**Developing Early Literacy** National Early Literacy Panel

(U.S.), 2008 **Handbook of Early Literacy Research** David K. Dickinson, Susan B. Neuman, 2007-05-02 Current research

increasingly highlights the role of early literacy in young children's development and informs practices and policies that promote success among diverse learners. The Handbook of Early Literacy Research presents cutting edge knowledge on all aspects of literacy learning in the early years. Volume 2 provides additional perspectives on important topics covered in Volume 1 and addresses critical new topics: the transition to school, the teacher-child relationship, sociodramatic play, vocabulary development, neuroimaging work, Vygotskian theory, findings from international studies and more. *Developing Early Literacy* National Early Literacy Panel (U.S.), 2008. *Developing Early Literacy* Christopher J. Lonigan, Timothy Shanahan, 2009. The National Assessment of Educational Progress reveals that 37 percent of U.S. fourth graders fail to achieve basic levels of reading achievement. In 1997 the U.S. Congress asked that a review of research be conducted to determine what could be done to improve reading and writing achievement. The resulting Report of the National Reading Panel Teaching Children to Read NICHHD 2000 has been influential in helping to guide reading education policy and practice in the United States. However that report did not examine the implications of instructional practices used with children from birth through age 5. To address this gap in the knowledge base the National Early Literacy Panel NELP was convened. The panel was asked to apply a similar methodological review process to that used by the National Reading Panel NRP to issues of instructional practices for young children so that parents and teachers could better support their emerging literacy skills. The NELP report represents a systematic and extensive synthesis of the published research literature concerning children's early literacy skills. It provides educators and policymakers with important information about the early skills that are implicated in later literacy learning as well as information about the type of instruction that can enhance these skills. The results also identify areas in which additional research is needed. The meta-analyses conducted by the panel showed that a wide range of interventions had a positive impact on children's early literacy learning. **Developing Early Literacy** National Early Literacy Panel (U.S.), 2008. **Early Literacy Skills** Katharine Bodle, 2017-07-05. Designed to help children showing early signs of dyslexia or a specific learning difficulty, these activities will also benefit older children who lack a foundation of early literacy skills. It is invaluable for teachers, learning support assistants, nursery workers, parents and carers.
