**PLTW**

## **PLTW Gateway - Curriculum**

DEVELOP AND ENCOURAGE STUDENTS' CONTINUED EXCITEMENT  
IN STEM

Through topics like coding and robotics, flight and space, and DNA and crime scene analysis, middle school students engage their natural curiosity and imagination in creative problem solving. PLTW Gateway is a strong foundation for further STEM learning in high school and beyond, challenging students to solve real-world challenges, such as cleaning oil spills and designing sustainable housing solutions. Using the same advanced software and tools as those used by the world's leading companies, students learn how to apply math, science, technology, and engineering to their everyday lives.

PLTW Gateway is divided into independent units, assuming a 45-minute class period. PLTW Gateway is designed to be taught in conjunction with a rigorous academic curriculum. Schools that offer the program implement both foundation units and may add any combination of the specialization units.

**One Nation Under Taught** Vince M. Bertram, Steve Forbes, 2014-11-18 Encourage students to fall in love with learning again by giving them the tools they need to succeed America has been steadily sliding in global education rankings for decades In particular our students are increasingly unable to compete globally in STEM science technology engineering and math fields According to the National Assessment of Education Progress NAEP in 2010 only 26 percent of high school seniors in the U S scored at or above proficient level in math Another 36 percent were failing Only 3 percent scored at an advanced level in math and only 1 percent scored at an advanced level in science The reason for this decline These subjects are often poorly presented or badly taught leading to students K 12 struggling to connect with the content One Nation Under Taught offers a clear solution providing a blueprint for helping students thrive in STEM subjects and giving them the tools needed to succeed and go on for further study in these fields The book challenges our whole way of thinking about education and encourages educators and policy makers at all levels to work together to make our schools places that promote curiosity and inspire a love of learning If we do not

change course we will set our students and our country on the path to a lifetime of poverty But if we can implement the reforms Dr Bertram suggests we can achieve long lasting prosperity for our children and our nation as a whole
