Parenting Beyond Power Jen Lumanlan, MS, MEd, 2023-09-05 I'm in love with this book It illuminates the forces that make parenting so difficult and helps us develop better relationships with our kids and ourselves Hunter Clarke Fields MSAE author of Raising Good Humans Parenting is hard But when we replace conventional parent child power dynamics with collaboration family life gets easier today and we create a better world for all of us in the future When we see our children stalling resisting having tantrums using mean words and hitting we want to just make it stop But conventional discipline methods like time outs countdowns and consequences teach children that it's OK for more powerful people to control others a lesson they take out into the world This is how we learned White supremacy patriarchy and capitalism from our parents and we will replicate this with our children unless we make a different choice Research based parenting educator Jen Lumanlan offers a simple yet

revolutionary framework for rethinking our relationships with children This new approach helps us to look beneath challenging behaviors to find and meet children s needs and ours too perhaps for the first time in our lives It involves empathetic listening understanding feelings and underlying needs and problem solving with our children to find solutions to conflicts that work for everyone Family life becomes radically easier in the short term because behavior problems tend to melt away In the long term we ll raise children who confidently advocate for themselves and treat others with profound respect Includes sample scripts flowcharts and resources to help parents learn and implement this new approach The compassionate guidance will be a boon to parents eager to move away from punitive child rearing strategies Publisher s Weekly

The Mathematical Corporation Josh Sullivan,Angela Zutavern,2017-06-06 The most powerful weapon in business today is the alliance between the mathematical smarts of machines and the imaginative human intellect of great leaders Together they make the mathematical corporation the business model of the future We are at a once in a decade breaking point similar to the quality revolution of the 1980s and the dawn of the internet age in the 1990s leaders must transform how they run their organizations or competitors will bring them crashing to earth often overnight Mathematical corporations the organizations that will master the future will outcompete high flying rivals by merging the best of human ingenuity with machine intelligence While smart machines are weapon number one for organizations leaders are still the drivers of breakthroughs Only they can ask crucial questions to capitalize on business opportunities newly discovered in oceans of data This dynamic combination will make possible the fulfillment of missions that once seemed out of reach even impossible to attain Josh Sullivan and Angela Zutavern s extraordinary examples include the entrepreneur who upended preventive health care the oceanographer who transformed fisheries management and the pharmaceutical company that used algorithm driven optimization to boost vaccine yields Together they offer a profoundly optimistic vision for a dazzling new phase in business and a playbook for how smart companies can manage the essential combination of human and machine

New Trends in 3D Printing Igor Shishkovsky,2016-07-13 A quarter century period of the 3D printing technology development affords ground for speaking about new realities or the formation of a new technological system of digital manufacture and partnership The up to date 3D printing is at the top of its own overrated expectations So the development of scalable high speed methods of the material 3D printing aimed to increase the productivity and operating volume of the 3D printing machines requires new original decisions It is necessary to study the 3D printing applicability for manufacturing of the materials with multilevel hierarchical functionality on nano micro and meso scales that can find applications for medical aerospace and or automotive industries Some of the above mentioned problems and new trends are considered in this book
