Practice Albert R. Roberts Professor of Social Work and Criminal Justice Rutgers University, Kenneth R. Yeager Director of Quality and Operational Improvement Ohio State University Medical School, 2006-01-07 This concise introduction to evidence-based social work practice culls the most salient chapters from the interdisciplinary Evidence Based Practice Manual to form a student-friendly overview of the issues and interventions they will encounter throughout their BSW or MSW program. Part I defines terms and critical issues, introducing students to the language and importance of evidence-based practice and critical thinking. Chapters will explain how to search for evidence, how to evaluate what evidence really is, how to ask the right questions, how to develop standards, and how practitioners make use of research. Part II consists of practical applications with each chapter focusing on a particular intervention or population. Topics include cognitive behavioral approaches to suicide risks, manualized treatment with children, treating juvenile delinquents, and interventions for OCD, anxiety disorders, substance abuse, PTSD, depression, and recovery. Several chapters from the special edition of *Brief Treatment Crisis Intervention on evidence-based practice* as well as two original chapters round out this much-needed introduction to evidence-based social work practice. Contemporary Internal Medicine Juan M. Bowen, Ernest L. Mazzaferri, 2013-06-29

In the previous two volumes of this series we presented classic problems in internal medicine as illustrated by actual cases cared for in our institution. It has been gratifying for us to see the interest that these volumes have generated with students and trainees. We remain committed to the case method of instruction and believe that there is no better method to learn medicine than to have an individual patient problem as the basis for study of pathophysiology, natural history, diagnosis, and management. We hope that our readers find this third volume as enjoyable and instructive as the editors found it. Juan M. Bowen MD, Ernest L. Mazzaferri MD FACP. xiii Acknowledgement The editors are grateful to Jeff Smith and Jenny Riegler for their unflagging professionalism and patience. xiv Contents Case 1 Mitral Regurgitation Chronic Versus Acute Implications for Timing of Surgery 1 Harisios Boudoulas MD, Charles F. Wooley MD. Advances and diagnostic imaging in a surgical technique have changed the approach to mitral valve regurgitation. This chapter provides an expert's perspective. Case 2 Cystic Fibrosis in Adults 36 Andrew Libertin MD, John S. Heintz MD. As children with cystic fibrosis grow into adulthood, the internist assumes a greater role in their care. Case 3 Thrombotic Thrombocytopenic Purpura 51 Donald E. Thornton MD, Earl N. Metz MD FACP. Patients with ITP continue to present difficulties in diagnosis and management. Two experts discuss the current approach to ITP.
