Evaluation

Methodologies for Aid in Conflict Ole Winckler Andersen,Beate Bull,Megan Kennedy-Chouane,2013-12-13 Knowledge and rigorous evidence around the role of external development partners in situations of conflict and fragility is still lacking There is little accountability for the billions in aid being spent in places like Afghanistan Iraq and the Democratic Republic of Congo This book analyses evaluation theory and practice in order to help fill this knowledge gap and advocates a realistic and rigorous approach to evaluating international engagement Through a series of case studies this book highlights both the promise and potential pitfalls of taking a more evaluative approach to understanding aid in conflict regions These illustrate the methodological and analytical approach taken by researchers working to understand the results and effectiveness of conflict prevention and peacebuilding support While well grounded in current theoretical and methodological debates the book provides valuable practical information by examining how and why different choices were made in the context of each evaluation The book shows what future steps may be envisaged to further strengthen evaluations of support for conflict prevention and peacebuilding The analysis draws on a wealth of perspectives and voices to provide researchers and students in development studies and conflict and peace studies as well as development evaluators with a deep and broad understanding of evaluation methods and approaches

System-Theoretical Urban Development Manfred Rolfes,Jan Lorenz Wilhelm,2024-02-26 In their book the authors introduce the topic of urban development from a systems

theoretical perspective and provide explanatory approaches tips and methodological instructions for dealing with urban complexity Knowing full well that this sometimes amounts to squaring the circle the authors draw on applied systemic approaches and systematically couple these with epistemological currents that can be assigned to Luhmann's systems theory The social understanding of this theory of social systems represents a very good starting point for understanding urban development and urban complexity From this perspective urban development can be seen as a process in which organisations and individuals with their own expectations and perspectives are involved in which contradictions and conflicts seem inevitable and the future cannot be clearly predicted Decisions in cities and municipalities are therefore always associated with risks irritations and unexpected consequences With the Potsdam lodestar approach Rolfes and Wilhelm present a multidimensional approach to managing urban development processes The approach distinguishes five process dimensions which are presented chapter by chapter and linked with recommendations The individual chapters are structured along guiding questions and feature appealing visualizations and numerous bonus materials

Evaluating Environment in International Development Juha I. Uitto, 2014-04-24 More than twenty years after the Earth Summit was held in Rio de Janeiro in 1992 both national and international actors in governmental and nongovernmental fields are still searching for insights into how sustainable development can be advanced and environmental concerns incorporated into the development agenda more effectively Moreover climate change has emerged as a preeminent challenge to both the environment and to development Evaluating Environment in International Development provides international perspectives and in depth knowledge of evaluating development and the environment and applies evaluation knowledge to climate change mitigation and adaptation The book focuses on the approaches and experiences of leading international organizations not for profits and multilateral and bilateral aid agencies to illustrate how systematic evaluation is an essential tool for providing evidence for decision makers It provides novel and in depth perspectives on evaluating environment and sustainability issues in developing countries Moving beyond projects and programmes it considers aspects such as evaluating normative work on the environment and evaluating environmental consequences of economic and social development efforts This original collection should be of interest to scholars of environment studies development studies international relations sustainable development and evaluation as well as practitioners in international organizations and development and environmental NGOs

Evaluation Management Tessie Tzavaras Catsambas, E. Jane Davidson, 2023-12-08 Evaluation Management How to Commission and Conduct Evaluations that Matter helps evaluation teams and commissioners achieve results that meet utilization and organizational learning goals and inform positive change for programs and communities Tessie Tzavaras Catsambas and E Jane Davidson provide insights on both the tactical and strategic levels of evaluation management using approaches and skills from project management administration and logistics budgeting team management leadership development communication coaching systems thinking and negotiation They also demonstrate how intentionality for equity

sustainability and culturally responsive practices is essential for ensuring an evaluation's relevance and enhancing productive stakeholder engagement. With plenty of practical guidance from many years of experience, the authors provide a valuable resource for student readers, experienced evaluators, and commissioners of evaluation.

Unity from Diversity
Ray W. Cooksey, 2024-07-15

This book is about the choices that researchers can make when building knowledge in social and behavioural spaces. Knowledge is the unity we seek, and given that social and behavioural research is a human endeavour focusing on human lives and experiences, there are diverse and ever-evolving pathways towards achieving that unity. Any one pathway will only ever yield partial glimpses into human life, and diversity of potential choices serves to enrich, expand, and enlarge those glimpses in pursuit of more complete understanding. The book shows that researchers and the researched are far more connected than disconnected in this world, and those connections are spread out through a network of interlinked complex systems. The book argues that pluralist systemic thinking provides the means by which a researcher's methodological choices for navigating the Data Triangle (comprising data source, data gathering, and data analysis strategies) and the learning they provide can be fully and robustly contextualised with respect to those systems and the expectations and influences that emerge from them. Such contextualisations facilitate the refinement, augmentation, and/or narrowing of those choices during the researcher's journey. Anticipating choices downstream may have implications for more immediate choices, and more immediate choices may create a cascade of necessary downstream choices. An essential part of contextualisation involves making choices about patterns of guiding assumptions, modes of knowledge building, and research frames. Researchers must develop the capacity to be flexible and adapt to unanticipated emergent events, obstacles, and political influences, making trade-offs where necessary throughout their research journey, always with an eye on both feasibility and quality. Importantly, research has no meaning unless the researcher can ensure that it connects with intended audiences via specific research outcomes, especially since the ultimate judgments about the convincingness, meaningfulness, quality, and utility of the research are vested in those audiences. Throughout the book, special attention is devoted to the roles that stakeholders and gatekeepers play in shaping the researcher's journey, as well as to what can be learned from Indigenous First Nations perspectives on social and behavioural research.

Sustainable Development in Organizations
Mattias Elg, Per-Erik Ellström, Magnus Klofsten, Malin Tillmar, 2015-11-27

An increasingly competitive environment can lead to considerable problems for many organizations as they struggle to adapt to change. As a result, they fail to create the conditions that can lead to sustainable development over the long term, thus affecting the capabilities of employees. This book provides a fresh perspective on sustainable change and development in organizations, as well as a critical perspective on lean implementation, work environment, and sustainability. The expert contributors address the development in and of organizations, as well as the development process between organizations, such as in networks or clusters. They discuss topics such as the role of customers in the development of public organizations, developing knowledgeable practice at work,

exploring evidence based practice and the challenge of regional gender contracts Undergraduates and postgraduates in different management fields including organizational theory innovation human resources quality development and entrepreneurship will find this book to be of interest The empirical results and interdisciplinary approach will appeal to practitioners and policy makers at national as well as international levels
