Curious Ian Leslie, 2014-08-26 A fun yet provocative look at the importance of staying curious in an increasingly indifferent world Everyone is born curious But only some retain the habits of exploring learning and discovering as they grow older Those who do so tend to be smarter more creative and more successful But at the very moment when the rewards of curiosity have never been higher it is misunderstood and undervalued and increasingly monopolized by the cognitive elite A curiosity divide is opening up In *Curious* Ian Leslie makes a passionate case for the cultivation of our desire to know Drawing on fascinating research from psychology economics education and business Leslie looks at what feeds curiosity and what starves it and finds surprising answers Curiosity is a mental muscle that atrophies without regular exercise and a habit that parents schools and workplaces need to nurture Filled with inspiring stories case studies and practical advice *Curious* will change the way you think about your own mental life and that of those around you

Dream Factories Ken S. Coates,Bill Morrison,2016-05-14 Two professors look at the mystique around universities and the consequences of credentialism For decades we have promoted the idea that a university degree is a passport to future career success Ken Coates and Bill Morrison argue that the over promotion of higher education and university degrees is actually undermining the lives of young people saddling them with enormous debts and costing governments huge amounts of money As the young flock to universities in ever increasing numbers fewer of them than ever find the elusive good jobs that they are pursuing In fact many of those jobs no longer exist We are in the midst of a youth employment crisis that is global in proportion and we are facing serious misunderstandings about the unfolding career prospects for young adults entering a world of rapid technological change Ken Coates and Bill Morrison explore the impacts of universities turning out graduates with the wrong skills and the consequences of vanishing job opportunities

Leadership for a New World Professor Pierre Casse, 2022-02-09. *Leadership for a New World* compiled by Professor Pierre Casse is a compendium of different perspectives by a group of nine renowned thought leaders. The aim of the book is to provide readers with the opportunity to reflect on the current evolution of leadership as we rise to meet the challenges we face in our world today. The world in which we find ourselves in the second decade of the new millennium appears beset by a widening range of intractable challenges which the authors explore drawing on their research and first hand experiences of leadership in action in an extraordinarily complex world. The intention is to encourage readers to reflect on what leadership is becoming as we continue to face such enormous existential challenges which by their very nature necessitate a continual questioning of established assumptions and understanding of what leadership is in an ever changing global environment. Through a series of thought provoking chapters and related self assessment exercises the reader is encouraged to challenge their own experiences and frames of reference and in so doing clarify the kind of leadership that is essential for our continued survival for a new world in the making.

Hearing God in Conversation Sam Williamson,2016-06-27 I picked it up out of curiosity and I couldn t put it down Eugene Peterson Christians are comfortable saying that Christianity is about a relationship with God Yet many might also say that they sense little meaningful relationship with God in their own lives After all the foundation of good relationship is communication but conversation with God often seems to go only one way We may sing of walking and talking with God in the garden His voice falling on our ears but few have heard that beloved voice themselves Sam Williamson acknowledges the fundamental human longing to hear God s voice and offers a hopeful supposition God is always speaking we ve just never been taught how to recognize His voice Williamson handles this potentially heady topic with his characteristic straightforwardness and leavening humor This book deftly bridges the gap between solid biblical theology and practical application addressing topics such as

how to truly pray without ceasing how to brainstorm with God how to navigate our emotions how to answer God's questions and how to hear God's voice for others Hearing God in Conversation offers simple step by step lessons on how to hear God Williamson begins with Scripture meditation He then expands the practice of listening for that voice everywhere in the checkout line on the job in a movie theater and even in silence From there he demonstrates how to hear God's guidance when making any decision By the end readers eyes and ears will be opened to the limitless methods through which God speaks

Political Tribalism in America Timothy J. Redmond, 2022-10-27 The democratic ideal demands that the citizenry think critically about matters of public import Yet many Democrats and Republicans in the United States have fallen short of that standard because political tribalism motivates them to acquire perceive and evaluate political information in a biased manner The result is an electorate that is more extreme hostile and willing to reject unfavorable democratic outcomes In this work the author provides a host of actionable strategies that are designed to reduce the influence of political tribalism in our lives The text includes instructions for plumbing the depths of political views evaluating sources of political information engaging in difficult political conversations appraising political data and assessing political arguments The first of its kind this how to guide is a must read for partisans who want to become more critical political thinkers Restorative Literacies Deborah L. Wolter, H. Richard Milner, IV, 2021 This book applies the principles of restorative justice to literacy education Restorative literacies are designed to help educators reach repair and restore the literacies of our most disenfranchised and disengaged students in all classrooms through the recognition and expansion of students experiences and literacies they bring to school Restorative literacies aim to create a community of care that involves students teachers administrators student's families and principals so that all students experience racially culturally linguistically and economically responsive authentic and engaging instruction in multiple forms of literacies The practice of restorative literacies focuses on building and strengthening positive relationships between the backgrounds and perspectives as well as the variable skills proficiencies and fluencies of readers the multiple texts readers encounter and the authors of such texts through an intentional system of response repair and restoration in an educational setting *A More Beautiful Question* Warren Berger, 2014-03-04 To get the right answer in business in life you have to ask the right question Innovation expert Warren Berger shows it's both an art and a science Making Kids Cleverer David Didau, 2018-12-20 In Making Kids Cleverer A manifesto for closing the advantage gap David Didau reignites the nature vs nurture debate around intelligence and offers research informed guidance on how teachers can help their students acquire a robust store of knowledge and skills that is both powerful and useful Foreword by Paul A Kirschner Given the choice who wouldn't want to be cleverer What teacher wouldn't want this for their students and what parent wouldn't wish it for their children When David started researching this book he thought the answers to the above were obvious But it turns out that the very idea of measuring and increasing children's intelligence makes many people extremely uncomfortable If some people were more intelligent where

would that leave those of us who weren't The question of whether or not we can get cleverer is a crucial one If you believe that intelligence is hereditary and environmental effects are trivial you may be sceptical But environment does matter and it matters most for children from the most socially disadvantaged backgrounds those who not only have the most to gain but who are also the ones most likely to gain from our efforts to make all kids cleverer And one thing we can be fairly sure will raise children's intelligence is sending them to school In this wide ranging enquiry into psychology sociology philosophy and cognitive science David argues that with greater access to culturally accumulated information taught explicitly within a knowledge rich curriculum children are more likely to become cleverer to think more critically and subsequently to live happier healthier and more secure lives Furthermore by sharing valuable insights into what children truly need to learn during their formative school years he sets out the numerous practical ways in which policy makers and school leaders can make better choices about organising schools and how teachers can communicate the knowledge that will make the most difference to young people as effectively and efficiently as possible David underpins his discussion with an exploration of the evolutionary basis for learning and also untangles the forms of practice teachers should be engaging their students in to ensure that they are acquiring expertise not just consolidating mistakes and misconceptions There are so many competing suggestions as to how we should improve education that knowing how to act can seem an impossible challenge Once you have absorbed the arguments in this book however David hopes you will find the simple question that he asks himself whenever he encounters new ideas and initiatives Will this make children cleverer as useful as he does Suitable for teachers school leaders policy makers and anyone involved in education
