volume in the ICP Series on Climate Change Impacts Adaptation and Mitigation Handbook of Climate Change and Agroecosystems Global and Regional Aspects and Implications is published jointly by the American Society of Agronomy Crop Science Society of America and Soil Science Society of America and Imperial College Press The ongoing series is dedicated to elucidating the actual and potential impacts of climate change and to formulating effective responses to this global challenge It is designed to inform spur and integrate the work of leading researchers in the major regions of the world and to further international cooperation in this crucial field Handbook Of Climate Change And Agroecosystems: The Agricultural Model Intercomparison And Improvement Project (Agmip) Integrated Crop And Economic Assessments — Joint Publication With Asa, Cssa, And Sssa (In 2 Parts) Daniel Hillel, Cynthia Rosenzweig, 2015-02-13 Top agricultural scientists from around the world have taken up the challenge of sustainable agriculture with the specific focus on integrating agronomic climatological biophysical and socio economic perspectives and processes Every chapter of the Handbook contributes to addressing the growing food security challenges facing the world Foreword by Jeffrey Sachs Director of the Earth Institute at Columbia University Climate effects on agriculture are of increasing concern in both the scientific and policy communities because of the growing population and the greater uncertainty in the weather during growing seasons Changes in production are directly linked to variations in temperature and precipitation during the growing season and often to the offseason changes in weather because of soil water storage to replenish the soil profile This is not an isolated problem but one of worldwide interest because each country has concerns about their food security The Agricultural Model Intercomparison and Improvement Project AgMIP was developed to evaluate agricultural models and intercompare their ability to predict climate impacts In sub Saharan Africa and South Asia South America and East Asia AgMIP regional research teams RRTs are conducting integrated assessments to improve understanding of agricultural impacts of climate change including biophysical and economic impacts at national and regional scales Other AgMIP initiatives include global gridded modeling data and information technology IT tool development simulation of crop pests and diseases site based crop climate sensitivity studies and aggregation and scaling
