*Developing Australia's Regions* Andrew Beer, Alaric Maude, Bill Pritchard, 2003 This is a book that recognises that regions matter what takes place in our diverse regions fundamentally determines the nation's quality of life It delves behind the headlines and speeches and considers the true state of Australia's metropolitan and non metropolitan regions and what can be done to improve their economic social and environmental wellbeing This practical book draws upon regional development theory and national and international experience to set out the principles and strategies that can be used to establish a stronger future for our regions back cover

*Regional Development in Australia* Robyn Eversole, 2015-12-22 In Australia regions are not just geographic locations they are also cultural ideas Being regional means being located outside the nation's capital cities and in the periphery of its centres of power and influence Regional development in Australia is thus significantly different than its European or American counterparts However surprisingly little has been written about the unique dynamics of development in Australia's regions this book has been written to fill this gap In recent decades the Australian government has made repeated policy efforts to achieve sustainable development in its non metropolitan areas Over the same period those who live and work outside the nation's capital cities have come to identify as regional Australians This book takes an anthropological approach to understanding the particularities of regional development in Australia It draws upon rich on the ground observations of towns industries universities development organisations and communities across different settings to provide an in depth understanding of the subject This book will be of interest to researchers and practitioners concerned with regional development and policy

**OECD Regional Development Studies Broad-based Innovation Policy for All Regions and Cities** OECD, 2020-10-15 This publication summarises the main findings of a series of high level expert workshops organised with support by the European Commission to deepen the understanding how OECD countries can move towards a broad based form of innovation policy for regions and cities Weaknesses in technology and knowledge diffusion are weighing on productivity growth and innovation in OECD countries particularly in firms that are distant from the technological frontier global or national This in turn weakens their capacity to meet future challenges and undermines inclusive growth

*Developing locally* Beer, Andrew, Haughton, Graham, 2003-11-26 Throughout the developed world governments have invested substantial sums in local and regional economic development Many have spent heavily on local development agencies and strategies to bolster competitiveness within world markets What has been the impact of these actions How effective are the strategies and processes employed by development agencies How well funded are development efforts in one nation compared to another and how are their objectives defined This book addresses these questions It explores the impact and functioning of economic development agencies makes a unique contribution to the emerging literature on economic development agencies by reporting on the results of a cross national survey of economic development practitioners compares the institutional architectures of economic development in Australia England the United States and Northern Ireland analyses how these institutional arrangements affect individual agencies and their regions This book is intended for a wide audience including economic development practitioners local government officers officials within national or state governments and academics It provides the reader with a greater appreciation of how local and regional economic development systems operate in different economies and aids understanding of what makes the economic development system in each nation unique It challenges ideas about the uniformity of economic development efforts and encourages practitioners and policy makers to experiment with and explore strategies used elsewhere **Developing Locally ,**

these conflicts and show why attempts to eliminate regional disparities within nations have been largely unsuccessful This volume is a highly readable comprehensive survey of the literature and current debates in the fields of regional economics development policy and planning *Essays on Regional Economic Development* Greg Coombs,2001 There is no doubt that globalisation is a major external influence on small regions These essays show how small regions need not be passive players swept away on the current of change that there are actions that can be taken to navigate a path and ride the currents to prosperity

**Regional Advantage and Innovation** Susan Kinnear,Kate Charters,Peter Vitartas,2012-12-04 Regional areas are key building blocks of society in many countries This compilation uses Australian case study examples to demonstrate how regional areas are uniquely well placed to contribute to national goals in innovation infrastructure provision water and food security environmental sustainability industry diversification healthy and liveable communities and natural disaster preparedness and response Each of these themes is examined in the context of using innovative approaches from regions to deliver outcomes that are nationally significant Authorship is drawn from a balance of leading practitioners and academics to provide stories that are both engaging and rigorous The case studies are contextualised by an analysis of regional advantage literature discussion on the regional policy implications and lessons and commentary around the key trends and drivers for innovation and regional advantage in Australia The book provides a convincing argument that focusing on regional innovation and development offers significant benefits to a nation as a whole
