Curriculum Models For The 21st Century Using Learning Technologies In Higher Education:

Curriculum Models for the 21st Century Maree Gosper,Dirk Ifenthaler,2013-08-28 Changing student profiles and the increasing availability of mainstream and specialized learning technologies are stretching the traditional face to face models of teaching and learning in higher education Institutions too are facing far reaching systemic changes which are placing strains on existing resources and physical infrastructure and calling into question traditional ways of teaching through lectures and tutorials And with an ever increasing scrutiny on teaching and teachers accountability for positive educational outcomes the call for closer attention to learning teaching and most especially to the design and delivery of the curriculum is given increasing relevance and importance Research provides strong evidence of the potential for technologies to facilitate not only cognition and learning but also to become integral components in the redesign of current curriculum models Some Universities and individual academics have moved along this pathway developing new and innovative curriculum blending pedagogies and technologies to suit their circumstances Yet there are others unsure of the possibilities the opportunities and constraints in these changing times Curriculum Models for the 21st Century gives insights into how teaching and learning can be done differently The focus is on a whole of curriculum approach looking at theoretical models and examples of practice which capitalize on the potential of technologies to deliver variations and alternatives to the more traditional lecture based model of University teaching   Globalization George Yungchih Wang,2019-10-23 Globalization is a process of interaction and integration among people businesses institutions and governments of different countries in many aspects surrounding human lives It is not a threat to sovereignty or a form of Westernization This book discusses international economics and globalization explores global business strategies deliberates business ethics and corporate social responsibility and examines other related aspects from a global perspective   **OECD Digital Education Outlook 2021 Pushing the Frontiers with Artificial Intelligence, Blockchain and Robots** OECD,2021-06-08 How might digital technology and notably smart technologies based on artificial intelligence AI learning analytics robotics and others transform education This book explores such question It focuses on how smart technologies currently change education in the classroom and the management of educational organisations and systems   Shaping the University of the Future Stephen James Marshall,2018-01-02 This book focuses on developing an understanding of the complex interplay of forces acting on individual universities and higher education systems to enable leaders and practitioners to take purposeful and strategic action It explores the challenging landscape of higher education and the pressures that are reshaping the university as a societal institution describing the complex interplay of technological sociological political and economic forces driving change The issues analysed are global in scope reflecting the diversity of contexts but also the common nature of the challenges facing institutions individually and collectively The analysis draws on the lessons learnt and evidence from over fifty organisational case studies undertaken by the author over the past decade exploring organisational change in higher

education institutions in New Zealand Australia the United States and the United Kingdom and on his engagement as president of the ACODE organisation with colleagues responsible for learning technological change in Australasia The book helps institutions respond to technological change purposefully in ways that build upon a clear understanding of the complex nature of the existing institution its students and the organisational context *Research Anthology on Developing Critical Thinking Skills in Students* Management Association, Information Resources,2020-10-02 Learning strategies for critical thinking are a vital part of today s curriculum as students have few additional opportunities to learn these skills outside of school environments Therefore it is essential that educators be given practical strategies for improving their critical thinking skills as well as methods to effectively provide critical thinking skills to their students The Research Anthology on Developing Critical Thinking Skills in Students is a vital reference source that helps to shift and advance the debate on how critical thinking should be taught and offers insights into the significance of critical thinking and its effective integration as a cornerstone of the educational system Highlighting a range of topics such as discourse analysis skill assessment and measurement and critical analysis techniques this multi volume book is ideally designed for teachers instructors instructional designers curriculum developers education professionals administrators policymakers researchers and academicians
