers Jonathan Kriekhaus examines both historic colonial influences on human capital and state structures as well as contemporary ones war market access and foreign aid Based on an in depth study of the regionally diverse nations of Mozambique Korea and Brazil and a statistical analysis of growth in ninety one countries from 1960 to 2000 Kriekhaus effectively demonstrates that most seemingly domestic political variables are in fact the byproduct of relationships with colonial powers While not denying the role of neoliberalism as an important factor in development Dictating Development reveals the roots of these policies how colonialism influences the very nature of government and societal productivity
