The Happiness Problem Sam Wren-Lewis,2019-11-28 We appear to have more control over our lives than ever before If we could get things right the perfect job relationship family body and mind then we'd be happy With enough economic growth and technological innovation we could cure all societal ills The Happiness Problem shows that this way of thinking is too simplistic and can even be harmful no matter how much progress we make we will still be vulnerable to disappointment loss and suffering The things we do to make ourselves happy are merely the tip of the iceberg Sam Wren Lewis offers an alternative process that acknowledges insecurity and embraces uncertainty Drawing on our psychological capacities for curiosity and compassion he proposes that we can connect with and gain a deeper understanding of the personal and social challenges that define our time

Saving the Art of Medicine Allen Sussman,2023-01-30 In his deeply thoughtful book Dr Sussman provides an expansive view of the field and all that being a healer entails Sharing stories from his training as well as practice drawing on data from a wealth of studies and including a nuanced discussion of clinical trials he argues that medicine should be more than just the treatment of a diseased or broken body part Rather physicians must respect the complex interrelationships of mind body and spirit seeking always to connect the part to the whole Saving the Art of Medicine starts with the history of medicine in shamanic times and culminates in a discussion of how a doctor heals even at the time of death It delves into a multitude of phenomena such as nonpharmacological pathways to health the doctor patient connection and the power of our minds Comprehensive and multifaceted the book is a profound acknowledgment of the art of medicine and unveils an extraordinary potential within the field Underpinning all is the idea that open mindedness humility and compassion play an integral role Only by cultivating these virtues can doctors achieve the highest levels of well being for their patients and meet their own full potential as healers Dr Sussman's journey and his inspiring vision of medicine as a combined science and art make this a must read for medical

students doctors and anyone interested in improving their own medical care and the healthcare system at large **The Power of Placebos** Jeremy Howick,2023-11-14 The history philosophy ethics and science behind the placebo and nocebo effects Placebos are the most widely used treatments in the history of medicine Thousands of studies show that they can be effective and make us happier and healthier Yet confusion about what placebos are and how to measure their effects prevents some doctors from using them to help patients Meanwhile damage caused by the nocebo effect the negative effect of expecting something bad is not widely recognized In **The Power of Placebos** Jeremy Howick provides an interdisciplinary perspective on placebos and nocebos based on more than twenty years of research and data from over 300 000 patients This book the culmination of that research offers practical ways for researchers policymakers and doctors to put placebo and nocebo research into practice to improve health outcomes In addition to providing an overview of placebos and nocebos and explaining how belief systems and context can create physiological effects in the body Howick advocates for a number of controversial positions including why it may be unethical to include placebos in most clinical trials in which there are already established therapies and why physicians should consider using placebos regularly in their practices Howick also underscores the importance of the therapeutic effects of interactions between health care practitioners and patients in the context of care **The Power of Placebos** dispels the confusion surrounding placebos and paves the way for doctors to help patients by enhancing placebo effects and avoiding the pitfalls of nocebos

Well-Grounded Kelly Lambert,2018-09-25 A neuroscientist reveals unique aspects of decision making and the best strategies for protecting and enhancing the brain s ability to navigate life s uncertainties Contingency calculations the ability to predict the outcomes of decisions and actions are critical for survival and success Our amazing brains continually process past and current experiences to enable us to make the most adaptive choices But when the brain s information systems are compromised by such varying conditions as drug addiction poverty mental illness or even privilege we can lose the ability to arrive at informed decisions In this engaging book behavioral neuroscientist Kelly Lambert explores a variety of the modern factors that can lead to warped neural processing or distorted realities she terms brain bubbles Individuals who define success in terms of creature comforts and immediate gratification for instance may interact less with the physical and social world and thereby dull their ability to imagine varied contingency scenarios The author underscores how continuous meaningful and well grounded experiences are required if we are to make the best decisions throughout our lives

Deftly edited by theologian Sarah Coakley *Spiritual Healing* offers a composite narrative that investigates the many intermingled factors at work in this intriguing phenomenon. The result is a human story as much as it is a theological one satisfying discerning believers and skeptics alike in its rigorous pursuit of truth and meaning. **The Scientist and the Psychic** Christian Smith, 2020-12-29 Weaving together the story of his fractured relationship to his mother with research into her paranormal abilities Dr Christian Smith has created in *The Scientist and the Psychic* a captivating one of a kind memoir of belief skepticism and familial love. Christian Smith realized his mother was different in the autumn of 1977 when he was eight years old. Before then he'd witnessed séances at home and the kids at school sometimes teased him about his mom being a witch so he sensed that his life wasn't typical. But it wasn't until he was backstage at a renowned concert venue in Toronto watching from behind a curtain as Geraldine commanded an audience of 2 000 with her extrasensory readings that he understood she was special. As Geraldine's only child he would assume the role of the quiet observer while she guided a live CBC broadcast of a séance made startling and consistently accurate predictions and eventually moved to LA to work with the parents of murder victims and with convicted murderer Jeffrey R MacDonald. Over time the high profile and emotionally depleting work affected Geraldine's health and relationships. Addiction took over her life and her son pulled away. Fast forward to the present day Christian is a molecular biologist and Geraldine is retired and in poor health. They are closer than they've ever been and now he gives us the story of her undeniable perceptual abilities and pioneering work as a psychic and endeavours to make scientific sense of it. **The Mystery of Evolutionary Mechanisms** Robert F. Shedinger, 2019-06-28 Is Darwinian evolution really the most successful scientific theory ever proposed or even the best idea anyone has ever had as Daniel Dennett once put it *The Mystery of Evolutionary Mechanisms* provides a comprehensive critical reading of the literature of evolutionary biology from Darwin to Dobzhansky to Dawkins revealing this popular account of evolution to be a grand narrative of Darwinian triumph that greatly overstates the empirical validity of modern evolutionary theory. The mechanisms driving the evolutionary process truly remain a mystery more than one hundred fifty years after *Origin of Species* a fact that can free religion scholars to think in more creative ways about the positive contributions religious reflection might make to our understanding of life's origin and diversity. *The Mystery of Evolutionary Mechanisms* calls for an embrace of mystery understood not as an abdication of the scientific quest for truth but as a courageous and humble acknowledgment of the limits of human reason and an openness to a fundamentally religious orientation toward life.
