Current Issues In Victimology Research Second Edition:

Controversies in Victimology Laura J. Moriarty, 2008-10-01 *Controversies in Victimology* features original works of noted scholars and practitioners aiming to shed light on the debates over the media attention on and the psychology behind victimization. This book discusses the controversies from all sides of the debate and attempts to reconcile the issues in order to move the field forward. Organized around topical areas focusing on 10 specific issues, Academic experts and professionals in varied fields examine controversial issues.

Current Issues in Victimology Research Laura J. Moriarty, Robert A. Jerin, 2007 Research on crime victims issues is a relatively new phenomenon in the criminal justice field. With the birth of victimology in the late 1940s and early 1950s, research focused on victim-offender relationships and victim culpability. It has only been in the last few decades that researchers have both studied the effects of crime upon the victim and analyzed the services provided to the crime victim. In *Current Issues in Victimology Research*, Moriarty and Jerin provide an understanding of the criminal act's impact upon individuals and society through recent research. The book provides the criminal justice field with a foundation for grasping the complexities of crime victimization. *Current Issues in Victimology Research* serves well as a textbook for a victimology course or as a companion to any traditional text book. This new edition features the works of noted scholars and practitioners in the field who summarize the existing literature on victimology and its sub-areas. Many of the chapters represent topical areas not covered in other volumes, and the original research contained in the chapters has not been published elsewhere. Moreover, each chapter represents a thorough, comprehensive and up-to-date view of its subject matter. The eighteen chapters address current issues in victimology research, including victim services, victim perceptions of crime severity, effectiveness of batterer intervention programs, the intimidated witness, hate crimes, adolescent victimization, elder abuse, youth internet victimization, child fatality, campus crime, female stalkers, missing persons, and media responses, repeat victimization, curriculum development for victim assistance, academies, truancy, corrections-based restorative justice programs.

Victimology Leah E. Daigle, 2017-06-21 *Victimology: A Text Reader, Second Edition* engages students with the most current cutting-edge articles published in the field of victimology as well as connects them to the basic concepts. Unlike existing victimology textbooks, this unique combination of published articles with original material presented in a mini-chapter format puts each topic into context so students can develop a better understanding of the extent, causes, and responses to victimization. Students will build a foundation in the history and development of the field of victimology, will be shown the extent to which people are victimized and why, will learn the specific types of victimization and will witness the interaction between the criminal justice system and victims today.
