Lancet has been released to coincide with the European Society of Cardiology ESC meeting in Munich Germany which is to be held on Aug 25-29 2012. The Lancet is strongly supportive of cardiology as can be seen from the substantial relevant content in this compilation. In 2011 The Lancet published more papers in this specialty than any other cardiovascular research contributed about one in four of all published research papers. Featured within are three research articles on lipids and cardiovascular disease which provide balance on the role of high density lipoproteins in cardiovascular disease and on statins in prevention of cardiac events. There are also three commissioned reviews being presented at the joint ESC The Lancet session at the Munich meeting that are focused on hypertension. It is estimated that some 40% of the adult population around the world will have high blood pressure and it is well established that hypertension is strongly associated with other cardiovascular outcomes. Hypertension is by no means a problem only in high income countries; one of the reviews reports on the prevalence of high blood pressure in low income and middle income countries and on specific health problems and solutions in these countries. The interrelation between hypertension and diabetes, another disease that is rapidly becoming more prevalent, is examined in a second review. In light of the high prevalence and subsequent outcomes, it is important to be able to treat hypertension effectively and the third review discusses drugs and devices that have recently reached the market or are in development. These reviews have been commissioned with the advice and help of Lars H. Lindholm. *The Cleveland Clinic Cardiology Board Review* Brian P. Griffin, Samir R. Kapadia, Curtis M. Rimmerman, 2012-10-22. The Cleveland Clinic Cardiology Board Review 2nd Edition continues to offer thorough preparation for board certification and recertification exams in cardiology. The book provides a comprehensive state-of-the-art review of every area of contemporary cardiovascular medicine. Emphasis is on board-relevant clinical material and accurate real-world clinical decision making. More than 500 illustrations and numerous tables facilitate quick review. Board-format questions with answers and explanations appear at the end of each chapter. Plus with this edition you have access to an online companion website with fully searchable text and a question bank for access to the content anytime anywhere. *Empowering Patients and Supporting Patient-Centered Care: A Spotlight on Health Behavior Change* Christos D. Lionis, Marilena Anastasaki, Sophia Papadakis, Ana M. Carriazo, 2024-09-12. The COVID-19 pandemic has had a major impact on both mental and physical health with documented and ongoing effects on the health status of populations globally. One of the key drivers of these trends is the increase in risk factors and unhealthy behaviors in the population, e.g., obesity, smoking, alcohol consumption, and poor adherence to health screening, vaccination, or other preventative interventions. This has increased the importance of actions toward disease prevention with a focus on health behavior change. It is recognized that such intervention approaches should be grounded in the principles of person-centered approaches and include patient empowerment and compassionate care provision with the aim to facilitate the

complex interactions between mental and physical health and effective communication between healthcare professionals and patients Sharing international learning and best practices for promoting health behavior change using empowerment oriented approaches is key to supporting the rapid scale up of effective intervention strategies and will inform research and policy This Research Topic will focus on best and promising practices of empowerment oriented strategies for supporting health behavior change This collection of multidisciplinary articles original research reviews systematic reviews and opinions will examine methodologies that address individuals populations as well as healthcare professionals that aim to reduce the risk of disease promote healthy behaviors or enhance adherence to healthcare interventions **Federal Register** ,1992-04
