Impact of Print-On-Demand on Academic Books Suzanne Wilson-Higgins, 2017-11-21 The convergence of online book selling digital printing digital document workflow management and the computerization of small parcel logistics created a unique opportunity to create a viable commercial model for printing and supplying books on demand This innovation was swiftly embraced by the academic publishing community heralding the rescue of the languishing academic monograph The possibilities captured the imagination of creative academic and niche publishers enabling custom publishing student editions of monographs self compiled wiki books and even the establishment of new university presses and open access publishers The Impact of Print on Demand on Academic Books takes an in depth look at this phenomenon by looking back on two decades of innovation reviewing the present state of academic publishing with respect to works being printed on demand and compiling the current forecasts and speculation about the future of academic and niche publishing given the impact of print on demand Presents knowledge on the print on demand industry and chronicles developments and their impact on publishing Provides a useful guide for practitioners and students of publishing and is ideal for academic publishing historians and business academics interested in innovation and digital developments Includes an international perspective with information from Europe North America Australia and Singapore China Chronicles business case studies collected from interviews with key individuals from companies who have shaped or are shaping the academic POD landscape **Looking at Photographs**

Gordon Baldwin, Martin C. Jürgens, 2009 From its origins at the end of the 1830s photography has evolved both aesthetically and technologically This guide explains the technical terms used in photography and offers an account of the dramatic rise of digital photography It is suitable for those wishing to increase their understanding and enjoyment of the art of photography

As If By Chance Kevin Reed Donley, 2023-12-21 The age of print was begun by Johannes Gutenberg in 1440 in Mainz Germany His invention of the mechanized and mass production of print replaced the previous handwriting of the scribes and was a transformative achievement It was both the product of and a catalyst for far reaching intellectual social and political changes that began during the Renaissance and continued for centuries right up to the present The age of electronic media was begun by Steve Jobs in 1985 in Cupertino California His integration of the elements of desktop publishing personal computer page layout software page description language and laser printer replaced the previous photomechanical

processes of printing and was a transformative achievement. It was both the product of and a catalyst for the intellectual, social, and political changes during the digital revolution that will extend for generations into the future. This book discusses these two bookends in the age of print. It follows the transitions and stages of innovation in printing between the fifteenth and twenty-first centuries and shows how the inventors responsible for this progress are bound together in a chain of revolutionary technical change called disruptive continuity. While the works of Gutenberg and Jobs are separated by more than five centuries, there are striking parallels and differences between these two innovations. They both sparked the quantitative expansion of literacy and the spread of knowledge around the world. However, the emergence of electronic publishing, especially in its present-day social media forms, has brought a vast increase in the consumption of information while also heralding a qualitative transformation that places the tools of wireless and mobile multimedia publishing into the hands of billions of people on earth. Much in the same way that there was a historical lag between Gutenberg's invention and the full impact of printing on the world, so too in our own time the long-term societal consequences of electronic publishing have yet to be realized.

Thematic Cartography and Geovisualization Terry A. Slocum, Robert B. McMaster, Fritz C. Kessler, Hugh H. Howard, 2022-08-18. This comprehensive and well-established cartography textbook covers the theory and the practical applications of map design and the appropriate use of map elements. It explains the basic methods for visualizing and analyzing spatial data and introduces the latest cutting-edge data visualization techniques. The fourth edition responds to the extensive developments in cartography and GIS in the last decade, including the continued evolution of the Internet and Web 2.0, the need to analyze and visualize large data sets commonly referred to as Big Data, the changes in computer hardware, e.g., the evolution of hardware for virtual environments and augmented reality, and novel applications of technology. Key Features of the Fourth Edition: Includes more than 400 color illustrations and is available in both print and eBook formats. A new chapter on Geovisual Analytics and individual chapters have now been dedicated to Map Elements, Typography, Proportional Symbol Mapping, Dot Mapping, Cartograms, and Flow Mapping. Extensive revisions have been made to the chapters on Principles of Color, Dasymetric Mapping, Visualizing Terrain, Map Animation, Visualizing Uncertainty, and Virtual Environments, Augmented Reality. All chapters include Learning Objectives and Study Questions. Provides more than 250 web links to online content, over 730 references to scholarly materials, and additional 540 references available for Further Reading. There is ample material for either a one- or two-semester course in thematic cartography and geovisualization. This textbook provides undergraduate and graduate students in geoscience, geography, and environmental sciences with the most valuable up-to-date learning resource available in the cartographic field. It is a great resource for professionals and experts using GIS and Cartography and for organizations and policy makers involved in mapping projects.
